SPECIAL OFFER ON INSIDE COVER.

Rainbow Collection.

(As Illustrated on the First Cover of this Catalogue.)

We offer this season this choice collection of four popular varieties of flowers. They are all easily grown, all free to bloom, and each entirely different from the other. Two of them produce very fragrant blossoms, one tall growing, one low growing, two medium height. One begins to bloom in June, one about the middle, one in July and one in August, and all continue until killed by frost. We believe it the best small collection we have ever offered.

No. 1. Golden Gate Sweet Peas. From the State of California comes this lovely collection of Sweet Peas. In the entire list of flowers what is there any prettier than a row of Sweet Peas in full bloom, what more pleasing than to go into the garden each morning and pick the lovely fragrant blossoms; and at each picking obtain new colors. To thoroughly enjoy Sweet Peas one should sow a liberal quantity. We put this variety up in ounce packages only, containing 300 to 400 seeds, enough for a row eight feet long. We guarantee in each ounce of seed that there are over seventy-five varieties. Price 15c.

No. 2. Beauty of Paris Carnations. From sunny France, the land of flowers, comes this beautiful variety of Carnations. Without doubt more Carnations are grown by the florists than of any other variety of flowers. You can grow them in your garden to perfection, allowing them to bloom until Fall, then take them up and pot and bring into the house and have an abundance of beautiful Carnations throughout the Winter. Blooms are large, perfect form, exquisite in color, delightful, fragrant, showing beautiful colors and shades in white, pink, red and variegated. Plants are quick growing, of dwarf habit, compact and robust, producing beautiful flowers on long stems in a few weeks from seed. Put up in packets containing about 50 seed. Price 10c.

No. 3. Queen Wilhelmina Nasturtiums. Named for the beloved Queen of the Netherlands. This variety of seed comes from the far away country of Denmark. The people of this country learn to do well whatever they undertake, and one of their occupations is the growing of certain varieties of Flower Seeds. We have imported our Nasturtium seed from this country for several years, and find them much superior to seeds from other sections. For borders to large beds or borders to walks, lanes or drives, for beds of bright colors alongside of a fence, for old stumps or trees, for window beds or gardens or border around the whole flower garden, the Nasturtium has no equal. Easy to grow, requiring but little care or attention, quick to come into bloom and producing an abundance of bright colored flowers during the entire season, until killed by heavy frosts, surely it is no wonder that the Nasturtium is among the choicest of the Summer flowering flowers. Dwarf varieties, all colors and shades. Put up in one ounce packages only, containing about 225 seed, enough for a nice bed or border. Price 15c.

No. 4. Grand Minuet Asters. From the land of our forefathers, grand, stately old England, comes this handsome flower. It does not seem necessary for us to dwell upon the great beauty of this popular and so well appreciated flower. There is nothing that will take its place, handsome growing in the garden or pots, handsome in the border, and particularly handsome as cut flowers, retaining their beauty and freshness for many days. Put up in packets containing about 100 seed, of all varieties and colors, that will produce a magnificent display of large, beautifully colored flowers. Price 10c.

Special price for entire collection, 40c.

How You May Obtain this Collection For Only 25c.

Send us with your order the names and addresses of five persons who use Seeds, Plants or Bulbs, and 25c. and we will send you the above collection.

How to Obtain this Collection FREE.

Write to five of your friends or acquaintances a letter, sending the same through the Post Office and as soon as these five persons send to us for a copy of our new 1903 Catalogue, we will send this collection of seed to you free of charge. When you have written and mailed the five letters you must write to us that you have done so, and give us the names and addresses of the persons to whom you have written. In writing copy this:

"The Page Seed Co., of Greene, N. Y., are sending out a very neat catalogue for 1903. To increase the number of their customers they are making a special offer. If you will send them a letter asking for their catalogue, and giving them my name, they will send it to you free of charge, and also tell you how you can obtain 40c. worth of seed free. In writing The Page Seed Co. be sure to give your name and full address and write plainly."

Then sign your own name and address and as soon as you have mailed the five letters, write us as we have instructed above and as soon as the five have asked for our catalogue we will mail you the seeds **free of charge.**

**THE PAGE SEED CO.,
Greene, Chenango Co., N. Y.**

SPECIAL NOTE.—If through error you should receive in your family more than one copy of our Catalogue, will you kindly do us the favor of handing the extra copy to one of your neighbors or friends.

THE PAGE SEED CO., Seedsmen, Greene, N. Y.

January 1, 1903.

To Our Friends and Customers:

WE do not think we are presuming too much when we say that we have thousands of friends scattered over the entire United States and Canada. We know that we have customers in every state and territory, and in nearly every province in Canada. Therefore it may not be out of place to say a few words about ourselves. It was not very many years ago that we began business. We commenced at the foundation. We did not have a single name or customer (except locally), and we bought out no firm or list of names. For a time it was somewhat discouraging. We did not run a lottery or offer solid silverware, cut glass, watches, diamonds, or houses and lots with every purchase, nor did we offer to furnish several hundred varieties—more or less—of seeds for 10 cents. We believed that if we offered the best seeds that could be produced at fair prices, treat our customers fairly and honestly, that in the end we would establish a business that we well might be proud of, and such has been the case.

To give our friends and customers some idea of how our business has grown since 1896, we will let 10 represent floor space (we use 10 only as a unit for comparison, not as actual space or dollars) occupied in 1896, also, 10 represent the amount of business done, then the increase each year would be as follows:

YEAR.	FLOOR SPACE REPRESENTED BY	AMOUNT OF BUSINESS REPRESENTED BY
1896	10	10
1897	18	27
1898	26	60
1899	62	115
1900	80	275
1901	160	480
1902	270	1200
1903	560	

It will thus be seen that the floor space which we are using for this season is fifty-six times larger than occupied in 1896, and that the amount of business done in 1902 was one hundred and twenty times as much as that done in 1896. This looks like a fairy tale, but it is nothing but the plain truth. It reminds us of the old saying, "Truth is stranger than fiction." We have just completed a new warehouse, situated directly on the railroad, which contains nearly 10,000 feet of floor surface, which with our other storehouses will give us ample space, for this season at least, to handle our business quickly and economically. We wish to thank all our friends for their good words, and our customers for their patronage and help, for we well realize that our success depends in a large measure upon you. No order is too small, and none too large—each has the same attention

In dealing with thousands of customers it must sometimes happen that orders are delayed or lost. After sending in an order (always keep a copy) and waiting a reasonable length of time, and not receiving your order or a letter from us, write us in regard to it.

We receive each year many orders without name or address, and we are blamed for not filling the order.

Again thanking you for past favors, and trusting that we shall be favored with your future orders,

We are, very respectfully yours,

THE PAGE SEED CO.

Incorporated under the Laws of the State of New York.

SUGGESTIONS TO CUSTOMERS

NAME AND ADDRESS.—Please remember to write your name, postoffice, county and state, and also the number of your street or postoffice box. **Write plainly.**

POSTAGE PAID.—We deliver, postage paid, to any postoffice in the United States or Canada, all seeds in packets, ounces, pounds, also, plants and bulbs, except when otherwise noted.

ORDER EARLY.—The best time to order is just as soon as you receive this catalogue, as we can always give the orders more of our personal attention if they come in before the rush of our spring trade. Please to use the order sheet which is inclosed in this catalogue.

TERMS OF SALE.—Remittance must accompany the order. Stamps in one and two cent denominations will be accepted for small orders. Remittance can be made safely by P. O. Order, Money Order, Bank Draft, Express Order or Registered Letter. **Do Not Send Personal Checks.** On all orders amounting to \$1.00 or over, the customers may deduct the cost of the Money Order. Blank Money Order is inclosed in catalogue.

DISCOUNTS.—Instead of quoting high prices on packets and ounces and then allowing a discount, which must be taken in seeds, we make a low price on all of them and do not allow extra premiums. If, however, several growers wish to club together and send a large order, we are able oftentimes to make special prices.

GUARANTEE.—We guarantee all seeds, plants and bulbs to reach our customers safely and in good condition. There are so many contingencies continually arising to prevent even the best seeds always giving satisfaction, such as sowing too deep, too shallow, in too wet or too dry soil, insects of every description destroying the plants, wet weather, cold weather, frosts, etc., that it is impracticable to guarantee seeds under all circumstances. We, therefore, in common with all other responsible seed firms, have adopted and print the following disclaimer:

"While we exercise great care to have all seeds, plants and bulbs pure and reliable, we do not give any warranty, expressed or implied. If the purchaser does not accept the goods on these conditions, they are to be returned at once."

FREE SEEDS.—As has been our custom, we shall give free trial packets of the choicest varieties of various seeds with each order for 25c. or over. We not only use some of the very best of the standard varieties, but, also, new and rare varieties. The larger the order the more trial packages sent.

VEGETABLES

PLEASE bear in mind that the prices quoted in the following pages, except where otherwise noted, include prepayment of postage. If the seeds are ordered sent by express or freight at the expense of the purchaser, 10c. per lb., 10c. per quart on Corn and 15c. per quart on Peas and Beans, may be deducted from the prices here quoted. Under each heading our customers will find the quantity of seeds required to plant a given space, also about the number of seeds each packet contains. Remember we give free trial packages of our own selection, with every order of 25c. or over.

Seeds Sent by Express or Freight are Sent at Expense of Purchaser, Unless Otherwise Stated.

Asparagus.

One ounce for 600 plants or 40 feet of drill. Packet contains from 250 to 300 seeds.

11. **Conover's Colossal**—The standard, well known variety. Pkt. 4c, oz. 10c, $\frac{1}{4}$ lb. 20c, $\frac{1}{2}$ lb. 30c, 1 lb., 50c.

12. **Columbian Mammoth White**—A most excellent variety, producing large, clear white shoots which remain in good condition for a long time. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c, $\frac{1}{2}$ lb. 40c, 1 lb. 75c.

13. **Barr's Mammoth**—A most excellent market or

home variety. Very productive, stalks large, frequently one inch in diameter and very tender and sweet. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 20c, $\frac{1}{2}$ lb. 35c, 1 lb. 60c.

Asparagus Roots—By mail, postpaid, two-year old roots, 25 for 50c, 50 for 80c, 100 for \$1.35. By express, at the expense of the purchaser, 100 for \$1.00, 250 for \$2.00, 500 for \$3.50, 1,000 for \$6.50.

Beans.

One quart will plant 90 to 100 feet of drill, 2 bu. will plant an acre in drills. Packet contains from 2 to 3 ounces, or from 100 to 300 seeds, according to size. Pkts., pints and quarts sent by mail or express prepaid, at the prices quoted; larger quantities by express or freight, purchaser to pay charges on arrival. Customers may deduct 10c. per pint or 15c. per quart from the prices quoted, if they wish the seeds sent by express or freight, they to pay charges. The bean crop is very short this season and we will be unable to fill late orders for quantities.

17. **Black Wax**—This variety is also sometimes called Prolific German Black Wax. We are thoroughly satisfied that it is a great improvement over the old strain of Black Wax Bean and, therefore, have discarded that variety, this being more vigorous, far more productive and with longer, whiter, more fleshy pods. Pods three to four inches in length, usually curved, quite round; meaty, brittle and entirely stringless; deep golden yellow, of excellent quality. The dried beans are rather small, and oblong in shape. A very popular variety.

18. **New York State Golden Wax**—We do not believe there is a better golden wax bean grown than this variety; in fact, we believe it to be the very best. There are many so-called "Improved strains," of the Golden Wax Bean, yet when tested side by side with this variety, most of them are found inferior to this variety. Pods about four inches in length, half an inch broad, rather flat, of a light golden yellow color, very fleshy and wax like; cooks very quickly. The beans are of medium size, oval, white and more or less covered with two shades of purplish red.

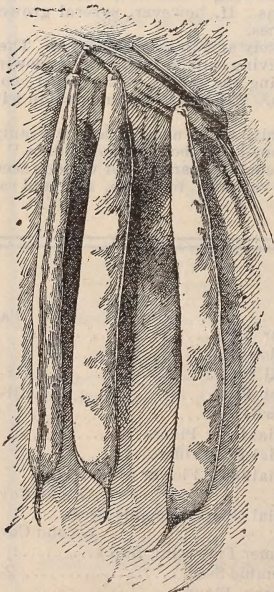

23. **Wardwell's Kidney Wax**—The very strong growing vines of this variety yields a large crop of long, nearly straight, golden yellow, handsome pods, which are of excellent quality and always command a ready sale, making this variety one of the most profitable for the market gardener. It is entirely stringless, even when fully developed; strong, upright bushes, 15 inches in height. The dried beans are large, kidney shaped, white with dark markings around the eye.

24. **Jones' Stringless Wax**—Jones' Stringless Wax Bean is a wonderfully productive variety with uniformly well shaped, handsome pods. The plant is exceedingly hardy, rust proof; pods are long, round, fleshy, stringless; it ripens its crop earlier than the earliest of the field varieties. It is a very profitable variety for farm as well as the garden.

The price of any of the above varieties. Pkt. 10c, pt. 25c, qt. 40c, prepaid. By express or freight, not prepaid, qt. 25c, 2 qts. 40c, 4 qts. 75c, $\frac{1}{2}$ bu. \$3.00, bu. \$6.00. Sacks included without charge.

BLACK WAX.

NEW STRINGLESS GREEN POD.

Finest Green Pod Variety.

32. **Burpee's New Stringless Green Pod**—We consider this variety, without exception, the very best green podded variety grown. We have tested it many times and have always found it entirely satisfactory, producing an abundance of crisp, tender, absolutely stringless pods, even when fully matured. It is easy to mature and not only suitable for the private garden, but also for the market gardener and canner. The pods are rich green, round, straight, about five inches long, solid, and meaty.

Pkt. 10c, pt. 25c, qt. 40c prepaid. By express or freight not prepaid, qt. 25c, 2 qts. 40c, 4 qts. 70c, $\frac{1}{2}$ bu. \$2.50, 1 bu. \$4.50.

Other Choice Varieties Beans.

BURPEE'S BUSH LIMA.

Beets.

One ounce for 50 feet of drill, 5 to 6 lbs. per acre; pkts. contain from 500 to 1,000 seeds.

FIVE CHOICE VARIETIES OF GARDEN BEETS.

103. **The Ideal Beet**—We have yet to find a better variety for the market gardener or the private garden than the Ideal Beet. It is, also, very largely used for canning, on account of its superior quality, small growing tops and its almost perfect shape. Color of flesh, bright red zoned with lighter shades; very crisp, tender and sweet and remains in an excellent condition for a long time. Pkt. 5c, oz. 10c, ¼ lb. 20c, ½ lb. 35c, lb. 65c.

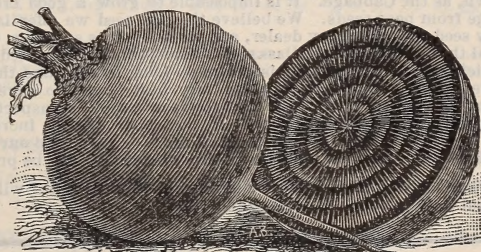

107. **Egyptian Blood Turnip**—This is an extra early variety and is very popular with a great many growers; roots very dark red, round on top, but flat beneath with very small tap roots; flesh dark red, zoned with a lighter shade, crisp and tender when young. Pkt. 5c, oz. 8c, ¼ lb. 15c, ½ lb. 30c, lb. 50c.

110. **Half Long Blood**—An entirely distinct variety, largely grown for winter use. The deep red roots are very thick and always smooth and handsome; flesh is deep, dark red, crisp and tender, never becoming woody. We consider it a most valuable variety for winter and spring use. Pkt. 5c, oz. 8c, ¼ lb. 20c, ½ lb. 30c, lb. 50c.

112. **Lentz Blood Turnip**—This is an early variety of most excellent garden Beet. Tops small, roots turnip shaped, flesh bright red, crisp, tender and sweet. It is very popular in some sections for the market garden on account of its excellent quality, fine form and remarkably small tops. Pkt. 5c, oz. 8c, ¼ lb. 15c, ½ lb. 30c, lb. 50c.

121. **Improved Long Dark Blood**—This is the variety that is so well-known and largely used by almost every grower; tops large, neck small, leaves and stems veined with red; roots large, flesh dark red, zoned with a lighter shade; very tender and sweet, remaining in excellent condition until spring. Pkt. 4c, oz. 7c, ¼ lb. 15c, ½ lb. 25c, lb. 40c.

SPECIAL OFFER.—One package each of the above five choice varieties for 20 cents.
One ounce each for 30 cents.

Do not fail to notice Farm Seeds
in another portion of Catalogue.
If you think any of your friends
would like our Catalogue, send
us their names.

Mangel Wurzel and Sugar Beets.

Largely grown for feeding stock. The value of beets for stock feeding cannot be overestimated. The Mangel varieties produce a larger bulk per acre than the Sugar varieties, but the latter, while less in bulk, will produce a crop of higher feeding value by reason of their richness in sugar. Everyone having stock should not fail to sow a liberal quantity.

127. **Improved Mammoth Long Red Mangel Wurzel**—Probably more generally used than any other variety; very heavy cropper, frequently producing 40 tons to the acre.

128. **Yellow Globe Mangel Wurzel**—Large, round, orange colored variety, producing a better crop on shallow soil than the Long Red.

129. **Yellow Ovoid**—Roots ovoid, intermediate between

the long rooted varieties. Flesh very solid, nearly white, zoned with yellow.

130. **Giant Yellow Intermediate**—Entirely distinct; color, bright yellow; roots oval shaped, growing two-thirds above ground; an enormous cropper.

133. **Golden Tankard**—A yellow fleshed variety, most excellent for stock feeding and a great milk producer.

135. **Notbitan Giant**—Grows to immense size, single roots often weighing 20 to 30 lbs. each. Flesh deep red.

Price for any of the above varieties of Mangel Wurzels, pkt. 4c, oz. 7c, ¼ lb. 15c, 1 lb. 35c, prepaid. By express or freight at the expense of the purchaser, 1 lb. 25c, 5 lbs. or more 22½c. per lb., 10 lbs. or more 21c. per lb., 25 lbs. or more 20c. per lb.

Sugar Beets.

Not only largely used for the manufacture of sugar, but are invaluable for stock feeding and table use.

137. **Vilmorin's Improved Imperial Sugar**—A medium sized, white sugar beet, largely grown for sugar, also a most excellent variety for stock feeding; yields 10 to 16 tons per acre and contains from 16 to 18 per cent. sugar.

138. **Lane's Improved Imperial Sugar**—A most popular variety for stock feeding. It is almost as large a yielder as the Mangel Wurzel varieties, and contains 8 per cent. of sugar. 25 to 40 tons are produced on an acre.

140. **French White Sugar**—A very hardy, productive variety, yielding about 20 tons to the acre. Flesh white.

Price of any of the above varieties, pkt. 4c, oz. 7c, ¼ lb. 15c, ½ lb. 25c, 1 lb. 35c, postpaid. By express or freight, 1 lb. 25c, 5 lbs. or more at 20c. a lb.

Brocoli.

Each packet contains from 1,000 to 1,200 seeds.

147. **Early Purple Cape**—This is the best variety for our climate. Produces large heads, very close and compact and of excellent flavor. Pkt. 5c, ½ oz. 15c, oz. 25c.

Brussels Sprouts.

Each packet contains from 1,000 to 1,200 seeds.

152. **Paris Market**—This is a very fine, new variety of half dwarf growth, bearing handsome, solid, round sprouts of the very best variety. Pkt. 5c, oz. 15c.

Cabbage.

The Cabbage is probably more largely grown for market purposes than any other vegetable excepting the Potato. There is no crop grown that is so largely dependent upon the quality of the seeds sown, as the Cabbage. It is impossible to grow a good crop of Cabbage from poor seeds. We believe that the seed we offer is equal to any seed offered by any dealer, and we know it is superior to a great deal that is sold as first-class seed. Excepting the imported varieties, which we import, our seed is grown on Long Island, and the greatest care is used in selecting only the very best plants to save the seed from and during the growth the fields are carefully inspected. During the past two or three years our sales have greatly increased and we believe it to be due to the fact that we have used our very best endeavors to send out only the choicest seeds that can be produced.

Pkts. contain from 1,000 to 2,000 seeds, and one ounce will produce about 3,000 plants. ¼ lb. seed per acre.

Plant Page's Seeds. They Grow.

163. **Extra Early Jersey Wakefield**—The earliest, hard heading of the extra early varieties. More market gardeners depend on this variety than any other sort. Our seed is carefully selected and we believe there is none better offered. The heads are conical, compact, solid and of most excellent quality. Pkt. 5c, oz. 20c, 2 ozs. 35c, ¼ lb. 65c, ½ lb. \$1.15, lb. \$2.00.

166. **Burpee's All Head Early Cabbage**—Second early, coming in just after the Jersey Wakefield; heads flat, hard, of uniform quality, form and size, standing for a considerable time without bursting; grows so quickly that the heads are very tender and of the finest quality. A most excellent summer and fall variety. Pkt. 5c, oz. 20c, 2 ozs. 35c, ¼ lb. 65c, ½ lb. \$1.25, lb. \$2.25.

172. **Warren's Stone Mason**—This is also sometimes called Warren or Improved Stone Mason. We believe it to be one of the very best fall and winter varieties grown. It is of medium size, round, slightly flattened and very solid, crisp and tender; not only excellent for the private garden and market gardeners, but also, for large growers, who grow for shipping, as it is a most excellent shipping variety. We believe we have the true strain of Warren's Stone Mason. Pkt. 5c, oz. 15c, 2 ozs. 30c, ¼ lb. 50c, ½ lb. 90c, lb. \$1.75.

175. Danish Ball Head—This is a distinct variety which originated in Denmark and has become very popular in this country within the past few years, especially for its shipping qualities. We know of no Cabbage that will stand to such a remarkable degree frosts and drought. It forms heads 8 to 10 inches in diameter, extremely hard and solid, with very few outside leaves. In the Cabbage growing sections it is more largely used for shipping than any other variety. We import our seed direct from Denmark from a grower who is extremely careful in selecting his seed and, thus far, the seeds we have obtained from him have proved entirely satisfactory. Pkt. 5c, oz. 25c, 2 ozs. 40c, $\frac{1}{4}$ lb. 75c, $\frac{1}{2}$ lb. \$1.25, lb. \$2.50.

191. Grégory's Twiss.—This variety is also called Twiss Early Drumhead. It seems to be, upon trial, a strain of the Warren or Warren's Stone Mason, possessing all of the best characteristics of this variety. It is quite largely used in the cabbage growing sections as it seems to be a little better shape and matures a week or 10 days earlier. One peculiar characteristic is, that while growing, the leaves which make the outer wrapping of the head will oftentimes have a twist at the end like the Winningstadt, but when the cabbage is mature and ready for market, the firm, round heads are most attractive in every way. Pkt. 5c, oz. 25c, 2 ozs. 40c, $\frac{1}{4}$ lb. 75c, $\frac{1}{2}$ lb. \$1.25, lb. \$2.50.

OTHER VARIETIES OF CABBAGE, So well known as to need no description from us.

161. Extra Early Express.

164. Very Early Etampes.

165. Champion Early.

The above are extra early varieties. Pkt. 4c, oz. 15c, 2 ozs. 25c, $\frac{1}{4}$ lb. 50c, $\frac{1}{2}$ lb. 80c, lb. \$1.50.

167. Henderson's Early Summer.

168. Henderson's Succession.

170. Early Winningstadt—Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 40c, $\frac{1}{2}$ lb. 75c, lb. \$1.50.

171. All Seasons.

Prices of above Second Early or Summer varieties, excepting as noted, pkt. 5c, oz. 20c, 2 ozs. 35c, $\frac{1}{4}$ lb. 60c, $\frac{1}{2}$ lb. \$1.15, lb. \$2.00.

174. Mammoth Marble Head—This is the very largest cabbage grown. Under good cultivation acres have been grown where the heads averaged 30 lbs. each. Pkt. 5c, oz. 15c, 2 ozs. 30c, $\frac{1}{4}$ lb. 50c, $\frac{1}{2}$ lb. 90c, lb. \$1.75.

180. Danish Ball Head—The same as No. 175, excepting that the seed is not imported, but grown on Long Island from imported seed. Pkt. 5c, oz. 20c, 2 ozs. 35c, $\frac{1}{4}$ lb. 65c, $\frac{1}{2}$ lb. \$1.10, lb. \$2.00.

176. Mammoth Red Rock—Pkt. 5c, oz. 15c, 2 ozs. 25, $\frac{1}{4}$ lb. 50c, $\frac{1}{2}$ lb. \$1.00, lb. \$1.75.

177. Red Dutch Drumhead or Improved Red Dutch—Pkt. 5c, oz. 15c, 2 ozs. 25c, $\frac{1}{4}$ lb. 50c, $\frac{1}{2}$ lb. 90c, lb. \$1.75.

186. Premium Late Flat Dutch—Pkt. 5c, oz. 15c, 2 ozs. 25c, $\frac{1}{4}$ lb. 50c, $\frac{1}{2}$ lb. 80c, lb. \$1.50.

187. Lupton—Pkt. 5c, oz. 20c, 2 ozs. 35, $\frac{1}{4}$ lb. 60c, $\frac{1}{2}$ lb. \$1.15, lb. \$2.00.

188. Burpee's Short Stem Drumhead—Pkt. 5c, oz. 15c, 2 ozs. 25c, $\frac{1}{4}$ lb. 50c, $\frac{1}{2}$ lb. 80c, lb. \$1.50.

189. Savoy—Pkt. 5c, oz. 15c, 2 ozs. 25c, $\frac{1}{4}$ lb. 50c, $\frac{1}{2}$ lb. 80c, lb. \$1.40.

Carrots.

One ounce to 100 feet of drill, three lbs. per acre. Pkt. contains from 5,000 to 8,000 seeds.

203. Earliest Short Horn—The earliest variety in cultivation and the best suited for forcing. Roots reddish or orange color, nearly round with a deep groove about the crown. Very tender and delicious. Pkt. 4c, oz. 7c, $\frac{1}{4}$ lb. 25c, $\frac{1}{2}$ lb. 50c, lb. 90c.

204. Early Scarlet Horn—Excellent for early planting out of doors. Skin, orange-red in color. Pkt. 4c, oz. 7c, $\frac{1}{4}$ lb. 25c, $\frac{1}{2}$ lb. 50c, lb. 90c.

205. Chanténay—Tops medium size, necks small, roots tapering, small and uniformly stump rooted and smooth; color deep orange-red, flesh crisp and tender. Pkt. 4c, oz. 8c, $\frac{1}{4}$ lb. 30c, $\frac{1}{2}$ lb. 50c, lb. 85c.

207. Guerande or Ox Heart—Flesh bright orange, fine grain, sweet. Roots not so long as some of the other varieties, especially suitable for shallow soils. When young, excellent for

table use; when fully matured, equally as good for stock. Pkt. 4c, oz. 7c, $\frac{1}{4}$ lb. 25c, $\frac{1}{2}$ lb. 50c, lb. 90c.

208. Danver's Half Long—In form it is midway between the Long Orange and the short varieties. Roots smooth, rich dark orange color, largely used on account of its great productiveness. Pkt. 4c, oz. 7c, $\frac{1}{4}$ lb. 25c, $\frac{1}{2}$ lb. 45c, lb. 85c.

209. Improved Short White—This distinct variety is destined to take the front rank as a fall carrot, owing to its enormous productiveness and the ease with which it can be harvested. Color light green at the crown, pure white below. Flesh, rich, white, solid, crisp and of excellent flavor. Pkt. 5c, oz. 7c, $\frac{1}{4}$ lb. 20c, $\frac{1}{2}$ lb. 35c, lb. 60c.

210. Improved Long Orange—One of the old varieties, but still very popular and preferred by many to the newer sorts. The improved variety has shorter roots than the Long Orange. Pkt. 4c, oz. 7c, $\frac{1}{4}$ lb. 25c, $\frac{1}{2}$ lb. 40c, lb. 75c.

211. Large White Belgian—Largely used for stock feeding. Roots white, green above ground; flesh rather coarse. Pkt. 4c, oz. 7c, $\frac{1}{4}$ lb. 20c, $\frac{1}{2}$ lb. 35c, lb. 60c.

Cauliflower.

One oz. of seed produces about 3,000 plants. Pkts. contain from 300 to 500 seeds. Cauliflower is as easily grown as Cabbage and is far superior for table use.

220. EARLY SNOWBALL—This variety is probably known and more extensively grown than any other variety, both for forcing and late crop. It is exceedingly hardy and one of the surest to make a solid, compact head. The seed which we offer is not the cheap grown American seed, but imported by us direct from the grower in Denmark and our customers may depend upon

receiving the very best seed to be obtained. Pkt. 15c, 2 pkts. 25c, $\frac{1}{4}$ oz. 65c, $\frac{1}{2}$ oz. \$1.25, oz. \$2.00.

223. White Excelsior—Pkt. 10c, 3 pkts. 25c, $\frac{1}{4}$ oz. 30c.

225. Early Erfurt—Pkt. 5c, $\frac{1}{4}$ oz. 25c, $\frac{1}{2}$ oz. 40c.

231. Veitche's Autumn Giant—Pkt. 5c, $\frac{1}{2}$ oz. 25c, oz. 40c.

Cress.

Pkt. contains over 1,000 seeds.

340. Curled or Peppergrass—Very largely used for salads and for garnishing. Grows very quickly with finely cut and feathery leaves. Sowing should be made successively about two weeks apart. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 20c.

Sweet Corn.

The crop is extremely short this season, and good Corn is hard to obtain, therefore prices are high. We can accept orders for quantities only subject to one stock and to market changes. Northern grown seeds only.

Packet will plant about 25 hills, qt. 200 hills, 10 qts. to the acre. At prices quoted, sent prepaid, except prices quoted by freight or express, which are subject to purchaser to pay charges on arrival. No charge made for bags.

259. **Mammoth White Cob Cory**—This is a new strain nearly as early as the original Cory with ears of large size and grains placed more compactly. The cobs are white and the corn is entirely free from the dark tinge noticeable in the original strain. It is a most excellent early home or market variety.

260. **White Cob Cory**—An extra early variety, similar to the preceding, but producing smaller ears.

262. **Kendall's Early Giant**—A new variety of great merit, being fit for use in 60 days from planting. The ears are large, 8 to 10 inches in length, well filled with 10 rows of large grains of excellent corn. It will prove a valuable addition to any private garden as well as to the market gardener.

263. **Burpee's First of All**—An excellent variety of early Sweet Corn, growing large ears, containing from 10 to 12 rows.

270. **Early Minnesota**—One of the oldest, best known and popular varieties grown. Equally suitable for the market or private garden.

264. **Early Perfection**. Large ears; 10 to 12 rowed. Very sweet.

265. **Crosby's Early**. Medium size; fine quality.

266. **Black Mexican**. The sweetest corn grown.

267. **Fordhook Early**. A fine quality early corn.

Price for above varieties: Large pkt. 10c, 3 for 25c, qt. 30c.
By Express or Freight. Qt. 20c, 4 qts. 75c, $\frac{1}{4}$ bu. \$1.25, $\frac{1}{2}$ bu. \$2.00, bu. \$3.50.

280. **Pride of Chenango**—A new variety of Sweet Corn, which has been on the market but a very few years. We have sent out thousands of trial packets and have yet to hear of any complaints. It is an extra early variety, producing large ears, mostly 12 rowed. The grain is large, broad, very white and of the most excellent quality. It certainly is of a most excellent variety, both for the private garden and the market gardener.

Large pkt. 10c, 3 pkts. 25c, qt. 40c.

By Express or Freight. Qt. 30c, 4 qts. \$1.00, $\frac{1}{4}$ bu. \$1.75.

MEDIUM AND LATE VARIETIES.

269. **Country Gentlemen**—This late or main crop variety is a result of a cross of the Ne Plus Ultra and the Stowell's Evergreen, producing a larger ear than the former, but retaining its productiveness, fine quality and irregular arrangement of the crowded, slender, deep grains. The ears being so much larger than those of the original, it is more desirable for the market garden or for the home garden.

271. **Hickox**—Earlier than Stowell's Evergreen and produces large, handsome ears with very white grains. It is considered one of the very best varieties for canning. Very prolific and largely used in private families for drying.

275. **Stowell's Evergreen**—This is the old standard variety for home use, market and canning. The stalks are of strong growth and each produces two large ears. The grains, while of good size, are long and slender, the ear being small cobbled. The grains are of a rich, sugary flavor, and retain their fine quality until well advanced. Our stock is most carefully selected and is entirely free from glaze or flintiness.

272. **Late Mammoth**.

273. **Zigzag Evergreen**.

274. **Perry's Hybrid**.

281. **Amber Cream**.

Price for above varieties: Large pkt. 10c, 3 for 25c, qt. 30c.

By Express or Freight. Qt. 20c, 4 qts. 60c, $\frac{1}{4}$ bu. \$1.00, $\frac{1}{2}$ bu. \$1.75, bu. \$3.25.

One package each of the following varieties, 260, 270, 266, 275, 263, for only 40c, postpaid.

Pop Corn for
the Boys.

Pop Corn is quite hardy, the seed can be planted early in the spring when the trees are starting out in leaf. It is a profitable crop to grow, as it always finds ready market in any store. Let the boys try a patch of it and earn a few dollars for themselves.

291. **Golden Tom Thumb Pop Corn**—This well-known variety of Dwarf Tom Thumb Pop Corn grows to a height of about 18 inches. Pkt. 10c, 3 pkts 25c.

293. **Golden Queen**—A new variety that is considered one of the very best for popping, owing to its large size, extreme tenderness and pure white color when popped. Pkt. 10c, 3 pkts. 25c, pt. 20c, qt. 35c.

294. **Silver Lace**—A most excellent variety. Pkt. 10c, 3 pkts. 25c, pt. 20c, qt. 35c.

295. **Mapledale Prolific**—Extremely prolific, a choice variety. Pkt. 10c, 3 pkts. 25c, pt. 20c, qt. 35c.

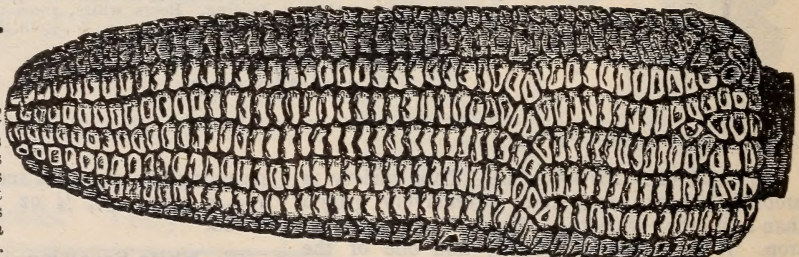

296. **Improved White Rice**—Probably more largely grown than any other variety. The grain is hard and flinty, popping finely when well dried; grains slender, resembling a grain of rice in form, the outer ends being sharply pointed and placed on the cob in a sloping position. Pkt. 10c, 3 pkts. 25c, pt. 20c, qt. 35c.

By express or freight, purchaser to pay the charges, any of the above varieties, except Golden Tom Thumb, 15c per lb., 2 lbs. for 25c, 10 lbs. for \$1.00, 25 lbs. for \$2.00, 50 lbs. or over at 7c per lb.

WHITE COB CORY.

FIRST OF ALL.

PRIDE OF CHENANGO.

Celery.

One oz. will produce about 4,000 plants. Pkts. contain from 4,000 to 8,000 seeds.

243. Golden Self Blanching—Also sometimes called Golden Yellow Large Solid. We consider this the very best variety for early use. It is decidedly better in quality than the White Plume and is nearly as early. It is of dwarf, compact habit with vigorous, solid, heavily ribbed stalks which blanch easily. The handsome color, crispness, tenderness, freedom from stringiness and the fine nutty flavor of this variety make it only necessary to be tried to establish it as the standard Celery. Pkt. 5c, 6 pkts. 25c, oz. 30c, 2 ozs. 50c, $\frac{1}{4}$ lb. 90c, $\frac{1}{2}$ lb. \$1.75, lb. \$3.00.

244. White Plume—While this variety is probably more largely used than any other sort, yet we do not think it equal to the preceding variety. However, it is a very fine variety, grows rapidly, is of excellent quality and is almost self-blanching. It will stand blight and dry weather better than some of the other varieties. Pkt. 5c, 6 pkts. 25c, oz. 20c, 2 ozs. 35c, $\frac{1}{4}$ lb. 60c, $\frac{1}{2}$ lb. \$1.00, lb. \$1.75.

245. Boston Market—For many years one of the most popular sorts in the markets of Boston, where they always seem to have uniformly fine Celery. Instead of a single large heart, it forms a number of smaller ones, which are white, remarkably tender and crisp, and therefore much sought after for table use. Pkt. 5c, 6 pkts. 25c, oz. 15c, 2 ozs. 25c, $\frac{1}{4}$ lb. 40c, $\frac{1}{2}$ lb. 75c, lb. \$1.40.

248. Perfection Hartwell—A very fine flavored, crisp and tender variety. Plants grow to good size and are later in maturing than the above varieties. The stalks are round, crisp and tender, and when bleached are very white. Pkt. 4c, 3 pkts. 10c, 2 ozs. 25c, $\frac{1}{2}$ lb. 75c.

249. Pink Plume—Similar in all respects to the White Plume variety, except that the stalks are delicately marked or tinged with pink. It also has the rich, nutty

flavor of the red Celeries. Pkt. 5c, 6 pkts. 25c, oz. 20c, 2 ozs. 35c, $\frac{1}{4}$ lb. 60c, $\frac{1}{2}$ lb. \$1.00.

250. Giant Pascal—This is a green leaved variety, developed from the Golden Self-Blanching, and is an excellent variety for fall and winter use. It bleaches very quickly to a beautiful, yellowish white color, is very solid and crisp and of a fine nutty flavor. The stalks grow broad and thick, a single plant making a large bunch. With rich soil and high culture this variety will give the best satisfaction. Especially recommended for the South, where it grows more satisfactorily than almost any other kind. Pkt. 5c, oz. 15c, 2 ozs. 25c, $\frac{1}{4}$ lb. 40c, $\frac{1}{2}$ lb. 75c.

251. Evan's Triumph—The very best late Celery grown. This variety is a very strong, vigorous plant with large, white, crisp, brittle, tender and fine flavored stalks. It is a late variety and requires the whole season to develop, but will keep longer than any other sort. It will take the first place as a late Celery. Pkt. 5c, 6 pkts. 25c, oz. 25c, 2 ozs. 40c, $\frac{1}{4}$ lb. 75c.

253. Golden Rose, or Rose Ribbed Self-Blanching—This is a sport of the Golden Self-Blanching variety, identical in habit, growth, early maturity and as easily blanched. It is well worthy of more general cultivation. Pkt. 5c, 6 pkts. 25c, oz. 25c, 2 ozs. 40c, $\frac{1}{4}$ lb. 75c.

254. Giant Golden Heart—This is an improved strain of the standard or half dwarf Golden Heart. It has more solid stalks and is especially recommended for the market gardener or private garden. Pkt. 5c, oz. 15c, $\frac{1}{4}$ lb. 50c, $\frac{1}{2}$ lb. 75c.

252. Celery Seed for Flavoring—Largely used in flavoring soups, pickles, etc. Oz. 7c, 2 ozs. 10c, $\frac{1}{4}$ lb. 15c, lb. 35c.

Cucumbers.

Packets contain 150 to 300 Seeds. One ounce to 50 hills, 2 lbs. to acre.

There is almost a famine in Cucumber Seed this season, and never in the history of the seed trade has Cucumber Seed been so scarce and high. We do not expect to be able to fill orders later in the season. We quote for small quantities only, but should our customers wish larger quantities they will please write us for prices.

301. Early White Spine—One of the very best varieties for table use; vines vigorous, fruiting early and abundantly; fruit uniformly straight and handsome, dark green with a few white spines; flesh tender and of excellent flavor.

302. Coy's Early Cyclone—Claimed by the introducer to be the very earliest Cucumber grown. A well-known grower has the following to say: "Coy's Cyclone Cucumber is the finest I ever saw; one could count ten to twelve cucumbers, three and four in a bunch, something I never saw before, except in pictures," and closes by saying that Coy's Early Cyclone is by far the earliest, best and most productive Cucumber in cultivation.

303. Improved Arlington White Spine—There are a great many white spine cucumbers offered by various seedsmen, who claim them to be the best. This variety, however, is claimed by many growers to be an improvement on any of the white spine cucumbers yet offered. It is beyond question a very early and prolific variety. A very rich green color throughout its entire length, very straight and symmetrical; it certainly is worthy of a trial.

326. Page's New Everbearing—A variety of recent introduction which is especially valuable for the private garden. It is very early and productive, producing fruit continuously until killed by frost, if the fruit is kept well picked. Excellent for pickling as well as for table use.

327. Page's Pickling—Another excellent variety for pickling. The vines are strong and vigorous, yielding a large number of medium sized fruit, about the right size for pickling. The vines should be gone over every few days, pickling all the fruit large enough for pickling.

311. Livingston's Emerald—A new variety that is especially valuable for table use. The fruit is large, smooth, regular in size and form and of a rich, deep, green color. Spineless. Flesh crisp, white and tender.

313. Fordhook Pickling—A very valuable and prolific variety of Cucumber, producing cucumbers of medium size for home use, market, for canning and for pickle factories. If left on the vines until full size they are excellent for table use.

328. New Japanese Climbing Cucumber—This is an entirely distinct variety. While all cucumbers are running vines, yet this variety is more climbing in its habits than others, so much so that it quickly climbs on poles or trellises in the same manner as pole beans. It is worthy of a trial in your garden.

329. Snake Cucumber—A remarkable and very interesting curiosity. The cucumbers grow curled up like a

snake with the heads protruding and are sometimes four or five feet in length.

325. Cool and Crisp—A fine variety.

300. Early Russian—Early and productive.

312. Long Green—The standard variety.

310. Early Short Green or Early Frame.

307. Early Cluster—The most popular sort.

318. Boston Pickling—Fine for pickling.

304. Bismark White Spine—Fine quality.

305. Giant Pera—Selected strain.

306. White Wonder—Pure white skin.

308. Chicago Pickling—The true strain.

Price of any of the above varieties: Pkt. 5c, oz. 20c.

Onions.

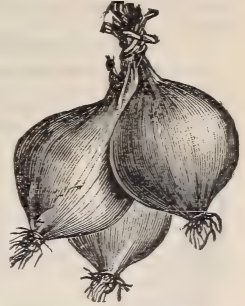

One ounce will sow 100 feet of drill, four to five lbs. to the acre. Pkts. contain from 1,000 to 1,500 seeds.

THREE SOUTHPORT GLOBE ONIONS.

503. **Southport Red Globe**—This variety produces large, perfectly globe shaped onions, of the same size and handsome form as the other two varieties of Southport Onions here listed. Color rich, deep red, and it always commands the highest market price and is a most excellent variety. Pkt. 5c, oz. 15c, 2 ozs. 25c, $\frac{1}{4}$ lb. 40c, lb. \$1.60.

515. **Southport White Globe**—A very handsome, silvery white, perfectly ball shaped onion, of large size and commands the highest price in all the markets. Flesh firm, fine grained, mild flavor and an excellent keeper. It is one of the handsomest Onions grown. Owing to its large size, it is a little later in ripening than some of the other white varieties. Pkt. 5c, oz. 15c, 2 ozs. 25c, $\frac{1}{4}$ lb. 50c, lb. \$1.90.

506. **Southport Yellow Globe**—This is similar in form and size to the White Globe, but has a pale straw yellow skin; the bulbs are larger in size and more perfectly globe shaped than the Globe Danvers, but a little later in ripening. Is a most excellent cropper, and owing to its handsome appearance and delightful flavor, is a splendid market variety. Price same as Southport Red Globe.

STANDARD VARIETIES.

511. **Early Yellow Cracker**—This is the earliest of all yellow varieties. It is of very fine quality, but has to be harvested as soon as ripe and handled carefully. Pkt. 5c, oz. 15c, 2 ozs. 25c, $\frac{1}{4}$ lb. 45c, lb. \$1.50.

512. **Extra Early Barietta**—Also sometimes called Earliest White Queen or Improved Early White Queen. It is the earliest Onion in cultivation. The small pure white bulbs average about an inch in thickness and are very mild and delightful in flavor. Pkt. 5c, oz. 20c, 2 ozs. 35c, $\frac{1}{4}$ lb. 60c, lb. \$2.25.

502. **Extra Early Red**—Also called Extra Early Red Globe. The first to ripen and one of the handsomest of the red varieties. Medium size, abundant producer, fruit uniform in shape and size, and comes into use nearly two weeks earlier than the Large Red Wethersfield. Very desirable for winter use. Pkt. 5c, oz. 12c, $\frac{1}{4}$ lb. 40c, lb. \$1.50.

505. **Red Wethersfield**—This is the standard red variety and a favorite Onion wherever grown. Immense crops of this variety are grown in the East, both for home market and for shipping. Very productive, an excellent keeper and the most popular Onion for general cultivation. Pkt. 5c, oz. 12c, $\frac{1}{4}$ lb. 40c, lb. \$1.50.

509. **Prize Taker**—Also sometimes called Mammoth White Spanish. It is a very handsome Onion of extremely large size, nearly globular in form, skin yellowish brown, flesh white, mild and tender. Owing to the tender quality of the flesh, its bulbs do not keep as well after cold weather sets in and the crop should be marketed as soon after harvesting as possible. Pkt. 5c, oz. 15c, 2 oz. 25c, $\frac{1}{4}$ lb. 40c, lb. \$1.40.

510. **Australian Brown**—Although a new variety, having been on the market but five or six years, this Onion has gained great favor in localities where an extra early onion is required. It, therefore, is popular with the private gardener, as well as the market gardener and large grower of onions. It is of medium size, hard, solid and the skin a clear, amber brown, distinct from that of any other variety. Pkt. 5c, oz. 12c, $\frac{1}{4}$ lb. 40c, lb. \$1.25.

532. **Michigan Yellow Globe**—This variety is, also, sometimes called Ohio Yellow Globe. We consider this va-

riety a particularly fine strain of the Yellow Globe Danvers. By careful selection and growing a strain has been produced which averages better than the Yellow Globe Danvers, but we do not consider it equal to the Southport Yellow Globe. The onions are globe shaped, uniformly thin necked, slightly flattened at the base. It produces extremely large crops and is a splendid keeper. We believe there is no better variety for the Onion grower than this variety. Same price as No. 513.

521. **Page's Perfection**—This is a very fine quality of Onion. The bulbs are large, spherical, with small necks; skin orange yellow. It is a most abundant yielder and the best of keepers. Our seed is fine and we desire every one of our customers to try this variety. Pkt. 5c, oz. 12c, $\frac{1}{4}$ lb. 40c, lb. \$1.50.

531. **White Silverskin**—This variety grows very rapidly. Bulbs small size, white and especially valuable for bunching or pickling. Pkt. 5c, oz. 15c, 2 oz. 25c, $\frac{1}{4}$ lb. 50c, lb. \$2.00.

513. **Yellow Globe Danvers**—The ideal Danver Onion was originally oval or nearly flat and it has been thought by many that its small neck and splendid ripening habit could not be obtained in Onions of that shape, but it has, by careful selection and breeding, developed a strain, having to a remarkable degree the ripening habit and small neck of the original Danver and yet decidedly globular in form, thus giving larger yield and handsomer bulbs, without sacrificing any of the good qualities of the most popular Yellow Onions. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 35c, lb. \$1.25. By freight or express, lb. \$1.15, 5 lbs or more at \$1.00 per lb, 10 lbs. or more at 90c per lb.

535. **Round White Silverskin**—This is uniformly early, small, round and handsome, with an opaque skin which does not turn green on exposure to the sun. They are also very compact and hard, also, crisp and brittle, making them the best pickling Onion. Pkt. 5c, oz. 15c, $\frac{1}{4}$ lb. 50c, lb. \$1.75.

ITALIAN ONIONS.

533. **Queen**—Pkt. 5c, oz. 15c, $\frac{1}{4}$ lb. 60, lb. \$2.00.

540. **Giant Rocca**—Pkt. 5c, oz. 15c, $\frac{1}{4}$ lb. 50c, lb. \$1.75.

ONION SETS—See next page.

Water Melons.

One oz. will plant 25 hills. Pkt. contains from 50 to 150 seeds, according to variety.

401. **Early Triumph**—Large, fine quality.

402. **Santiago**—Deep red, very sweet.

403. **Perfection**—Solid, tender, and sweet.

404. **Sweet Heart**—Flesh bright red, very sweet.

405. **Fordhook Early**—Very early.

406. **Peerless**—Very early and of fine flavor.

407. **Cuban Queen**—Early, solid, and large.

408. **Mountain Sweet**—An old standard sort.

409. **Dixie**—A popular variety of good quality.

410. **McIver's Sugar Melon**—Good quality.

412. **Burpee's Mammoth Ironclad**.

415. **The Boss**—Oblong, flesh deep scarlet.

420. **Citron**—For preserves and pickles only.

Prices of any of the above varieties, pkt. 5c, oz. 10c, 3 ozs. 25c, $\frac{1}{2}$ lb. 40c.

Musk Melons.

One ounce will plant from 50 to 60 hills. Pkt. contains from 200 to 300 seeds, according to variety. Seed very scarce this season.

*430 **Rocky Ford**—The popular variety.

431. **Emerald Gem**—Very fine flavor.

*435 **Netted Gem**—Extra early, small size.

438 **Extra Early Hackensack**—Small size.

442. **Montreal Green Nutmeg**—Fine flavor.

447. **Jenny Lind**—The old popular melon.

*448 **McCotter's Pride**—Very popular variety.

*449 **New Paul Rose**—Very fine quality.

Price of any of the above varieties, pkt. 5c; varieties marked with * oz. 15c, $\frac{1}{4}$ lb. 50c, $\frac{1}{2}$ lb. 85c. Other varieties oz. 20c, $\frac{1}{4}$ lb. 75c, $\frac{1}{2}$ lb. \$1.25.

Okra.

480. **White Velvet**—Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 20c, $\frac{1}{2}$ lb. 35c, lb. 70c.

ONION SETS.

Although it is much cheaper to grow Onions from seed than from sets, yet many do not wish to bother to sow the seed or wish a small quantity of Onions much earlier in the season and to such as these we offer choice Eastern grown sets.

553. **Yellow Onion Sets**—Pint 15c, qt. 25c, prepaid.

555. **White Onion Sets**—Pint 20c, qt. 30c, prepaid.

By express or freight, at the expense of the purchaser, Yellow Sets, qt. 15c, 2 qts. 30c, 4 qts. 50c, bu. \$3 50. White Sets, qt. 20c, 2 qts. 35c, 4 qts. 60c, bu. \$4 00.

Parsnips.

One oz. will sow 100 feet of drill, five to six lbs. to the acre.

571. **Hollow Crown or Guerney**—Roots shorter than the long white Dutch, with a very smooth, clear skin. The variety is easily distinguished by the leaves rising from a depression on the top of the crown of the root. Pkt. 4c, 3 pkts. 10c, 2 ozs. 15c, $\frac{1}{4}$ lb. 20c, $\frac{1}{2}$ lb. 30c, lb. 40c.

572. **Long White Dutch or Sugar**—Roots very long, white, smooth, tender and of most excellent flavor. Hardy, will keep through the winter in the open ground. Pkt. 4c, 3 pkts. 10c, 2 ozs. 15c, $\frac{1}{4}$ lb. 20c, $\frac{1}{2}$ lb. 30c, lb. 40c.

Parsley.

One oz. will sow about 150 feet of drill. Pkt. contains from 2,000 to 3,000 seeds.

560. **Champion Moss Curled**—A compact growing, finely cut and much curled variety of bright green color. Owing to its fine color and density of foliage, it is much sought after. Pkt. 4c, 3 pkts. 10c, 2 ozs. 15c, $\frac{1}{4}$ lb. 25c.

561. **Fine Triple Curled**—Also called Myatt's Garnishing. A fine, free growing but not large variety. Highly prized for garnishing and table decorations. Pkt. 4c, 3 pkts. 10c, 2 ozs. 15c, $\frac{1}{4}$ lb. 20c, lb. 60c.

565. **Carter's Fern-Leaved**—The leaves are finely cut and give the plant a feathery, fern-like appearance. Makes a handsome border plant. Pkt. 4c, 3 pkts. 10c, 2 ozs. 15c, $\frac{1}{4}$ lb. 25c.

Peas.

Notice wholesale prices at end of peas.

One quart will plant from 50 to 60 feet of drill, two bu. per acre. Pkts. contain from two to four ounces of seed according to the variety. The star before the name denotes wrinkled varieties. Notice special prices quoted at the end of the list. Prices here quoted are prepaid.

*579. **Page's New Wonderful**—Although almost every seedsman has a variety of Peas which he claims to be earlier than any other variety, yet we know there is no variety of wrinkled Pea that is any earlier than the New Wonderful. By actual trial we have grown pods ready for picking in forty days from time of sowing seed. We know, by trial, that there is no variety that surpasses this in earliness, quality or productiveness. Pkt. 10c, 3 pkts. 25c, pt. 30c, qt. 50c.

580. **First of All**—A very fine, extra early Pea. Peas very sweet, tender and well flavored. Pkt. 10c, 3 pkts. 25c, pt. 20c, qt. 35c.

*582. **Gradus**—This variety is also called Prosperity and is being catalogued under various names by different seedsman, as the earliest wrinkled Pea grown. It certainly is an extra early, wrinkled variety, producing large pods, well filled with large, tender sweet Peas and certainly is worthy of a trial in every garden. Market gardeners should not fail to sow a liberal quantity. Pkt. 10c, 3 pkts. 25c, pt. 30c, qt. 50c.

585. **Earliest of All or Alaska**—The stock which we offer has been carefully developed and is one of the finest early smooth Peas. Vines $2\frac{1}{2}$ feet high, bearing from four to seven long pods, which are well filled with medium sized, bright green Peas, of excellent flavor. Pkt. 10c, 3 pkts. 25c, pt. 20c, qt. 35c.

586. **Carter's Lightning**—This is a very early Pea, bearing in great profusion, long, well filled pods, containing peas of a light green color, well flavored, sweet and of

good size. The vines are completely covered with peas early in the season. About two feet high. Pkt. 10c, 3 pkts. 25c, pt. 20c, qt. 35c.

*587. **Nott's Excelsior**—This variety is one of the best of recent introduction. The vines are a little larger, more vigorous and productive than the American Wonder. Pods are always well filled with Peas and they are very tender, sweet and fine flavored. Pkt. 10c, 3 pkts. 25c, pt. 25c, qt. 40c.

588. **Maid S**—We consider this to be the same as our number 580 variety, First of All, and the price is the same as that variety.

*589. **American Wonder**—Vines grow only about nine inches high. Pods well filled, containing seven or eight exceedingly tender, sweet and well flavored peas. Nearly as early as Nott's Excelsior. Pkt. 10c, 3 pkts. 25c, pt. 25c, qt. 40c.

*590. **Extra Early Premium Gem**—Another very early variety. Vines are larger than American Wonder, growing from 12 to 18 inches high and bearing an immense crop of well filled pods. Peas tender and sweet. Pkt. 10c, 3 pkts. 25c, pt. 20c, qt. 35c.

*591. **McLean's Little Gem**—A very desirable early, dwarf, green, wrinkled variety, growing 15 inches high. When green the peas are very large, sweet and of a delicious flavor. Pkt. 10c, 3 pkts. 25c, pt. 20c, qt. 35c.

*592. **Laxton's Improved Alpha**—Another early wrinkled Pea, almost as early as the American Wonder; vines three feet in height, bearing five to ten medium sized pods, which contain four to eight medium sized peas which are exceedingly sweet and tender. Pkt. 10c, 3 pkts. 25c, pt. 20c, qt. 35c.

SECOND EARLY VARIETIES.

*593. **Dwarf Champion**—This is an extra choice new variety and a great improvement on the old Champion of England. Grows only about $2\frac{1}{2}$ feet high. The vines are vigorous, producing a great abundance of large pods, well filled with large sized peas of excellent quality. This dwarf variety of Champion is medium early, coming in some time before the tall Champion. It certainly is worthy of a trial. Pkt. 10c, 3 pkts. 25c, pt. 20c, qt. 35c.

*594. **Bliss Everbearing**—This well-known variety is a favorite with everyone who has ever given it a trial. The vines are about 18 inches high, bearing an abundance of well filled pods. If the pods are kept well picked the vines will continue to bear for a long time. Pkt. 10c, 3 pkts. 25c, pt. 20c, qt. 35c.

*595. **Heroine**—A green, wrinkled variety, growing $2\frac{1}{2}$ feet high and bearing a profusion of large pointed pods, often containing eight or nine peas each and of the finest flavor. Pkt. 10c, 3 pkts. 25c, pt. 20c, qt. 35c.

SECOND EARLY VARIETIES. (Continued.)

*597. **McLean's Advancer**—Another very well known and popular variety; grows about 2½ feet high, with broad, long pods, which are abundantly produced and well filled to the end. It is considered by many growers the best of the second early sorts. Pkt. 10c, 3 pkts. 25c, pt. 20c, qt. 35c.

*598. **Telephone**—Too much cannot be said in praise of this variety of Pea. It is immensely productive and of the finest quality. Vines are strong, producing extremely large sized pods, filled with seven or eight large delicious peas. Height of vines four to five feet. Especially valuable for market gardeners or for those who pick the green pods for the market trade or for canning. In the market it always fetches the highest market price. Pkt. 10c, 3 pkts. 25c, pt. 25c, qt. 40c.

*607. **Shropshire Hero**—Considered by many to be fully equal to any of the late varieties and even preferred by some growers. The pods are long, handsome, well filled and produced in great abundance. Pkt. 10c, 3 pkts. 25c, pt. 20c, qt. 35c.

LATE OR MAIN CROP VARIETIES.

*600. **Improved Stratagem**—One of the best of the

recently introduced English Peas. A dwarf, wrinkled, blue marrow; heavy cropper, bearing very large, well filled pods. Pkt. 10c, 3 pkts. 25c, pt. 20c, qt. 35c.

*606. **Champion of England**—This variety is probably the most popular Pea grown. It is of delicious flavor, an abundant producer and, for a late variety, it certainly has no equal. Pkt. 8c, 2 pkts. 15c, pt. 18c, qt. 30c.

*608. **Yorkshire Hero** A splendid wrinkled Pea, suitable for the market or for the kitchen garden. Very productive and the Peas are of excellent flavor. Pkt. 10c, 3 pkts. 25c, pt. 20c, qt. 35c.

FIELD PEAS.

Field peas are largely for sowing broadcast in the field. Not only used for feeding purposes, but for turning under for fertilizer.

603. **Large White Marrowfat**—Pkt. 8c, 2 pkts. 15c, pt. 15c, qt. 25c.

605. **Large Black-Eyed Marrowfat**—Pkt. 8c, 2 pkts. 15c, pt. 15c, qt. 25c.

612. **Canada Field Peas**—Pt. 15c, qt. 25c.

SPECIAL PRICES.

The special prices on this list on Peas are to be sent by express or freight, the purchaser to pay the charges. Bags or sacks furnished without charge. Prices subject to market changes.

Pepper.

One oz. will produce about 2,000 plants. Pkt. contains from 500 to 800 seeds.

623. **Ruby King**—A well-known variety, equaled by none of the new varieties in size, beauty or mildness. Peppers grow from four to six inches long and are remarkably mild and pleasant to the taste. Pkt. 5c.

625. **Bell or Bull Nose**—An old and well-known variety and used more than any other sort. Pkt. 5c, oz. 15c.

627. **Sweet Mountain**—In many respects similar to No. 625. Flesh thick, sweet and mild flavored. Six to eight inches long. Pkt. 5c, oz. 15c.

629. **Red Cluster**—The plants of this variety are so ornamental as to almost deserve a place in the flower garden. A single plant will bear hundreds of the handsome little peppers, crowded together in bunches at the top of each branch. Fruit very hot and pungent in flavor. Pkt. 5c, oz. 20c.

630. **Yellow Chili**. Similar in many respects to the red variety, but a little shorter and thicker; more pungent and of a beautiful color. Pkt. 8c.

Pumpkin.

One oz. will plant 20 to 25 hills; three to four lbs. per acre. Pkts. contain from 30 to 80 seeds, according to the variety. Crop almost a failure, seed very scarce.

631. **Large Yellow**—The common field variety, sometimes called Connecticut Field; it is largely used for feeding stock, also, by many for cooking purposes. Pkt. 5c, 3 pkts. 10c, ¼ lb. 25c, lb. 40c. By express or freight, at the expense of the purchaser, 5 lbs. or more at 30c. per lb, 10 lbs. or more at 27½c. per lb.

632. **Golden Oblong**—A very fine, new and productive variety, growing oblong to the length of 16 to 18 inches and 7 to 8 inches in diameter. The outside skin is deep green when young, changing to a deep golden color as it ripens. Flesh rich yellow, very sweet, and is considered one of the best for pumpkin pies. Pkt. 5c, oz. 10c.

635. **Quaker Pie**—Round or oval shape and tapering at both ends, of cream color both inside and out; flesh fine grained and of a rich flavor; largely used for cooking. Pkt. 5c, oz. 10c, ¼ lb. 25c, ½ lb. 40c, lb. 75c.

636. **Genuine Mammoth**—This variety is known under several names, as "King of the Mammoths," "Large Mammoth," "Jumbo," etc. It grows to an enormous size, often weighing 100 to 200 lbs. Flesh bright yellow, fine grained, fairly good quality. Pkt. 5c, oz. 12c, ¼ lb. 35c.

Radishes.

One oz. will sow about 75 feet of drill. Pkt. contains from 1,000 to 1,500 seeds.

641. Early Scarlet Turnip, White Tipped—A very early, handsome variety, deep scarlet with white tips; flesh white, crisp and sweet. Pkt. 5c, oz. 10c, $\frac{1}{2}$ lb. 20c, $\frac{1}{2}$ lb. 35c, lb. 60c.

642. Burpee's Earliest—Or, as it is sometimes called, Scarlet Button. This is an extra early variety, often producing radishes large enough to eat within 20 days after sowing. Skin bright scarlet, flesh pure white, crisp, tender and mild in flavor. Pkt. 5c, oz. 10c, $\frac{1}{2}$ lb. 20c, $\frac{1}{2}$ lb. 35c, lb. 60c.

645. French Breakfast—A medium-sized radish, olive shaped, of quick growth; very crisp and tender; of a beautiful scarlet color, except near the tip, which is pure white. Pkt. 5c, oz. 10c, $\frac{1}{2}$ lb. 20c, $\frac{1}{2}$ lb. 35c, lb. 60c.

650. Early White, Turnip-Rooted—A pure white variety of excellent flavor. It has a very small top, semi-transparent flesh, and is a little later than the Scarlet Turnip, but will stand more heat and remain longer in good condition. Pkt. 5c, oz. 10c, $\frac{1}{2}$ lb. 20c, $\frac{1}{2}$ lb. 35c, lb. 60c.

651. Early Long Scarlet, Short Top Improved—This is a standard variety for private gardens or for market use, particularly for out-of-door culture. Grows about six inches long, grows half out of the ground and remains brittle and tender until July. Bright red in color. Pkt. 5c, oz. 10c, $\frac{1}{2}$ lb. 20c, $\frac{1}{2}$ lb. 30c, lb. 50c.

COPYRIGHTED 1889
BY A. BLANC.

OTHER WELL-KNOWN VARIETIES.

640. Non Plus Ultra or Early Deep Scarlet Turnip.

644. Extra Early Scarlet Turnip-Rooted.

646. Chartier or Shepherd.

647. Long Bright Scarlet, White Tipped.

Any of the above varieties, pkt. 5c, oz. 8c, $\frac{1}{4}$ lb. 20c, $\frac{1}{2}$ lb. 30c, lb. 55c.

648. Early Scarlet Globe.

649. Half Long, Olive Shaped.

652. Vick's Scarlet Globe.

653. Wood's Early Frame.

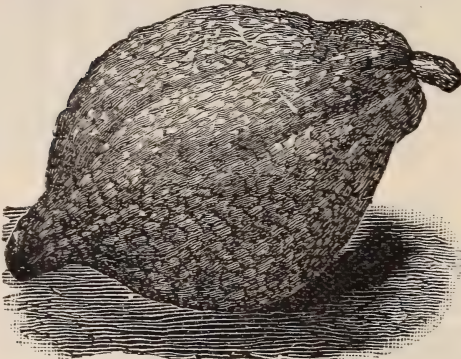

654. Scarlet China.

657. Long Black Spanish.

Squash.

One oz. of the small seeded varieties will plant from 30 to 60 hills. Pkt. contains from 75 to 150 seeds.

HUBBARD SQUASH.

SUMMER VARIETIES.

703. Mammoth White Bush Scallop—Of a light green color, very productive and one of the earliest to mature. Planters can rely on our seed to produce the true White Scallop. Pkt. 4c, 3 pkts. 10c, 2 ozs. 15c, $\frac{1}{4}$ lb. 20c, lb. 60c.

706. Early White Bush Scallop—Very similar to the Yellow Bush Scallop, but with more tender and delicious flesh. It is, therefore, preferred. The skin is clear white. Pkt. 4c, 3 pkts. 10c, 2 ozs. 15c, $\frac{1}{2}$ lb. 35c, lb. 60c.

707. White Summer Crookneck—A handsome variety of recent introduction and one that will soon become very popular. The fruit is similar in size and shape to the Summer Crookneck, but ivory white in color. Pkt. 5c, oz. 10c, 2 ozs. 15c, $\frac{1}{2}$ lb. 40c, lb. 75c.

708. Mammoth Summer Crookneck—By many growers this is considered the best Summer Squash grown, for the following reasons: It is twice as large as the ordinary Crookneck, finer quality and earlier. It is a most desirable squash for the private gardener or for the market. Pkt. 4c, 3 pkts. 10c, 2 ozs. 15c, $\frac{1}{2}$ lb. 35c, lb. 60c.

709. Summer Crookneck—The old, standard kind, early and very productive. Squash about one foot long with crooked neck and covered with warty excrescences. Color bright yellow. Pkt. 4c, 3 pkts. 10c, 2 ozs. 15c, $\frac{1}{2}$ lb. 35c, lb. 60c.

WINTER VARIETIES.

The Three Hubbards.

Below we offer three fine strains of the well known Hubbard Squash.

715. Hubbard—The well known, standard variety of winter squash, is so well known by everyone that it does not need an extended description from us. We have the true Hubbard seed. Pkt. 4c, 3 pkts. 10c, $\frac{1}{4}$ lb. 30c, $\frac{1}{2}$ lb. 50c, lb. \$1.00.

714. New Golden Hubbard—A true Hubbard Squash, identically the same as the standard Hubbard, except in color, which is bright red. It cannot fail to be popular and is especially good as a market sort. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c, $\frac{1}{2}$ lb. 45c, lb. 90c.

717. Chicago Warty Hubbard—An especially fine strain of the popular, well known, Winter Hubbard Squash. Fruit is large, uniform in size, with rich, dark skin. Color of both skin and flesh is darker than the standard varieties. This variety has become very popular in some sections. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c, $\frac{1}{2}$ lb. 50c, lb. 90c.

OTHER VARIETIES.

712. Boston Marrow—A fall and winter variety, very popular in the New England States; of oval form, skin thin; when ripe bright orange mottled with light green color. Flesh rich, fine grained, sweet and a good keeper. Pkt. 4c, 3 pkts. 10c, $\frac{1}{4}$ lb. 20c, $\frac{1}{2}$ lb. 40c, lb. 75c.

713. Sibley or Pike's Peak—An excellent winter variety. Matures its crop so evenly that nearly the whole crop may be gathered at one picking. Excellent for baking. Weight, eight to twelve pounds. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 30c, lb. 75c.

716. Fordhook—A comparatively new Squash and one that has gained in favor in many sections. The skin is so thin and delicate that they are prepared for the table by simply cutting in half, lengthwise and cooking skin and all. Another feature is that the green squashes can be used in any stage of their growth. Pkt. 5c, oz. 7c, $\frac{1}{4}$ lb. 25c, $\frac{1}{2}$ lb. 50c, lb. 90c.

718. The Jumbo Squash—A remarkably large squash of a rich yellow orange color. Squashes of this variety have been raised that have been of immense size, often weighing 200 to 300 lbs. Flesh is very thick and of a rich, yellow color; quality is good and will keep through the entire winter. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 35c.

Salsify.

One oz. will sow 50 feet of drill. Pkt. contains from 400 to 450 seeds. We list the only two varieties that are worthy of cultivation.

662. **Large White**—The common variety. Roots medium size, smooth; flesh white. Pkt. 4c, 3 pkts. 10c, 2 ozs. 15c, $\frac{1}{2}$ lb. 50c, lb. 90c.

675. **Mammoth Sandwich Island**—This is, in every way, superior to the Large White, being larger, stronger growing and less liable to branch. Invaluable to the market gardeners. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 30c, $\frac{1}{2}$ lb. 60c, lb. \$1.00.

Rape. See under Farm Seeds.

Spinach.

One oz. will sow 50 feet of drill; 12 to 14 lbs. 4 to the acre. Pkt. contains from 700 to 800 seeds.

Sunflower.

721. **Large Russian**—Grows very tall, has large heads and much larger seeds than the ordinary sort. This variety will yield from 900 to 1,200 lbs. per acre. Excellent for poultry or for oil. Pkt. 3c, oz. 5c, $\frac{1}{4}$ lb. 20c, lb. 30c, prepaid. By express or freight, at the expense of the purchaser, 10c. per lb., 25 lbs. or more at 7c. per lb. Special prices in larger quantity.

Tobacco.

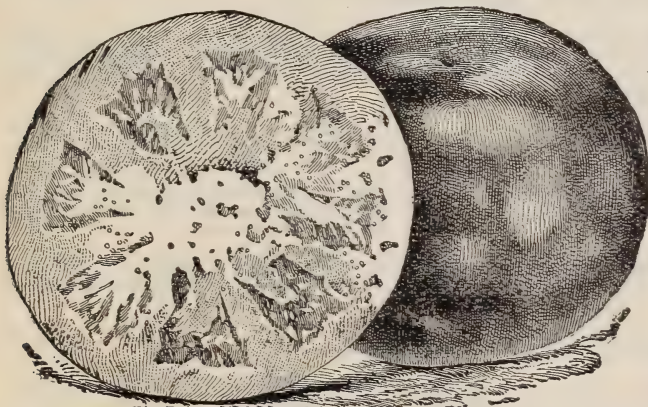

Pkt. contains over 25,000 seeds.

From the many varieties of Tobacco we have selected the two which we think the most desirable for the average grower to use. Many varieties offered by some seedsmen are of no practical value in the United States, for the seasons are not adapted to their development.

730. **Havana**—Pkt. 5c, oz. 35c, $\frac{1}{4}$ lb. \$1.00.

731. **Connecticut Seed Leaf**—Pkt. 5c, oz. 15c, $\frac{1}{4}$ lb. 50c.

Tomatoes. One oz. will produce from 2,000 to 3,000 plants. Pkts. contain about 1,000 seeds.

738. **Early Michigan**—It is safe to say that among the hundreds of varieties of Tomatoes that there is no better variety for general use than the Early Michigan. For smoothness, regularity of shape, uniformity of size, color, freedom from rot and cracking, this variety is unsurpassed. Vines are large, vigorous and wonderfully productive, bearing large sized fruit, which is perfectly smooth, solid and a deep, rich red color and of excellent flavor. Pkt. 10c, oz. 20c, 2 oz. 35c.

739. **Improved Trophy**—Well known, popular, old variety which is largely used in many sections. On account of its handsome red color, uniform size, great productiveness it holds its place against many of the much lauded new varieties. Pkt. 7c, oz. 20c, 2 ozs. 35c, $\frac{1}{2}$ lb. \$1.25, lb. \$2.25.

742. **Atlantic Prize**—This is an extra early variety and is entirely different from many of the other extra early varieties, in that the fruit of the Atlantic Prize is uniformly of good size, shape, color and quality to pronounce it the largest, smoothest, best flavored, brightest colored red, extra early Tomato grown. Pkt. 7c, oz. 20c, $\frac{1}{4}$ lb. 75c.

743. **Dwarf Aristocrat**—Very popular and now well known variety, although of very recent introduction. The vine is self-supporting and forms a compact bush, producing an abundance of rich red, perfectly smooth fruit, which is of the very best quality. We consider this variety one of the best for the private garden. Pkt. 7c, oz. 25c, 2 oz. 40c.

745. **Ponderosa**—This monstrous Tomato, largely advertised, is described by the introducer as follows: "It is all solid meat, so free from seeds that we have to pay our growers five times as much to raise the seed of this as of the ordinary sort. It is a very handsome variety, being uniformly large and smooth, of a deep rich crimson color and a delicious, sub-acid flavor. To show the enormous size of this great Tomato, we would state that twelve specimens weighed $16\frac{1}{2}$ lbs., an average weight of one lb. and 6 ozs. each; one monster tipped the scales at 1 lb. 14 ozs." Pkt. 10c, 3 pkts. 25c.

737. **Crimson Cushion**—A handsome round Tomato, color bright scarlet, firm flesh, almost seedless and of excellent quality. One of the earliest large Tomatoes and very productive. Pkt. 5c, oz. 20c, $\frac{1}{4}$ lb. 75c.

749. **Golden Queen**—Large golden yellow, solid, smooth and of rich delicate flavor; matures early. Pkt. 5c, oz. 25c, $\frac{1}{4}$ lb. 80c.

OTHER STANDARD TOMATOES.

740. **Honor Bright Tomato**—Ripens from center outward.

741. **The Enormous Tomato**—Extra large and fine quality.

744. **The Matchless**—Rich cardinal red.

746. **Perfection**—Bright red.

747. **Stone**—Color deep red, fruit apple shaped.

748. **Royal Red**—Fruit large; bright red.

Prices of above varieties, pkt. 5c, oz. 20c.

A garden is not complete without a Strawberry bed. They are but little trouble, and how pleasing and satisfactory it is to go out and pick the large, luscious, red fruit. A choice variety of plants listed on another page.

DO NOT FORGET TO ORDER SOME SMALL FRUITS OR FRUIT TREES.

Turnip.

One oz. will sow about 150 feet of drill; one lb. per acre, broadcast. Pkt. contains 400 to 500 seeds.

751. Extra Early Purple Top Milan—This variety is at least two weeks earlier than any other variety. It is of a handsome appearance, somewhat flattened; white with purple top. Flesh snow white, fine grained and of excellent flavor. Pkt. 5c, oz. 10c, 2 oz. 15c, $\frac{1}{4}$ lb. 25c, lb. 75c.

753. Purple Top White Globe—A variety of the Purple Top Flat Turnip from which it originated. It is globular in form and nearly as large as the Pomeranian White Globe; of beautiful appearance and of most excellent quality; equally desirable for table or stock. It keeps well and is a fine market sort. Pkt. 4c, 3 pkts. 10c, 2 ozs. 15c, $\frac{1}{4}$ lb. 20c, lb. 50c.

754. Early White Flat Dutch, Strap Leaved—A most excellent garden variety and very largely used in the South. Roots medium sized, flat, color white, sweet and tender. It is desirable for table use, but inferior when overgrown. Pkt. 4c, 3 pkts. 10c, 2 ozs. 15c, $\frac{1}{4}$ lb. 20c, lb. 50c.

757. White Egg—A quick growing, egg shaped, smooth, pure white variety. Very solid, fine grain; flesh of sweet, mild flavor. It grows to good size and is excellent either as an early or late variety. Pkt. 4c, 3 pkts. 10c, 2 ozs. 15c, $\frac{1}{4}$ lb. 20c, lb. 60c.

758. Early Purple Top Strap Leaved—More generally used than any other variety. It is a quick grower, fine grain, sweet flavor, medium size, very flat, leaves few, entire and upright in growth. Pkt. 4c, 3 pkts. 10c, 3 ozs. 15c, $\frac{1}{2}$ lb. 25c, lb. 40c.

Five lbs. or over by express or freight, at the expense of the purchaser, 25c. per lb.

759. Sweet German—This variety is very popular in many sections, notably so in New England. It partakes largely of the nature of the Ruta Baga and should be sown a month earlier than the flat turnips. The flesh is white, hard, firm and sweet, and keeps nearly as well as the Ruta Baga. Highly recommended for winter and spring use. Pkt. 4c, 3 pkts. 25c, 2 ozs. 15c, $\frac{1}{4}$ lb. 20c, lb. 45c. Five lbs. or more by express or freight, at the expense of the purchaser, 30c. per lb.

760. Long White Cow Horn—Roots long, growing half above ground; flesh firm, white and sweet, largely used for table, also for stock feeding. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 20c, lb. 50c.

RUTA BAGA OR SWEDES.

781. Monarch Tankard or Elephant—This is a yellow fleshed variety, having very large roots. Color purplish-crimson above ground, yellow below. Flesh very solid, fine grained and of the best flavor. Also sold under the name of Hearts Monarch, Carter's Elephant, etc. Pkt. 4c, 3 pkts. 10c, 3 ozs. 15c, $\frac{1}{2}$ lb. 30c, lb. 50c. Three lbs. or more by express or freight, at the expense of the purchaser, 30c. per lb.

783. Sweet Russian or White Swede—This variety is an excellent keeper and very desirable either for the table or for stock. It grows to a very large size; flesh white, solid and of a firm texture; sweet and rich. Pkt. 4c, 3 pkts. 10c, 3 ozs. 15c, $\frac{1}{2}$ lb. 30c, lb. 50c. Five pounds or more by express or freight, at the expense of the purchaser, 30c. per lb.

784. West Norfolk—Considered by many to be the very best variety of Ruta Baga Turnip grown for table use. Shape is oblong, color reddish purple above ground but yellow underneath. Hardier than the common turnip and will keep solid until spring. Flesh white. Pkt. 5c, 6 pkts. 25c, 3 ozs. 15c, $\frac{1}{4}$ lb. 20c, $\frac{1}{2}$ lb. 30c, lb. 50c.

785. Improved American Purple Top—This strain is of American origin, bred to a smaller top and short neck. Bulbs are of great size, yellow fleshed and purple crown; one of the most desirable varieties. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 20c, lb. 50c.

YELLOW FLESHED VARIETIES.

766. Yellow Stone—A splendid variety, of which the roots are perfectly round and smooth. The skin and flesh are both bright yellow. Pkt. 4c, 3 pkts. 10c, 2 ozs. 15c, $\frac{1}{4}$ lb. 20c, lb. 45c.

767. Purple Top Yellow Aberdeen—Of round form, yellow flesh of fine texture; nutritious and a good keeper. Pkt. 4c, 3 pkts. 10c, 3 ozs. 15c, $\frac{1}{2}$ lb. 25c, lb. 40c.

768. Yellow Globe—A popular variety; fine for table use. Flesh firm, tender, sweet, and fine flavored. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 20c, lb. 60c.

769. Amber Globe—Excellent for table or stock; flesh yellow, firm and sweet. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 20c, lb. 50c.

770. Golden Ball—One of the sweetest and most delicate yellow fleshed varieties; medium sized, perfect globe shape, firm, hard, rich and sweet; it has no equal in the yellow flesh varieties for table use, and excellent keeper. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 20c, lb. 60c.

Aromatic, Medical and Pot Herbs.

The following varieties are the ones most used. However, if any of our customers wish any of the varieties not here listed, we will be pleased to fill their order at the same prices as quoted by any other reliable seed firm. Most of these varieties should be cut when in blow, wilted in the sun and thoroughly dried in the shade. Those marked with a * are perennial, and when once obtained in a garden may be preserved for years.

ANISE—Pkt. 5c, oz. 10c.

BALM—Pkt. 5c, oz. 25c.

BASIL—Sweet—Pkt. 5c, oz. 15c.

CORIANDER SEED—Pkt. 5c, oz. 15c.

* **LAVENDER**—Pkt. 5c, oz. 15c.

SAGE—Pkt. 5c, oz. 15c.

THYME—Pkt. 5c, oz. 20c.

* **WORMWOOD**—Pkt. 5c, oz. 15c.

FIELD CORN

All Farm Seed quoted by the pk., bu., bag or larger quantities, are sent by freight or express at expense of purchaser. Bags furnished free.

Early Mastodon—This early variety of Field Early Dent Corn is catalogued by various dealers under several names. The name which we give is the correct name and we do not tack it to our name or anyone else's. It is much earlier than Leaming or Pride of the North and will outyield any other early Dent corn grown. It produces extremely large ears, large grains, ripening in from 96 to 100 days. It has produced in New York State over 200 bu. of shelled corn to the acre. We consider it one of the very best Field Corns grown. Lb. 25c, 3 lbs. 60c, postpaid. Pk. 50c, bu. \$1.75, 2 bu. \$3.25, 10 bu. or more at \$1.50 per bu.

Extra Early Huron—The earliest Dent Corn in existence. It can be grown in Northern localities where heretofore only Flint varieties have been grown. It has been grown largely in St. Lawrence County, New York State, which is the most northern county in the State. It is of bright yellow color, with good sized stalks, yielding more than the red cob varieties. Lb. 25c, 3 lbs. 60c, postpaid. Pk. 50c, bu. \$1.75, 2 bu. \$3.25, 10 bu. or more at \$1.50 per bu.

Page's Cuban Giant Ensilage—The increased demand for Ensilage Corn each year has led growers to test various corns, and this variety has been found to be the best yet on the market. The quality is fine, growth extremely large with two to three ears on the stalk, the grains are pure white, large and of stronger vitality than almost any other varieties. It will outyield the red ensilage corn and it is much more valuable because it is from 10 to 12 days earlier. It is considered by corn experts to be the most perfect ensilage corn now known. In one of our fields measurement was taken of the height, and the entire field would average between 14 and 15 feet high, many stalks being still higher than this. Lb. 25c, 3 lbs. 60c, postpaid. Pk. 50c, bu. \$1.75, 2 bu. \$3.25, 10 bu. or more at \$1.50 per bu.

White Cap Yellow Dent—This is an early variety and is especially adapted to poor, thin soil, and produces better results on such soil than any other varieties we know of. The tip ends of the grains are white and the inside yellow, making it a beautiful color both on the cob and shelled. It is an excellent producer and always pleases the grower. Lb. 25c, 3 lbs. 60c, postpaid. Pk. 50c, bu. \$1.75, 2 bu. \$3.25, 10 bu. or more at \$1.50 per bu.

Page's Iowa Gold Mine—We have induced many of our customers to try this variety of Dent corn and we have yet to hear of a single dissatisfied customer. The ears are of good size, symmetrical, color a bright, golden yellow and as handsome as a \$20 gold piece; grains very deep, cob small, and therefore dries out very quickly. From 70 lbs. of ear corn 60 to 62 lbs. of shelled corn can be obtained. Our seed comes from a grower who makes corn a specialty, and we therefore can recommend this variety as being the true Iowa Gold Mine. Lb. 25c, 3 lbs. 60c, postpaid. Pk. 50c, bu. \$1.75, 2 bu. \$3.25, 10 bu. or more at \$1.50 per bu.

Page's Improved Leaming—The true Leaming Corn is certainly a most excellent variety, but of late years it seems to have been the custom among many dealers, particularly feed and grist mills that sell seeds, to buy from the elevator people Western corn in car lots, selling out what they could of Leaming and Pride of the North, and using the balance of their stock for grinding purposes. We claim that in this way they are not getting real seed corn, but are getting commercial or mill corn. This condition has induced us to have grown for us, on contract, the true Leaming Corn. The corn which we offer for sale under the above name is grown for us as carefully and the same care used with it as any of our other varieties of corn. Only selected stock of seed is used, the corn is carefully sorted, nothing but the best ears being put into the seed corn. We, therefore, know that the customers using this variety will obtain better growth and larger yield than if they used the common varieties so generally sold. Lb. 25c, 3 lbs. 60c, postpaid. Pk. 50c, bu. \$1.65, 2 bu. \$3.00, 10 bu. or more at \$1.40 per bu.

Sibley's Pride of the North—The same remarks which we have made on the preceding variety of corn holds good on this variety. If our customers have been in the habit of using Leaming or Pride of the North we would like to have them try at least a small quantity of our corn, and we are sure that they would be surprised at the difference in results. Lb. 25c, 3 lbs. 60c, postpaid. Pk. 50c, bu. \$1.65, 2 bu. \$3.00, 10 bu. or more at \$1.40 per bu.

Iowa Silver Mine—This variety has a record of 215 bu. to the acre. It is a pure white corn with deep grain. The ears 10 to 12 inches in length, sixteen to twenty rows, with small cob and filled to the very tip. It does not produce much fodder, having been bred more for the production of the grain. Lb. 25c, 3 lbs. 60c, postpaid. Pk. 50c, bu. \$1.75, 2 bu. \$3.25, 10 bu. or more at \$1.50 per bu.

Early White Flint—This is a good variety of Flint Field Corn, particularly so for Northern localities. Produces a good quantity of ears well filled with white grains. Lb. 25c, 2 lbs. 40c, postpaid. Pk. 50c, bu. \$1.65, 2 bu. \$3.00, 10 bu. or more at \$1.40 per bu.

Yellow Canada Flint—An early variety much used in the Northern States for field corn, on account of its earliness and productiveness. Lb. 25c, 2 lbs. 50c, postpaid. Pk. 50c, bu. \$1.65, 2 bu. \$3.00, 10 bu. or more at \$1.40 per bu.

Early Longfellow—Another well-known variety of Flint Field Corn which is very largely used in some sections. The ears are extremely long, measuring 12 to 14 inches, cobs small, grains a bright golden yellow. Lb. 25c, 3 lbs. 60c, postpaid. Pk. 50c, bu. \$1.65, 2 bu. \$3.00, 10 bu. or more at \$1.40 per bu.

PAGE'S SURPRISE.—Mr. Farmer, here is the corn for you, If you have never given it a trial, by all means do so this season, and you will never regret it. We haven't space to say much about it, but plant an acre or two and you will think more of this variety than if you read a dozen pages of our catalogue in its praise. It is the result of ten years' selection by a corn grower. Ears large, long, deep grain, small cob, stalk medium size, Very productive, and of uniform, pure golden yellow kernels. Surprise your neighbors by growing a crop of Dent corn that will yield 150 to 200 bushels an acre, Lb. 25c, 3 lbs. 60c, postpaid. Pk. 50c, bu. \$2.00, 2 bu. \$3.50, bags free.

Seed Potatoes.

Our seed potatoes are all northern grown either by ourselves or under our supervision. The crop this season is very short and our supply is limited, therefore order early. Stock will run a little smaller than usual, but will be smooth and of good planting size.

PRICES OF 1903.

Except Where Otherwise Noted—First Size—Lb. 25c, 3 lbs. for 60c, postpaid. By express or freight at expense of purchaser. Pk. 50c, bu. \$1.50, bbl. or sack of 165 lbs. net, \$4.00.

Second Size—Lb. 25c, 3 lbs. for 50c, postpaid. By express or freight at expense of purchaser. Pk. 35c, bu. \$1.00, bbl. or sack of 165 lbs. net, \$2.75.

EARLY VARIETIES.

Page's Extra Early Surprise—Notwithstanding the extravagant assertions made by many seedsmen and potato growers, we have yet to find a better or earlier potato than this variety. We have tested it by the side of many others and in all of our tests the Surprise has been earlier, yields more and of finer quality than any other variety. The flesh is white, remarkably fine grained; a most excellent table variety. The potatoes are oblong in form, uniformly of good size and almost invariably free from rough or scabby tubers; eyes well set on the surface, skin slightly shaded with pink. Pk. 60c, bu. of 60 lbs, \$1.75, bbl. or sack of 165 lbs. \$4.50.

New Queen—This well-known variety of early potato originated in Maine about 17 years ago. It is probably as largely used as any variety of early potato grown. It is thought by many potato growers to be the best extra early variety, on account of its productiveness, earliness and handsome appearance. It is certainly an excellent variety and we know that every one giving it a trial will be well pleased.

Early Bovee—A new variety of the Early Hebron type introduced by Henderson, and claimed by them to be the earliest and most productive potato of the kind ever offered. The vine is dwarf, enabling it to be planted six inches closer than other varieties, which insures a much larger yield per acre. The tubers grow remarkably close or bunched together in the hills, close up to the vine. It should be planted in good soil and well cultivated, when it will produce a most excellent crop.

Early Rose—This old, standard variety is so well known that it needs no description from us. We have selected our seed stock very carefully and have grown a crop ourselves that is the true Early Rose. In some sections this variety has apparently run out, as seed stock has not been selected or changed. If you desire the true stock Early Rose, send your order to us.

MAIN CROP VARIETIES

Sir Walter Raleigh—This is a comparatively new variety, having been introduced in 1897, by one of the leading seedsmen of New York City. The best money making potatoes of recent years have been Rural New Yorker No. 2, and Carmine No. 3. We consider this a more desirable variety than either of these. Of all the varieties of potatoes we grew the past season, this was the largest producer of any. We know of many shippers of potatoes who will pay from 3 to 5 cents per bushel more for a round white smooth potato, than they will for the long, old-fashioned varieties. This potato fills the bill in every respect, not only for the home garden, but for the market gardener and shipper. We consider it the best main crop potato grown today.

State of Maine—A standard, well known potato that has proven very satisfactory and is grown very largely in New York State. Shape round or oblong, slightly flattened; late, a most excellent yielder and good keeper; grown largely as a shipping variety.

Rural New Yorker No. 2—Another well-known va-

riety that is considered by many to be the nearest to perfection of any main crop potato grown. An extremely large yielder and of most excellent quality; of about the same shape and general appearance as the State of Maine variety.

Green Mountain—Another excellent main crop variety, in general appearance much like the Rural New Yorker No. 2. Some growers consider it superior to the State of Maine, or Rural New Yorker No. 2; not only used for home trade, but as a shipping variety.

Carman No. 3—An excellent late variety; yielding large crops of good size tubers of most excellent quality. In many sections it is the main crop grown.

The Keeler—We offer this new variety for the first time. The few that have had a chance to test this variety claim that it is the largest yielding white potato grown. The skin is very white and smooth, eyes shallow, shape between a long and round; Vines vigorous. A most excellent medium late variety. We have only a limited stock and cannot accept orders for more than one bbl. from a customer.

Prices same as for Page's Extra Early Surprise.

Chenango White—We obtained this potato from Mr. Taft of Chenango County, N. Y., and have grown our own seed stock. For a baking potato, there is nothing better grown. Shape medium long, good size, eyes set well on surface, skin and flesh very white. It is remarkably productive, and even the past season, when the potato crop was nearly a failure in this section, this potato gave us a good yield. Late.

Price same as for Page's Extra Early Surprise.

Potato Eyes by Mail—For those using only a small quantity of potatoes and do not wish to pay express or freight charges, it is advisable that they buy potato eyes, which we send carefully labeled and packed to any section of the country. Thirty eyes of any variety 25c; 25 eyes each of any five varieties, \$1.00.

Potato Seed—New varieties of potatoes come from seed. To those wishing to experiment in the production of new varieties, which is very interesting and sometimes very profitable work, we offer choice potato seed. Pkt. 15c.

Oats.

Two choice varieties.

Mortgage Lifter—A new but well-known variety that was introduced only a few years ago by a prominent seedsmen and has given almost universal satisfaction. The oats are heavy, often weighing 45 or 50 lbs. to the bu., and have produced 100 bu. to the acre.

Empire State—A new variety, producing immense crops. The grain is large, plump, thin hull, bright color, produced in large heads. Straw tall, stiff, and not likely to lodge. It is certainly worth a trial.

Price for either variety: Pkt. 10c, lb. 25c, 3 lbs. 65c, postpaid. By express or freight at expense of purchaser, lb. 10c, pk. 40c, bu. \$1.25, 5 bu. or more at \$1 10 per bu.

OTHER CHOICE FARM SEEDS.

Barley.

Beardless Barley—Many people do not like to grow barley on account of its long, harsh beards, which are so disagreeable in threshing. This variety of Barley is entirely beardless and is as easy to grow and handle as oats. It is a very heavy cropper, yields 50 to 75 bu. per acre and the quality is most excellent. Our seed is very carefully grown and our customers may depend on obtaining the true Beardless Barley. Per lb. 25c, 3 lbs. 65c, postpaid. By express or freight, at the expense of the purchaser, pk. 50c, bu. \$1.50, 2 bu. or more at \$1.35 per bu; 10 bu. or more at \$1.25 per bu.

Millet.

Japanese Millet—We consider this one of the most valuable crops for the farmer to grow. It will produce an abundance of green fodder, yielding from 12 to 20 tons per acre. It is not only excellent for green fodder, but makes excellent hay when cured; its feeding qualities are superior to fodder corn. It grows from 6 to 8 feet high and is so tender and juicy that stock will eat the entire stalk. Sow from the middle of May till the end of July, broadcast at the rate of 12 lbs. per acre or in drills at the rate of 8 lbs. per acre. At the time of writing this description, November, we have already sold more than twice the quantity we sold last season, and we have yet to hear of a dissatisfied customer. Pkt. 10c, lb. 25c, postpaid. By express or freight, at expense of customer, 5 lbs. or more at 10c per lb., 10 lbs. or more at 8½c per lb., 50 lbs. or more at 7c per lb.

German or Golden Millet—German or Golden Millet has yellow, drooping heads, produces a very large crop and is excellent both for soiling and for hay. For the latter purpose it must be cut before it begins to head, before blooming, as it is liable to injure stock if the heads are formed. It is ready for use in 60 or 65 days from time of sowing. Sow in drills, using three pecks or a bu. per acre, for hay. Lb. 25c, 3 lbs. 65c, postpaid. By express or freight at expense of purchaser, pk. 50c, bu. \$1.50, 2 bu. or more at \$1.40 per bu.

Hungarian Millet—A species of Annual Millet, yielding two or three tons of hay per acre. Sow ½ bu. to the acre in May or June. Lb. 25c, 3 lbs. 65c, postpaid. By freight or express, pk. 50c, bu. \$1.50, 2 bu. or more at \$1.35 per bu.

Rape Seed.

Dwarf Essex Rape—Invaluable to sheep and cattle farmers in Great Britain, and is fast coming into use in

this country, on account of its rapid growth, being ready to feed within 10 weeks from sowing and produces from 25 to 30 tons of green forage to the acre. It grows to a height of three feet and covers the surface so densely as to smother out all weeds, and kills quack and other objectionable grasses. Pkt. 10c, lb. 25c, 3 lbs. 60c, postpaid. By express or freight at expense of purchaser, 10c per lb, 50 lbs. or more at 8c per lb.

Cow Peas.

Cow Peas—(Great Soil Improver). Makes poor land rich and good land more productive. Enriches the soil even when the crop is cut off. Green crops turned under is one of the best ways of enriching the soil. There is no surer or cheaper means of improving the soil than by sowing Cow Peas.

Nitrogen or ammonia in commercial fertilizers is valued at 15c per lb. The Cow Pea is a great nitrogen gatherer. The Cow Pea is also a most excellent crop for cutting green and feeding. It produces a large crop even on poor soils. We offer the best variety, the early Black Cow Peas.

By mail, postpaid, pt. 20c, qt. 30c. By express or freight pk. 60c, bu. \$2.25. Prices subject to market changes.

Sunflower Seed.

Mammoth Russian Sunflower—The Sunflower is one of the very best egg-producing food for poultry. It can be sown any time before the middle of July. It produces a large quantity of seeds, and anyone having poultry should sow a liberal quantity. Pkt. 3c, oz. 5c, ¼ lb. 15c, ½ lb. 20c, lb. 30c, postpaid. By express or freight at expense of purchaser, 5 lbs. or more at 10c per lb., 25 lbs. or more at 7c per lb. Special prices in larger quantities.

Early Amber Sugar Cane.

The high value for Northern grown sugar cane for fodder and ensilage is becoming rapidly known. It may be made to furnish the principal food for cattle, horses and mules from August until the following spring. When fed down young as a pasture it grows rapidly again. It also withstands severe drought with the best of this class of plants. As a fodder and for winter feed it is one of the most economical. The Early Amber is the best for fodder as well as for sugar, as it matures quickly and has been cultivated as far North as St. Paul, Minn. The seed is valuable, also as food for horses and cattle, and is greedily eaten by poultry, increasing the egg-production. By mail, postpaid, lb. 25c, 3 lbs. 60c. By express or freight, qt. 20c, peck 75c, bu. 56 lbs. \$2.40, 5 bu. or over \$2.25 per bu.

Grasses and Clover Seed.

We give below a list of the best grasses and clovers for general use. We are unable on account of space to give any description, but should our customers wish any information we shall be pleased to give it to them. All varieties of grasses and clovers are sold at market prices, and it is therefore impossible to give prices that will hold good, except for small quantities. When you are ready to purchase write us for special prices, telling us the varieties and quantities you wish, and we will send you samples and quote you our lowest prices.

Timothy, Choice Re-cleaned—Lb. 25c, 3 lbs 60c, postpaid.

Red Top, Choice Re-cleaned—Lb. 30c, 3 lbs. 80c, postpaid.

Orchard Grass, Choice Re-cleaned—Lb. 30c, 3 lbs. 75c, postpaid.

Kentucky Blue Grass—Lb. 30c, 3 lbs. 75c, postpaid.

Crested Dog's Tail—Lb. 40c, 3 lbs. \$1.00, postpaid.

Meadow Fescue—Lb. 35c, 3 lbs. \$1.00, postpaid.

Wood Meadow Grass—Lb. 40c, 3 lbs. \$1.00, postpaid.

Annual Sweet Vernal Grass—Lb. 40c, 3 lbs. \$1.00, postpaid.

Creeping Bent Grass—Lb. 35c, 3 lbs. \$1.00, postpaid.

Red or Medium Clover—Lb. 25c, 3 lbs. 65c, postpaid.

Mammoth or Pea Vine Clover—Lb. 25c, 3 lbs. 65c, postpaid.

Alsike Clover—Lb. 35c, 3 lbs. \$1.00, postpaid.

White Dutch Clover—Lb. 35c, 3 lbs. \$1.00, postpaid.

Alfalfa—Lb. 30c, 3 lbs. 75c, postpaid.

Crimson Clover—Lb. 30c, 3 lbs. 75c, postpaid.

If sent by freight or express at expense of purchaser, deduct at the rate of 10c per pound from the above prices.

Special Mixtures.

We put up special mixtures of grasses and clovers that are especially adapted for special soils and special uses. Prices subject to change. Prices quoted by the peck or bushel are sent by express or freight at expense of purchaser.

Permanent Pastures—14 lbs. to bu. Bushel \$2.50, 3 bu. \$7.00.

Orchard and Shady Places—14 lbs. to bu. Bushel \$2.50, 3 bu. \$7.00.

For Hay Only—Bushel \$3.25, 3 bu. \$9.00.

Lawn Grass Seed.

We put up several different mixtures of Lawn Grass Seed, and, while all the mixtures contain about the same varieties of seeds, yet the higher prices contain more of the expensive seed and those that are better adapted for nice, velvety lawns. All of the better mixtures contain ten of the best varieties of grass and clover that grow and flourish during the different months of the year and in various soils.

Central Park Mixture—Qt. 25c, 2 qts. 40c, postpaid, pk. \$1.00, bu. \$4.00, by freight or express.

Fine Quality Mixed—Qt. 20c, 2 qts. 35c, postpaid, pk. 75c, bu. \$3.00, by freight or express.

Good Quality Mixed—Qt. 18c, 2 qts. 30c, postpaid, pk. 65c, bu. \$2.50, by freight or express.

Extra Choice Lawn Grass Seed Put up in quart boxes, per box 25c, postpaid.

SMALL FRUITS.

We know of nothing that will repay the grower for his time and attention and give more satisfaction, than a piece of ground devoted to the culture of Small Fruits. The varieties which we list are easy to grow, and with ordinary care and attention will more than repay one with an abundance of fresh fruit. The cost is so low that there is hardly anyone but that could afford to devote at least a small piece of ground to them. We guarantee to furnish strong, stocky, well rooted plants, and that they will reach you in good condition, and with proper care they are almost certain to live and do well. Send your order for small fruits at the same time you send your order for seeds, stating the time you wish them sent. Send your orders early. We quote two sizes: 1st size are large, two and three year old plants, strong and healthy, and on account of their size must be sent by express or freight, at expense of purchaser. Second size are small size plants that can be sent by mail. They are small, stocky plants, all right in every way except that they are smaller than first size.

STRAWBERRIES.

We have very nice beds of strawberries, and are growing thousands of plants, which we are sending to nearly every state in the Union. We offer a very choice list.

Those marked with a * have imperfect blossoms and should have some varieties with a perfect blossom planted with them. Unless otherwise ordered we put in some of those having perfect blossoms with each order.

Poconoke—A strong robust grower, with dark green foliage, entirely free from rust or blight, and very productive. The berry is round, conical, ripens evenly, a great shipping variety, and of most excellent flavor. Midseason.

Clyde—We have sold this variety for years and have never heard a word of fault found with it. Berries very large, sweet, bright red, fairly firm, ripening medium early.

***Bubach**—This is one of the most popular varieties grown. Very productive, berries extra large, handsome and of excellent flavor.

***Greenville**—Another very popular variety, producing an abundance of large, luscious, bright red fruit, fine, delicate flavor.

Bismarck—Planted on rich soil, with good culture, will please anyone. Very large delicious berries. Holds up well in shipping.

***Haverland**—A fine grower, very productive, one of the leading market sorts. Berries produced on long fruit stalks. Fruit uniform, long, medium size, firm and of good quality.

Lovelett—The plants are all strong, vigorous growers; fruit large, uniform size, firm, of high color and excellent flavor.

***Crescent**—An old, well-known and popular variety. Plants strong growers, producing large crops of good size, richly colored, fine flavored berries.

Price of any of the above varieties (not less than six of a variety sold) 6 for 15c, 12 for 25c, 25 for 40c, 50 for 75c, postpaid.

By express, not prepaid, 100 for 75c, 250 for \$1.75, 500 for \$3.25, 1000 for \$6.00.

NEWER VARIETIES.

Miller—Strong thrifty grower. Berries large, bright red, light inside, and of delicious quality.

***Minute Man**—Under good cultivation will produce 6000 quarts to the acre. Fruit dark glossy red, fine flavor and shape.

Palmer—A strawberry grower gives the following report: "It proves to be the largest and most bountiful of all early strawberries, perfect bloomer, plants strong and robust, produces two and four fruit stalks to each plant, all of them well filled with large berries."

The Klondike—This is a good late variety. Plants strong growers, producing a good quality of fine flavored berries.

Rough Rider—Another late variety. Berries dark red, firm and of fair quality. Few runners.

Uncle Sam—Prolific, color red, quality delicious, perfect shape, large size, remains for a long time in fruit.

Price on the above varieties: 5c. each, 3 for 10c, 6 for 20c, 12 for 30c, 25 for 50c, 50 for 85c, 100 for \$1.50, postpaid.

CURRENTS.

Orders for currants must reach us on or before the 15th of April.

Cherry—Berries large, plants vigorous and productive.

White Grapes—Large berries, white and of excellent quality.

Fay's Prolific—The leading market variety.

Victoria—Large, bright red, ripens late.

1st size, 6 for 75c, 12 for \$1.35, 25 for \$2.25. 2nd size, by mail, each 12c, 3 for 30c, 6 for 50c.

BLACKBERRIES.

Orders for berries must reach us on or before April 15.

The Iceberg—An entirely new variety, sometimes called the New White Blackberry. The ripe berries are clear white and so transparent that the seeds, which are unusually small, may be seen in the berries. The berries are larger, earlier, sweeter, and more tender than the black varieties.

Rathbon—An extremely valuable variety, producing large size berries, in fact, so large that 45 berries would fill a quart box, while it requires over 150 of some other varieties to fill the same box. They stand the winter exceptionally well.

2nd size only, by mail each 12c, 3 for 30c, 6 for 60c, 12 for \$1.10. By express not prepaid, \$5.00 per 100.

Erie—Hardy, productive, fruit large.

Wilson Jr—Very early, not entirely hardy.

Snyder—Very hardy, berries sweet and juicy.

Wachusett—Medium size, sweet and good.

1st size, 6 for 50c, 15 for \$1.00, 25 for \$1.50, 35 for \$2.00, 100 for \$5.00.

Second size of the following varieties: Early Harvest, Erie, Snyder, by mail each 8c, 12 for 60c.

RASPBERRIES.

Black—

Gregg—The standard market sort, very productive.

Kansas—The best black raspberry grown.

Red—

Cuthbert—Large, rich, juicy, sweet berries.

Marlboro—Large size, early, very productive.

Yellow—

Golden Queen—The best yellow berry.

1st size plants only; 10 for 25c, 25 for \$1.00, 50 for \$1.50, 100 for \$2.50.

2nd size in the following varieties by mail: Cuthbert, Columbian, Golden Queen, Gregg, London, each 8c, 12 for 50c.

SPECIAL OFFER STRAWBERRIES.

25 Crescent.

6 Clyde.

6 Bismarck.

6 Haverland.

6 Rough Rider.

6 Miller.

Sent postpaid for only..... \$1.00

By express not prepaid for..... \$.75

Grapes.

Concord--The old well known and deservedly popular variety, and succeeds wherever grapes are grown.

Orders must be received on or before April 1st.

Moore's Early--Large bunches and each Grapevine hardy and productive; ripens early.

Worden--An exceptionally fine variety similar to the Concord, but earlier, larger bunches and of better quality; in our opinion the best of the Black Grapes.

Agawan--Berries very large, red sweet and of excellent flavor; a vigorous grower.

Brighton--Berries large and of excellent flavor and quality, and one of the earliest to ripen; color red.

Lindley--From medium to large, tender, sweet, ripens early; red.

Moore's Diamond--Good size, vines hardy, vigorous and productive; color white.

Niagara--Very popular variety of white Grape; large bunches of excellent quality.

Pocklington--Bunches and berries large, juicy, tender and sweet; color white.

1st size, each 20c, 3 for 50c, 6 for 90c, 12 for \$1.75.

2nd size, by mail postpaid, each 12c, 3 for 30c, 6 for 55c.

GOOSEBERRIES.

Downing--Very large and handsome; strong, vigorous growers.

Houghton--From small to medium; berries red and of fine flavor.

Smith's Improved--Very large; berries greenish yellow.

1st size, each 20c, 6 for 75c, 12 for \$1.35.

2nd size, each 12c, 3 for 25c.

Fruit Trees.

Choice varieties, large size, correctly labeled. Unless otherwise stated we offer only strictly No. 1 trees. These are carefully selected and packed and may safely be sent to any of the Eastern, Middle, Southern, or Central States. Orders must be sent us on or before April 10th. Sent only by express or freight, at expense of purchaser.

APPLES.

$\frac{3}{4}$ in. or over in diameter; 6 to 8 feet high.

SUMMER VARIETIES.

Yellow Transparent--The most desirable apple grown. Trees produce fruit very young. Fruit good size, pale yellow, excellent quality. July and August.

Early Harvest--Medium size, round, straw color, productive. August.

Red Astrachan--Large, nearly covered with deep crimson, juicy, acid, productive. August.

AUTUMN VARIETIES.

Duchess of Oldenburg--Fruit large, valuable both for market and home use. September.

Chenango Strawberry--A most excellent variety. Fine medium size, tender, juicy, fine flavor. Sept. and Oct.

Munson Sweet--Large pale yellow with red cheek, tender, rich and good. Oct. to Jan.

Maiden's Blush--Rather large, flesh white, tender, pleasant and acid flavor. Sept. to Oct.

WINTER VARIETIES

Baldwin--Large, deep red, very productive. Jan. to April.

Ben Davis--Medium size, striped, good keeper. Dec. to March.

Grimes Golden--Finest quality, golden yellow. Jan. to April.

Greening--Large, greenish yellow, tender, juicy. Dec. to April.

King--Large, handsome, tender, good flavor. Nov. to March.

Spy--The best winter apple. Jan. to June.

Spitzburg--The old favorite. Jan. to April.

Wealthy--A very popular variety. Oct. to Jan.

Each 30c, 6 for \$1.75, 12 for \$3.00

CRAB APPLES.

Gen. Grant--Fine flavor, large, productive.

Martha--Bright glossy yellow shaded with red.

Whitney--Tree hardy, productive, excellent fruit.

Each 35c, 6 for \$2.00, 12 for \$3.50.

CHERRIES.--Sweet Varieties.

Five to six feet high.

Gov. Wood--Very large, light red, juicy, delicious.

Black Tartarian--Large, purplish-black, productive.

Yellow Spanish--Pale yellow with red cheeks; fine.

Sour Varieties.

Four to five feet high.

Early Richmond--Medium size, dark red, juicy.

Montmorency--Valuable market variety; fruit large, red, ripens late.

Each 50c, 6 for \$2.75, 12 for \$5.25.

APRICOTS.

Three to four feet high.

Alexis. Alexander. J. R. Budd.

The above are Russian varieties, hardy and productive.

Each 40c, 3 for \$1.00, 6 for \$1.75.

PEARS.

$\frac{3}{4}$ in. or over in diameter, 6 to 9 feet.

Bartlett--Large size, fine flavor, productive.

Beurre d'Anjou--Large, greenish fruit, excellent flavor.

Clapp's Favorite--Early large fruit, melting and rich.

Flemish Beauty--Very hardy, large, handsome fruit.

Wildor--Very early fruit, small, good quality.

Winter Nellis--Medium size fruit, late, delicious flavor.

Price (except for Winter Nellis) each 35c, 6 for \$2.00, 12 for \$4.00.

Winter Nellis, each 40c, 6 for \$2.25, 12 for \$4.50.

PLUMS,

$\frac{3}{4}$ in. or over in diameter, 6 to 8 feet high.

Abundance--The most popular Japanese variety. Tree thrifty, productive, hardy. Fruit large, yellow ground, nearly covered with red, flesh firm and juicy.

Burbank--The best of the Japanese varieties. Tree a vigorous grower, enormous bearer. Fruit medium to large, light color, firm and meaty. About two weeks later than Abundance.

Price on either above varieties, each 40c, 6 for \$2.25, 12 for \$4.25.

Bradshaw--Fruit very large, dark violet red.

Lombard--Violet red, juicy, pleasant and good.

German Prune--Large, dark purple, agreeable flavor.

Niagara--Very much like Bradshaw.

Shipper's Pride--Dark Purple, very large, good keeper.

Yellow Egg--Yellow, large, egg-shaped, productive.

Price, each 35c, 6 for \$2.00, 12 for \$4.00.

PEACHES.

Alberts. Foster. Early Crawford.

1st size, 4 to 5 feet, 20c each, 6 for \$1.00.

2nd size, 3 to 4 feet, 15c each, 6 for 75c.

3rd size, 2 to 3 feet, 10c each, 12 for \$1.00.

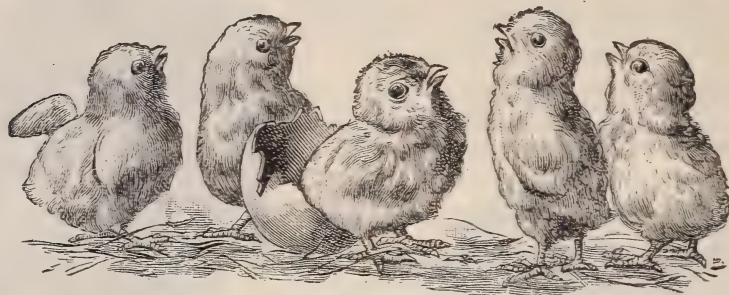

QUINCES.

Orange. Champion.

4 to 6 feet high, 35c each, 3 for \$1.00.

Special Note--We shall be pleased to quote by mail special prices on any other variety of fruit trees our customers may wish. Also special prices on large lots of trees. We also can furnish all the varieties of fancy or ornamental trees.

EGGS FOR HATCHING.

CHOICEST VARIETIES ONLY.

We guarantee the eggs which we send out to be fresh and true to name. We pack all eggs in very light boxes, which are placed in baskets with excelsior, and we guarantee them to reach our customers in good order.

We cannot promise to fill all orders until on or after April 1, and as eggs are more fertile after this date, we would advise our customers to send in their orders to be sent as soon as possible after April 5. All orders filled in rotation. We have no fowls for sale. No orders for less than one setting will be filled, and none for less than seven eggs of one variety.

Single Comb White Leghorns—This variety, being of the Mediterranean Class, are styled as non-sitters. They are excellent layers of eggs, white in color, medium in size. Chicks are very hardy, maturing at an early age and often begin laying at 4 months of age. They bear confinement well, but are, if left out, the very best of foragers. An excellent variety.

Rose Comb White Leghorns—The Rose Comb White Leghorns are identical with the Single Comb, except their comb resembles the comb of the Hamburg. They are much admired by poultry growers. Their freedom from frozen combs makes them very desirable for the Northern climate, more so than the Single Comb varieties. They are very hardy, both as chicks and fowls. They are a fine fowl for the table as far as they go, but, being rather small, we cannot recommend them as valuable market fowls, but as far as turning the dollars and cents your way in egg production, they stand in the front ranks.

Buff Plymouth Rocks—For the farmer and poultryman this breed is a great favorite, being of medium size, well proportioned, with a deep, full breast, making it a most desirable bird for market purposes. They are hardy, maturing early, making fine broilers when from 8 to 10 weeks old. Laying qualities are the same as the Barred or White Rocks. They make good winter layers, if well cared for, pullets beginning to lay when 6 months old.

Barred Plymouth Rocks—Among the many fine breeds of domestic fowls bred by poultry fanciers generally, the Plymouth Rock stands at the head as a general purpose breed; are of good size, clean, bright yellow legs, beautiful plumage, are very hardy, easily raised, first-class layers, good mothers and are not inveterate setters and an excellent table fowl. It is undoubtedly one of the most profitable breeds in existence.

White Wyandottes—The description of Silver-Laced Wyandottes will apply to this variety, except in color. The color is pure white, as the name indicates, having bright red wattles and ear lobes and the comb is rocker shaped. They are a very attractive, handsome fowl.

Rose Comb White Face Black Spanish—This variety of fowl belongs to the Mediterranean Class, hence are classed with the non-sitters. Their color is a rich, glossy black, they are splendid layers, large eggs, mostly white in color, which usually hatch well, as the Spanish possess great vitality. Their faces are pure white, presenting a striking appearance. The chicks grow very fast, maturing at an early age. They cannot be called a desirable market fowl, as they have a white skin, which does not show as well dressed as a yellow skin, yet their meat is fine grained, tender and juicy.

Blue Andalusians—This variety came from Andalusia, Spain. As layers they have few, if any superiors. Eggs white, medium size. Chicks hardy, grow fast, begin laying often at 4 months. They do not breed true to color as most other varieties.

Rose Comb Black Minorcas—Same as the Single Comb variety except that the comb resembles the comb of a Rose Comb Leghorn. Some think that they are better adapted to our cold climate than the single comb variety. Eggs very large and white.

Single Comb Black Minorcas—A grand variety that is becoming more popular each year. They are very stylish and attractive and belong to the non-setting class. Plumage pure black, with a green or metallic lustre. As for laying qualities, they cannot be beat. Large, pure white eggs.

Price of any of the above varieties, per sitting of 15 eggs, \$1.25; 2 sittings, 30 eggs, \$2.00

White Pekin Ducks—Without any doubt this is the most popular breed of ducks known. The Pekins have taken the place of all other varieties for market culture, on account of their hardy nature, more rapid growth, large size and fine eating qualities, and excellent layers, color pure white. Our eggs are supplied by a party that has a large duck ranch, and grows each year from ten to fifteen thousand Pekin ducks, in fact it is the only variety he has. He has taken a great deal of pains with his stock, and we guarantee all the eggs to be fresh and of pure White Pekin variety.

Standard gives the weight of an adult drake 8 lbs; young drake 7 lbs; adult duck 7 lbs; and young duck 6 lbs. But this breeder has ducks weighing 10 to 12 lbs.

Price, one sitting, 9 eggs, \$1.25; two sittings, 18 eggs, \$2.25; 50 eggs for \$5.00; 100 for \$9.00.

FLOWER SEEDS.

On the following pages will be found all the choice varieties of flowers grown from seed. ORDER BY NUMBER.

Abutilons

Also called Chinese Bell Flower or Flowering Maple. A very popular plant with bell-shaped, drooping flowers, ranging in color from pure white and yellow to deep orange and crimson.

1017. **Finest Mixed**—Pkt. about 25 seeds, 7c.

1018. **Newest Varieties Mixed**—Pkt. 10 seeds, 12c

Alyssum

Pkt. contains over 1000 seeds.

1038. **Sweet White**—Flowers pure white; useful in all kinds of small bouquets. Pkt. 5c, oz. 25c.

1039. **Little Gem**—Of dwarf, compact habit, 4 to 6 inches in height; especially adapted to edgings, borders, and rock work. The plants are a solid mass of white blossoms from early summer until late in the fall. Pkt. 5c, ½ oz. 20c.

1040. **Golden**—Flowers are golden yellow. Desirable for rock work, borders and beds; contrasts very prettily with the white. Pkt. 5c.

Anchusa Capensis

Also sometimes called Cape Forget-Me-Not.

A hardy annual of more than ordinary beauty, growing about two feet high, branching freely and bearing a profusion of lovely flowers which are often mistaken for Forget-Me-Nots.

1042. Pkt. 200 seeds, 5c.

Anemone

Among the earliest blooming and brightest of spring flowers. The seeds should be rubbed in sand before planting, to separate them from a cotton-like down, with which they are covered. Six inches high.

1043. **Fine Mixed**—Pkt. 500 seeds, 7c.

Angel's Breath

Also sometimes called Gypsophila. An annual that should be in every garden, for it thrives almost anywhere and furnishes the finest material for all kinds of bouquets. The tiny little flowers are borne in an abundance on long, graceful, branching stems, which lend a most graceful appearance to the entire bunch of flowers.

1044. Pkt. 300 seeds, 4c.

ANTIRRHINUM—See Snapdragon.

AQUILEGIA—See Columbine.

Bachelor Buttons

A very popular variety of flower, which has been greatly improved.

Sow the seeds as early in the spring as possible.

1090. **Finest Mixed**—Pkt. about 50 seeds, 4c.

1091. **Centaurea Imperialis**—A new variety from Europe, producing plants three to four feet in height, with handsome large flowers, borne on long stems. Mixed colors. Pkt. 50 seeds, 7c.

1167. **New Centaurea**—One of the new varieties of Bachelor Buttons, named Marguerite, after Queen Margaret of Italy. Plants about 18 inches high, of very easy culture, flowers pure white, deliciously scented and freely produced on long stems. The flowers resemble wax and will remain in good condition after cutting longer than almost any other variety of flower. Pkt. about 50 seeds, 5c.

Balloon Vine

is a rapid and graceful climber with pretty foliage and inflated capsules.

Tender, annual, 10 to 20 feet high.

1093. Pkt. 4c.

BELLIS—See Daisy.

CALENDULA—See Marigold.

CALIFORNIA POPPY—See Eschscholtzia.

Begonias

Begonias are very popular plants, and require but very little care in growing. As the seeds are extremely small, in fact, the seeds of some varieties resemble dust, great care must be taken in sowing them.

REX BEGONIA.

1103. **Rex**—A very popular variety. Our mixture contains all of the best of the ornamental leaved varieties. Plants are very handsome. The seeds of this variety are very expensive and exceptionally small. Pkts. when received, must be opened with great care and the seeds carefully sown. Pkt. 15c, 2 pkts. 25c.

1104. **Vernon**—A very popular, ever-blooming variety. Equally as good for a potted plant or for bedding out-of-doors. Pkt. about 2000 seeds, 8c.

1105. **Finest Single Mixed**—This mixture contains seed from all the best, single, tuberous rooted, flowering Begonias. Pkt. over 150 seeds, 15c.

1106. **Finest Double Mixed**—Same as the preceding number, but of the double varieties. Pkt. 10c.

1107. **Vulcan**—This grand, new variety might properly be called New Scarlet Vernon, as it is similar in growth and flowering habits to that variety, although it completely eclipses the Vernon in beauty. It will stand the intense heat of summer without wilting. Pkt. 10c, 3 pkts. 25c.

Asters

It is unnecessary to dwell on the great beauty of these favorite flowers, as they are appreciated by everyone. We would recommend that our customers plant at least several varieties, as no other annual gives such a magnificent display during the late summer and fall.

Branching Asters

Of all the many varieties of Asters, we consider that the Branching are among the best. They give an abundance of flowers, produced on long, stiff stems.

1056. New White Branching. 1087. Pink Branching.

1062. Light Blue Branching. 1059. Crimson Branching.

1061. Lavender Branching. 1076. Mixed Branching.

Above 5c. per pkt. All 6 varieties for 25c.

Victoria Asters

Plants of this variety form large compact bushes, which in the flowering season are literally covered with large, double, perfect shaped flowers.

1058. Pure Snow White—Very handsome.

1060. Bright Red—Handsome and showy.

1063. White—Turning to azure blue.

1064. Violet—Rich and handsome.

1065. Deep Pink—Delicate.

1057. Choice Mixed—All colors.

Above 5c. per pkt. All 6 varieties for 25c.

Truffaut's Peony Flowered Perfection Asters.

We could devote pages in praise of this variety, and then not do it justice.

1067. Scarlet—White edged, very handsome.

1070. Crimson—Brilliant and showy.

1071. Light Blue—Very delicate and pretty.

1072. Snow White—Always admired.

1078. Brilliant Rose—Excellent color.

1066. Choicest Mixed—Includes all colors.

Above 5c. per pkt. All 6 varieties for 25c.

One pkt. each of the above 18 varieties, for 65c.

ASTERS.—Continued.

1082. **Imbricated Pompon**—Flowers of perfect form and so double as to appear spherical. Very handsome variety. Height about 18 inches. All colors mixed. Pkt. 8c.

1083. **New Japanese**—The beautiful flowers of this new strain of Aster offer a very striking contrast to those of almost any other variety. They are of immense size, measuring from five to six inches across, with long petals, curiously waved and curled, so as to give them striking resemblance to the Japanese Chrysanthemum. Choicest mixed. Pkt. 10c. 3 pkts. 25c.

1085. **New Diamond**—Has large double flowers of rich and varied color. Plants grow from 10 to 20 inches high and are entirely covered with a mass of bloom. Flowers are from two to two and one-half inches across. Finest mixed, all colors. Pkt. 10c. 3 pkts. 25c.

New American Mary Semples—This is an American novelty of unusual merit; sure to become popular with everyone. It grows about two feet high and, owing to its free branching habit, each plant should be allowed plenty of space for its full development. Its superb large double flowers, borne upon stems about 12 inches long, are most desirable for cutting. Pkt. 8c. 3 pkts. 20c.

1073. **Crown**—A showy variety, with large, double flowers, with pure white centers, surrounded with petals of distinct bright colors. Pkt. 7c.

1075. **Earliest of All**—A variety of Aster that in many respects resemble the Queen of the Garden variety, but earlier, coming into bloom from 10 days to two weeks before this variety. All colors mixed. Pkt. 8c.

1088. **Extra Choice Mixed**—We have made up a mixture of all the preceding varieties of Asters and have, also, added a few other varieties to this mixture, which we do not list separately. This mixture contains about 40 varieties, and is the very best mixture put up. Pkts. containing about 200 seeds for 10c.

1089. **Page's Giant White Aster**—This variety is an improvement on the well known Comet Aster, in that the plants are taller and of greater vigor and the pure white flowers are of extraordinary size and more nearly resemble the Japanese Chrysanthemum. A very choice and handsome variety. Pkt. 10c.

1079. **Christmas Tree Aster**—A new type of Aster which grows in the pyramidal form, producing many flowers on long stems. On account of their graceful habit of growth they are very desirable for individual planting. An excellent variety for cutting. Pkt. 10c. 3 for 25c.

The following are 5c Per Packet, 6 Packets for 25c.

1050. **Queen of the Earliest**—An extra early variety; flowers pure white, produced in great profusion, on long stems.

1051. **Comet**—Resembles very much the Japanese Chrysanthemum in size and shape of flowers. A wide range of handsome colors.

1052. **Harlequin**—Pure white petals, interspersed in an irregular manner with deep blue and bright red petals.

1053. **Queen of the Garden**—About two weeks earlier than most other varieties. Very finely formed flowers mixed, many colors.

1054. **Dwarf Victoria Mixed**—All colors.

1055. **German Quilled**—This variety contains many brilliant colors.

1080. **Fire King**—A very brilliant Aster.

1081. **Snow Ball**—Snow white flowers of large size; a beautiful companion of the preceding variety.

1084. **New Yellow**—A beautiful variety producing large double flowers of the brightest yellow.

1074. **Jewel or Ball**—Free flowering dwarf growth; flowers round. A most satisfactory variety.

Balsams An old garden favorite, greatly improved in the last few years. Also called Lady Slippers, Touch-Me-Not, etc.

1095. **Double Solferino**—Satiny white, streaked and spotted with crimson and lilac. Pkt. about 100 seeds 7c.

1097. **Burpee's Superb Camillia Flowered**—The finest mixture put up. It embraces many of the best varieties. Will produce a great range of color. Very desirable. Pkt. about 100 seeds 8c. 3 pkts. 20c.

1098. **Double Dwarf Mixed**—About one foot high and contains all the best dwarf varieties. Pkt. about 35 seeds, 5c.

1099. **Double Tall Mixed**—About two feet high; contains a selection of all the best tall varieties. Pkt. about 75 seeds, 5c.

1100. **Extra Choice Mixed**—We have made up a new mixture of all the best varieties of Balsams. This mixture, in addition to the above varieties, contains the following: Peach Blossom, Lavender, Scarlet, Rose Carmine, Dark Red, Red and White Spotted, White, Yellow, Tri-color, making it the very best mixture possible to be obtained. Pkt. 10c.

Carnations

and fully 80 per cent. double.

1140. **Finest Mixed**—All colors. Pkt. about 200 seeds, 8c.

Giants of California

destroyed by heavy frosts.

1149. **Finest Mixed**—All colors. Pkt. about 75 seeds, 12c.

OTHER CHOICE VARIETIES.

1142. **Finest Mixed**—All colors. Pkt. about 100 seeds, 8c.

1143. **Double Dwarf Vienna**—Early dwarf variety. Pkt. about 100 seeds, 10c.

1147. **Extra Choice Double Mixed**—A large proportion of these flowers will be double. Seed is saved only from the choicest French, German and Italian stock. The best mixture sold. Pkt. 15c.

1146. **Prize Mixture**—We have made up a choice mixture containing all of the above varieties, also some others, which we do not list separately. This will give one a most brilliant displays when the plants are in bloom. Pkt. containing about 150 seeds, 10c. 3 pkts. 25c.

CARNATIONS.

Calceolaria

A favorite and universally admired plant, remarkable for their large, beautifully spotted flowers. The plant grows round and shapely, 12 to 18 inches high, and for three months or more is covered with unique pocket-shaped flowers. The seeds which we offer are selected from the largest flowering varieties, which we import from Europe. 1113. Pkt., about 150 seeds, 10c.

Calliopsis

A very showy border plant, producing flowers in nearly every shade of yellow, orange, crimson, red and brown. Hardy annual, two feet high, very finest mixed.

1115. Pkt. about 200 seeds, 4c.

Canary Bird Flower

The Canary Bird Flower is one of

the most beautiful climbers grown, with finely cut foliage and curious flowers, resembling a canary bird in shape and color.

1116. Pkt. 25 seeds, 5c.

Canna

Stately, ornamental; plants very desirable for bedding out-of-doors. Will bloom freely from seed the first season, if sown early. The hard shell or outer coating must be filed or cut to admit moisture before they will germinate. Tender perennial, two to six feet high. Store roots in the cellar during the winter. For Canna bulbs see under Summer Flowering Bulbs.

1130. **Fine Mixed**—All colors. Pkt. 10 seeds, 3c, oz. 20c.

1132. **Crozy's Finest Dwarf Canna**—A very handsome and satisfactory variety. Seeds saved from the finest varieties only. Pkt. 12 seeds, 5c, oz. 25c.

Castor Beans

Tall, majestic plants of very rapid growth. Large, glossy, green, brown or bronze, metallic-hued leaves, with large spikes of scarlet and green prickly fruit. Much used in lawns for sub-tropical effect or for center of beds of foliage plants.

Grows from 6 to 15 feet high. Start seed in the house as early as possible and plant in permanent beds as soon as weather permits. Make permanent beds rich and give plenty of water.

1153. **ZANZIBARENSIS**—A most wonderful plant, growing in a single season twelve to fifteen feet high. The enormous leaves, beautifully lobed, measure from two and one-half to nearly four feet across. Each plant makes a perfect pyramid of foliage thickly set from top to bottom with gigantic leaves.

Pkt. 7c, oz. 10c, 1-4 lb. 25c.

1150. **Giantes**—Grows about six feet high. Leaves richly veined and marbled. Pkt. 5c.

1151. **Choicest Mixed**—All varieties. Pkt. 5c.

1152. **Sanguineus**—Blood red stalks, with red venation in leaves. Height about six feet. Pkt. 5c.

Cineraria

Hybrida Large Flowering—No collection of plants,

either in the house or garden, is complete without this beautiful plant. The plants grow about as broad as they are high (about 15 inches), circular in shape and entirely covered with brilliant blossoms, which remain for a long time in full bloom. The seed is easily started, and the plants grow rapidly in good soil. Never allow the plants to receive a check in growing, but grow as rapidly as possible. In color they range through all the shades of light and bright blue or royal purple and plum, and from shining crimson to deep maroon.

1155. **Finest Single Mixed**—Pkt. about 100 seeds, 10c.

1156. **Double Extra Choice Mixed**—Pkt. about 50 seeds, 10c.

1157. **Hybrida Single Dwarf White**—Pkt. 15c.

1158. **Extra Choice Mixed**—A mixture put up especially for us in Germany, by one of the largest and best growers. It is the best mixture that can be obtained. Pkt. 20c.

CENTAUREA—See Bachelor Buttons.

Chrysanthemums

Chrysanthemums have deservedly become very popular. They are showy and effective in the garden and are very desirable for cut flowers.

1160. **Coronarium and Carantium**—Fancy mixed; very fine. Pkt. 4c.

1161. **Double White**—Large and beautiful. Pkt. 4c.

1163. **Double Yellow**—Very handsome. Pkt. 5c.

1165. **Superb Double Mixed**—For the average grower of flowers there is nothing better or more satisfactory than a fine mixture of Chrysanthemums. If started in February, March or even April, the plants will give an abundance of bloom in August and September. This mixture is the very best to be had, being selected from the finest Chinese and Japanese varieties. Pkt. 10c.

1166. **Frutescens**—(Marguerite or Paris Daisy.) This variety, under the name of Marguerite, has attained great popularity among florists. The pretty star-shaped white flowers are freely produced and the plant will grow under almost any circumstances. Perennial. Pkt. 7c.

Candytuft

A hardy annual that is universally known and cultivated, and is indispensable

for cutting, either for bouquets or for decorating. It is an excellent plant for beds or borders to paths. Pkts. contain from 125 to 200 seeds, according to variety.

1117. **Fragrant White**—Pkt. 4c, oz. 15c.

1119. **White or Snow Queen**—Pkt. 4c, oz. 20c.

1120. **New Empress**—Extra large trusses. A great improvement in size and quality over the common white variety. Pkt. 7c, oz. 30c.

1121. **Crimson**—Very handsome. Pkt. 5c, oz. 25c.

1125. **Finest Mixed**—All colors. Pkt. 4c, oz. 15c, 2 ozs. 25c.

1126. **Rocket or Hyacinth Flowered**—A very beautiful variety, which is a great improvement in size, quality and quantity of the flowering trusses over the common white variety. Flowers snow white. Pkt. 5c.

Canterbury Bell

Handsome, hardy biennial of stately growth; red in color and a profuse bloomer.

Large bell-shaped flowers.

1135. **Finest Mixed**—Pkt. over 100 seeds, 4c.

CELOSIA—See Coxcomb.

LARGE FLOWERING CINERARIA.

Cobea Scandens Of rapid growth and large size, with fine foliage. It is one of the most graceful of all annual climbers, large bell-shaped flowers of a beautiful violet hue, very fine for trellises, arbors and verandas, growing from 40 to 50 feet in a season. Also much used in the house. Plant seeds edgewise and cover slightly.

1170. Pkt. 8c.

Clematis Hardy, perennial climbers, well known and graceful; admired on account of their rapid growth and handsome blossoms. Fine for covering arbors, verandas, etc., as they climb very rapidly and cling readily to almost any object.

1171. **Flammula**—A luxuriant climber with clusters of small white, fragrant flowers in August and September. Sometimes called White Virgin's Bower. Pkt. 5c.

1172. **Virginiana** (Virgin's Bower)—A rapid climber growing 20 to 30 feet in a season; white blossoms. Pkt. 7c.

Coxcomb Highly ornamental plants, easily grown, producing large, bright crested heads of flowers, somewhat resembling a cock's comb. There are many shades and colors, but of all, the scarlets are the most brilliant and rich. Pkt. contains from 200 to 300 seeds.

1174. **Dwarf Mixed**—Large, solid heads of flowers. Pkt. 5c.

1175. **Glasgow Prize**—Very fine, brilliant. Pkt. 8c.

1176. **Giant Empress**—Mammoth, bright purple combs, lustrous foliage. Pkt. 10c.

Coleus One of the best known and most universally admired foliage plants in an endless variety of colors and shadings. Coleus seeds germinate very easily and no yard or collection of house plants should be without these beautiful plants. Tender perennial.

1178. **Sunset Strain**—Seeds saved from the largest leaved varieties only; mixture contains a wonderful variety, producing plants with large leaves of many shapes, shades and colors. One of the finest mixtures put up. Pkt. about 100 seeds, 10c.

1179. **Very Fine Mixed**—A very choice selection of the handsomest varieties. Pkt. about 100 seeds, 10c.

1180. **New Large-Leaved Varieties**—The seed for this mixture we import from one of the largest growers of Coleus in Germany. Seed is saved only from the new and richest varieties, with very large, superbly variegated foliage. Nothing finer in Coleus seed can be obtained. Pkt. about 75 seeds, 15c.

Columbine Well-known and much cultivated; very easy of culture, producing a magnificent display of handsome flowers. Hardy, herbaceous perennials, two to three feet high. 1181. Pkt. 4c.

Convolvulus As everyone knows, there are two varieties of Morning Glory, Convolvulus Minor being the dwarf variety, and Convolvulus Major being the tall-growing variety. Dwarf varieties are completely covered with a mass of brilliant blossoms at mid-day, which remain open in clear weather until evening.

1183. **Very Fine Mixed**—Pkt. about 40 seeds, 3c, oz. 10c.

1187. **Dwarf Mixed**—A very fine selection of the dwarf varieties. Pkt. about 50 seeds, 5c.

1188. **Tri-Color**—Bright blue, shaded to white; yellow throats. Pkt. about 40 seeds, 5c.

Cypress Vine A beautiful climber of rapid growth, with rose, scarlet and white blossoms. Tender annual, 15 feet high.

1198. **Finest Mixed**—Pkt. 30 seeds, 2c.

Tall Morning Glories A handsome showy climber, of easy culture and satisfactory for covering arbors, windows, trellises, old stumps, etc. It will grow in almost any soil, but will grow much faster if the ground is well cultivated and moderately rich.

1184. **Striped Flower**—This variety is striped and blotched with rich blue and rose. Pkt. 5c, oz. 10c.

1185. **Fine Mixed**—All of the best, tall-growing varieties, placed in mixture. Pkt. 5c.

1186. **Imperial Japanese**—This splendid new variety of Morning Glory is a most valuable addition to our list of summer climbers. The plants are very vigorous in growth and the foliage beautifully marked with various colors. The flowers are of immense size, with a wide range of colors from delicate tints to brilliant red and maroon. The vines will grow in a single season from 30 to 40 feet. Pkt. 5c, oz. 15c, 2 ozs. 25c.

Cosmos A plant of strong growth, having elegant foliage, and for fall blooming has no superior. Seeds sown in March, April or May, and transplanted in the open ground, will produce plants five to six feet high in September, and from then until November will be covered with hundreds of blossoms resembling single dahlias. They are of various shades of pure white, purple and crimson. Both foliage and flowers are unsurpassed for bouquets and vases. Pkts. contain from 50 to 150 seeds.

1190. **All Colors Mixed**—Pkt. 4c.

1191. **White**—Very handsome. Pkt. 5c.

1192. **New Yellow Cosmos**—(Klondike)—This variety, which came from Mexico, and is of recent introduction, produces magnificent bright yellow flowers $2\frac{1}{2}$ to 3 inches in diameter; a very handsome variety. Pkt. 50 seeds, 5c.

1194. **The New Mammoth Cosmos, or Giant of California**—This is a new variety of Cosmos; grows to a very large size and produces exceptionally fine flowers of immense size. Finest mixed, containing all colors. Pkt. 10c.

1195. **New Mammoth Fancy Cosmos**—It is impossible to describe the exquisite beauty of these new varieties. They embrace many shades of crimson and mauve, pure white and white delicately tinted and clouded. The flowers are extremely large and borne in great abundance. It is certainly a very desirable variety of Cosmos. Pkt. 10c, 3 pkts. 25c.

1189. **New Early Blooming Cosmos**—We have secured an early flowering variety which will produce plants that come into bloom the last of July and continue until the frost comes. A most desirable variety for planting in localities that have short seasons. Flowers range in color from pure white, through the shades of pink and deep crimson. Pkt. 5c.

Cyclamen Well-known and universally admired; tuberous-rooted plants, exceedingly handsome red and white flowers. Tender perennials, one foot high.

1199. **Giants of California**—Flowers of immense size. A good plant will produce 50 to 75 flowers the first season, from seed. All colors, crimson, rose, pink, white, with red center, mixed. Pkt. 15 seeds, 20c.

1196. **Persicum Mixed**—Very fine. Pkt. 25 seeds, 7c.

1197. **Giantcum**—Very large, producing beautiful large flowers. Pkt. 20 seeds, 8c.

Daisy The Daisy has been greatly improved by selection and careful cultivation. The plants are splendid bloomers in the house and splendid early spring and summer flowering when planted in a shady place.

1200. **Finest Mixed**—Double. Pkt. about 100 seeds, 5c.

1201. **New Snowball**—Double, very handsome. Pkt. 20 seeds, 7c.

Datura Very showy, large, branching plants, growing three to five feet high, bearing numerous trumpet-shaped flowers, six inches in length and very fragrant.

1203. **Cornucopia**—(Horn of Plenty)—Very handsome. Pkt. 20 seeds, 7c.

Dianthus Or **Chinese Pinks**—The China and Japan Pinks are deservedly very popular, as few flowers can equal them in beauty and profusion of bloom. They comprise many distinct and most beautifully marked varieties of rich and varied colors. They bloom continuously all summer and fall, until severe frosts; they live over winter and bloom freely again the next season. They are alike ornamental in the garden and for bouquets. Plants from 10 to 15 inches high and of the easiest culture. From 75 to 200 seeds in pkt.

1205. **Double Mixed**—Contains all the best varieties and is the most satisfactory way of growing plants. A great variety of colors, ranging from pure white to the most delicate pink and glowing, deep crimson. Pkt. 5c.

1206. **Page's Surpassing Mixed**—This is the finest mixture put up. Our seeds are grown for us by the most experienced growers. Only the choicest varieties put up in the mixture and it cannot but please. Pkt. 10c, 3 pkts. 25c.

1207. **Good Mixed**—This is as good as many of the so-called best. Pkt. 4c.

1209. **Dwarf Fireball**—The most brilliant Pink in cultivation. Plants covered with brilliant blossoms. Pkt. 5c.

1210. **Dwarf Snowball**—Lovely snow-white flowers. Very full and double. Pkt. 5c.

Dahlias Everyone knows and admires the Dahlia, but very few are aware that it can be grown as easily from seed as the Verbena. If planted early and pushed, they can be made to blossom the first season.

1211. **Finest Double Mixed**—Seeds saved only from the choicest double flowers. Pkt. about 35 seeds, 5c.

1212. **New Striped Single**—Brilliant flowers, running through a wide range of striking colors. Pkt. about 35 seeds, 5c.

1213. **Cactus**—A very handsome variety, which have petals which are quilled and curved loosely and gracefully. Finest colors mixed. Pkt. 10c.

1214. **Extra Choice Large Flowering Double**—This is a splendid strain, supplied from a large collection of perfectly double varieties. This collection contains a wide range of colors. Pkt. about 40 seeds, 10c.

For Bulbs, see under Summer Flowering Bulbs.

Eschscholtzia **California Poppy**—Hardy annual, growing one foot high, bearing a profusion of rich, yellow, orange and white flowers, about two inches in diameter, making a blaze of color in the sunshine. This is fully as valuable as the common Poppy and as easily grown. Pkts. contain from 300 to 400 seeds.

1215. **Bright Yellow**—Pkt. 5c.

1216. **Double White**—Very handsome. Pkt. 5c.

1217. **Mixed**—All colors. Pkt. 4c.

Forget-Me-Not An old favorite, bearing clusters of star-shaped blue flowers. It grows well in the shade and flowers freely the first season.

1220. Pkt. 5c.

Four O'clock So well known as to need no special description. Opens about 4 o'clock and remains open all night; will grow almost anywhere.

1222. **Finest Mixed**—Pkt. 4c.

Foxglove **Digitalis**—A valuable plant in every perennial garden. Flowers are thimble-shaped and very prettily spotted.

1234. Pkt. 5c.

Fuchsia **FUCHSIAS** are as easily grown from seed as from cuttings, and from seed many new and handsome varieties are obtained. Plants flower freely the first year, in the open ground, and if taken in the house in winter they will bloom until spring.

1225. **Trailing Fuchsias**—This species makes one of the prettiest trailing plants imaginable. While the flowers are rather small, the vines are of graceful habit, pretty leaves and bright red berries, which make a very pretty effect hanging over the side of a pot, basket or vase. Pkt. about 25 seeds, 15c.

1226. **Single and Double Mixed Seed**—Selected from the finest single and double varieties. Pkt. about 15 seeds, 10c.

French Marguerite—See under Chrysanthemums, No. 1166.

Gloxinia The Gloxinia is a grand flower and makes a lovely pot plant; as easily grown and cared for as many of the common flowers.

The handsome, bell-shaped flowers embrace a great variety of the richest colors, running from pure white to blood red, pink, blush, lavender, indigo blue, marbled and spotted. They will bloom in five months from time seed is sown. Erect, tall flowering Hybrids.

1228. **Mixed Seed**—Pkt. about 50 seeds, 7c.

1229. **Extra Choice**—Imported from Germany. Pkt. about 35 seeds, 10c.

Geranium The most popular plant grown. As easily grown from seed as Sweet Peas

1230. **Page's Superb Mixed** Pkt. about 25 seeds, 10c.

1231. **Good Mixed**—Pkt. about 25 seeds, 5c.

1232. **Pelargonium, or Lady Washington**—Pkt. 10 seeds, 15c

Gourds Rapid growing climbers, with curiously shaped and colored fruit—ten to thirty feet.

1235. **Hercules Club**—Largest of all varieties. Pkt. 5c.

1236. **Japanese Nest Egg**—Looks like an egg. Pkt. 5c.

1237. **Dipper**—Useful for dippers. Pkt. 5c.

1238. **Finest Mixed**—We have put up a very fine mixture, containing 10 different varieties of Gourds as follows: Orange, Japanese Nest Egg, Apple Shape, Pear Shape, Ringed, Bottle, Corsican, Dipper, Powder Horn and Hercules Club. Pkt. 5c, oz. 15c; 3 ozs. 35c.

Heliotrope A universal favorite. Everyone loves the delightful fragrance and beauty of the Heliotrope, but few are aware of the fact that it can be raised from seed as easily as the Verbena or Pansy, and will blossom the first year. We can furnish the following in separate colors.

Anna Turrell—Rich shade of violet blue. Pkt. 10c.

Black King—Dark purple, nearly black. Pkt. 10c.

Lady in White—Large clusters of spotless white. Pkt. 10c.

Dark Bouquet—Color deepest blue. Pkt. 10c.

The above varieties mixed, pkt. 10c.

1240. **Finest Mixed**—Pkt. about 100 seeds, 5c.

GYSOPHILA See **Angel's Breath**.

HELIANTHUS—See **Sunflower**.

Humulus Japonicus (**Japan Hop**)—A rapid growing, perfectly hardy, annual climber of the Hop family; of the easiest culture and indispensable for covering unsightly objects; also, very handsome for verandas, trellises, etc. Heat, drought and insects do not trouble it. Sows itself after the first year. Seed from our own growing, 30 to 50 feet in one season.

1241. Pkt. about 25 seeds, 5c.

Hollyhock

Those who have never grown the Hollyhock in its present state of cultivation have no idea how unlike it is to the parent of old times. Now it ranks with the Dahlia, Aster, etc., being exceedingly rich and varied in color, from deep yellow, red, rose, scarlet, flesh color, to pure white, also black. Hardy perennial five feet high.

1243. **Charter's Superb Double Mixed**—Pkt. 7c.

1242. **Double Allegheny Hollyhock**—This is a new variety which produces grand double flowers remarkable for their extra large size, novel forms and graceful arrangement. The flowers are produced in many rich colors. Pkt. 50 seeds, 6c.

Hyacinth Bean

A splendid climber, producing abundant clusters or spikes of double white flowers, which are followed by exceedingly ornamental seed pods. Tender, annual, 10 to 20 feet high.

1244. **Finest Mixed**—Pkt. 5c.

Ice Plant

A handsome and curious plant for hanging baskets, rock work and vases. The leaves and stems appear as covered with ice crystals.

1245. Pkt. about 300 seeds, 3c.

Ipomoea

An exceedingly rapid growing plant and climber. The foliage is ornamental and no vine is better for covering trellises, pillars or windows. Flowers large, attractive, and a great variety of colors.

1247. **Bona Nox**—(Good Night.) Large, beautiful violet flowers. Pkt. 4c.

1249. **Setose**—(Brazilian Morning Glory.) A new and distinct climber. Leaves large, flowers produced in clusters, two or three inches in diameter; very handsome. Pkt. 8c.

JAPANESE MORNING GLORY—(See under *Convolvulus*.)

Job's Tears

Curious ornamental grasses, with broad, corn-like leaves and seeds of light slate color. Valuable for the formation of winter bouquets in connection with everlasting flowers, and strings of handsome beads are made from the seeds. Hardy annual, three feet.

1250. Pkt. 5c.

Lantana

These plants are rapid growers, forming small, hardy shrubs, producing pink, yellow and white flowers in great abundance the first season, from seed. The plants may be taken up in the fall, well cut back and will bloom freely all winter.

1251. **Finest French Hybrids**—Pkt. 5c.

Lavender

The old-fashioned, sweet scented Lavender.

1252. Pkt. about 150 seeds, 4c.

Larkspur

Quick growing, free flowering annuals, producing branching spikes of beautiful flowers.

1255. **Double Dwarf Rocket**—Mixed. Pkt. 4c.

1257. **Tall Rocket Mixed**—Pkt. 4c.

1258. **Finest Mixed**—Nine varieties. Pkt. 3c.

Lobelia

These pretty, dwarf little plants are equally desirable for the open garden or hanging basket for summer, or for pot culture in winter.

1260. **Finest Mixed**—Pkt. 500 seeds, 4c.

Lemon Verbena

Half hardy shrub, with deliciously fragrant leaves; excellent pot plant as well as bedding plant.

1262. Pkt. 5c.

Marigold

When a rich display of flowers is desired the Marigold is almost indispensable. The French varieties are dwarf, growing from 8 to 10 inches high, while the African often grow to two feet. Hardy annuals, in bloom until frost.

1265. **Fragrant Double Mixed**—All varieties. Pkt. 5c.

1266. **Meteor**—Light yellow orange. Pkt. 5c.

1267. **The Eldorado**—(African.) Pkt. 5c.

1268. **Legion of Honor**—(French.) Pkt. 5c.

Mignonette

This deliciously fragrant annual is a favorite with all. Sown at intervals from early spring until summer, it will bloom until killed by frosts. Pkt. contains 250 to 500 seeds.

1270. **Mocket**—Of dwarf and vigorous growth. Massive spikes of rich flowers. Pkt. 5c.

1271. **Golden Queen**—Very fragrant, golden yellow flowers. Pkt. 5c.

1272. **Giant White**—The flower spikes of the largest size, pure white in color. Pkt. 5c.

1275. **Sweet**—A favorite with everyone. Pkt. 5c, oz. 10c, 2 ozs. 25c.

1276. **Parson's White**—Considered by many to be the very best white variety grown. Pkt. 5c, oz. 25c.

1273. **Choicest Mixed**—We have made a mixture of all the best varieties, which we offer in this special mixture. It will give a finer and more varied assortment than can be obtained in any other manner. Pkt. 5c.

Mimulus—Monkey Flower

Very large, beautiful, fully spotted blossoms, excellent for baskets or vases, yet thrives well in the open ground, if planted in partial shade. Pkt. contains about 200 seeds.

1277. **Finest Varieties**—Mixed. Pkt. 5c.

MOON FLOWERS—See *Ipomoea*.

MORNING GLORY—See *Convolvulus*.

Nasturtiums

The improved varieties of Nasturtiums are among the most popular and beautiful of our garden plants. We consider the Nasturtium one of the three most popular flowers grown from seed. In addition to their use in the garden or on trellises, we would strongly recommend planting them along fences, hedges, in out of the way corners and nooks, or wherever it is desirable to have bright colors in great profusion.

DWARF VARIETIES.

1279. **Page's Surprise Collection of Beautiful Nasturtiums**—For the past few years we have offered under the above name the very finest mixture of Nasturtiums that is possible to put up. This collection is put up by us and contains not only all of the well known varieties, but many of the newest and best sorts. Certainly no mixture can be better and we are sure that it always pleases our customers. We strongly recommend planting this mixture. Pkt. 30 seeds, 6c, pkt. 75 seeds, 10c, oz. 15c, 2 ozs. 25c, ¼ lb. 40c, ½ lb. 75c, lb. \$1.25.

1280. **Finest Mixture**—(15 kinds)—Pkt. 5c. oz. 10c, ¼ lb. 30c.

1281. **Good Mixture**—Much better than many of the so-called best mixtures. Pkt. about 40 seeds, 4c, oz. 8c, ¼ lb. 25c, ½ lb. 40c, lb. 75c.

 1285. **New Climbing Nasturtiums**—A most beautiful strain, flowering profusely and having a wide range of distinct colorings, embracing rose, pink, salmon, purple, violet, dark maroon, light yellow, deep orange, as well as striped and blotched in the most showy manner. The handsomest tall Nasturtium grown. Pkt. 5c, oz. 10c, 1/4 lb. 30c, 1/2 lb. 50c, lb. \$1.00.

Petunia

For out-of-door decoration or house culture, few plants equal the Petunia for effectiveness. They commence flowering early and continue to bloom throughout the entire season until killed by frost; easy of cultivation, only requiring rich soil and a sunny position.

1341. **Hybrids**—(Finest Mixed.) A splendid mixture, embracing all colors and shades, including striped and blotched varieties. Pkt. 250 seeds, 8c.

1344. **Double Petunia**—Finest selected, carefully fecundated with the best double flowers and will produce 30 to 50 per cent. of double flowering plants. Those that come single will be of the grandiflora type. Pkt. about 40 seeds, 10c.

1345. **Giants of California**—The largest flowering, richest colored variety in cultivation; single flowers often measure over five inches in diameter; ruffled or fringed on the edges and beautifully veined with various shades of purple, rose, lavender, yellow and crimson. Pkt. 100 seeds, 10c.

1348. **Fine Mixed**—This is a mixture, which we put up, containing the above varieties, also a liberal quantity of the striped and blotched varieties. The mixture contains a great many colors and markings, and for those who do not care for the very best, this mixture will please. Pkt. 7c. Varieties offered below put up 40 to 50 seeds in a packet.

1335. **Midnight**—Handsome, dark crimson. Pkt. 10c.

1336. **Snow Storm**—Pure White. Pkt. 10c.

1337. **Tutania**—Royal purple. Pkt. 10c.

1338. **Fancy Fringed Double**—This variety embraces a wider range of colors than any Petunia yet offered; they include all of the light shades as well as the dark, and we know of nothing finer in the way of Petunias than this variety. Pkt. 10c.

1346. **Lady of the Lake**—White, beautifully fringed and large sized, 25 to 40 per cent. of double flowers. Pkt. 15c.

Pansy

The Pansy is, we believe, the most popular of all flowering plants, excepting, perhaps, the Sweet Pea. It is needless for us to say anything in praise of such a universal favorite. We import our seed direct from Europe from the best growers of Pansy seed, and we can assure our customers that they will receive only the very best seed that is possible to be obtained. Pkts. contain from 100 to 300 seeds in the named varieties, mixed varieties from 300 to 1,000 seeds.

NAMED VARIETIES.

1300. **King of the Blacks**—Almost coal black; very large and handsome. Pkt. 5c.

1301. **Lord Beaconsfield**—Purple violet. Pkt. 5c.

1302. **Snow Queen or Snow Flake**—Pkt. 5c.

1303. **Meteor**—Rich mahogany. Pkt. 5c.

1304. **Peacock**—A lovely shade of blue. Pkt. 7c.

1305. **Sky Blue**—A rich shade of blue. Pkt. 6c.

1306. **Violet**—Flowers rich violet color. Pkt. 6c.

1307. **Gold Margined**—Pkt. 6c.

1309. **Fire King**—Bright reddish brown. Pkt. 6c.

1325. **Coquette de Poissy**—Handsome rosy-lilac, shading nearly to white on upper petals. Pkt. 10c.

1326. **President Carnot**—White and violet. Pkt. 10c.

1327. **English Pansy**—The true English Faced Pansy; very fine and showy. Pkt. 10c.

1328. **President McKinley**—Flowers extremely large, rich golden yellow, blotched. Pkt. 10c.

1329. **Fairy Queen**—Flowers large size and a delicate shade of azure blue, margined with a border of pure white. Pkt. 10c.

1313. **Pure Yellow**—Pkt. 5c.

MIXED VARIETIES.

Where one cannot afford to buy a selection of the named varieties, it is best to plant from some of the following mixtures:

1308. **Large Flowering Parisian**—A very handsome strain, producing a wide and varied range of magnificent colors. Pkt. 8c.

1310. **Bugnot's Very Large Stained**—Giant, flowering abundantly with beautiful markings and colors. Under favorable circumstances, will produce blossoms three inches across. Pkt. 10c, 3 pkts. 25c.

1311. **Improved Giant Trimardeau**—An entirely distinct and beautiful race. Flowers marked with three large blotches or spots. Pkt. 10c, 3 pkts. 25c.

1312. **New Striped or Mottled Large Flowering**—A new strain of Pansy from Germany. The colors and markings are very handsome, mostly of the lighter colors, but very gay. Pkt. 10c, 3 pkts. 25c.

1315. **Burpee's Defiance Mixed**—A large variety of colors, markings and shadings; flowers large sized. Pkt. 10c, 3 pkts. 25c.

1316. **Imperial German Mixed**—An extra fine mixture, embracing seeds of over 50 markings. Pkt. 10c, 3 pkts. 25c.

1317. **Extra Choice Mixed**—A mixture of many of the best varieties of English, French and German prize Pansies. Pkt. 10c, 3 pkts. 25c.

1318. **Page's Royal Show Pansy**—Under this name we have grouped together all of the best of the English, French and German varieties. We believe there is no collection offered which will produce a greater variety of shades, markings and colors or size of flowers, than this collection. Pkt. about 150 seeds, 15c, 2 pkts. 25c.

1321. **Five Mixed**—Contains many of the named varieties and is as good a mixture as many of the so-called fancy and choice advertised by some. Pkt. 5c, 6 pkts. 25c, 1/4 oz. 35c, 1/2 oz. 60c.

1322. **Good Mixed**—A mixture of the smaller flowering varieties. Pkt. 5c.

1323. **Page's Mammoth Pansy**—A mixture containing all the varieties and strains of the Mammoth Flowering Pansy. We have seen blossoms produced from these seeds that measure 3 1/4 inches across. They have a wide range of magnificent colors. Pkt. 15c, 2 pkts. 25c.

1324. **Ne Plus Ultra**—We have imported from one of the best German growers this mixture of Pansy seed, which they claim to be the finest mixture sent out, containing all the best blotched and stained Giant varieties. Pkt. 15c, 2 pkts. 25c.

Pansy--Sweet Scented.

All Pansy blossoms are more or less fragrant, though not as much so as the Violet. The fragrance of this variety is most noticeable on a close, still morning, or by gathering the flowers in the evening, placing them in water and covering them closely; when uncovered in the morning their fragrance is delightful.

1330. **Finest Mixed**—Pkt. 100 seeds, 5c.

Palm

The Palm is one of the most ornamental plants. Plants are all grown from seed. The large seed is very slow to germinate.

1331. **Fine Mixed**—Pkt. 10c.

Phlox Drummondii

Very pretty, free flowering annuals of quick growth. They will succeed under almost any condition, and are unequaled in their magnificent display of many brilliant colored flowers.

1350. **Alba Grandiflora**—Extra large size, pure white. Pkt. 5c.

1351. **Scarlet**—Black center, very showy. Pkt. 5c.

1352. **Starred and Fringed**—A very handsome and showy variety; all colors and shades. Pkt. 5c.

1354. **Splendens**—Bright red with white eyes. Pkt. 5c.

1353. **Finest Mixed**—Composed of the best of all the large-flowering varieties. Pkt. 5c.

Six pkts. of any of the above, 25c.

Phlox Perennial

The varieties of Perennial Phlox are among the choicest of our flowers for bedding and border plants. They are hardy and need no protection; will flourish in any soil, succeeding better, however, in deep, rich, rather moist ground

1355. **Finest Mixed**—Seeds from only the best sorts. Pkt. about 30 seeds, 5c.

Poppy

Wonderful improvements have been made in recent years in the development of the Poppy. No flower in our entire list will produce a more splendid display of colors during the entire summer than the Poppy. The seeds should be sown as early as possible in the spring, broadcast or in drills where the plants are to stand, as they are very difficult to transplant. Pkts. contain from one to five thousand seeds, according to variety.

1370. **Iceland Single Mixed**—Colors white and yellow, to the deepest glowing orange scarlet. Pkt. 5c.

1371. **Tulip Poppy**—Bright scarlet. Pkt. 5c.

1372. **The Chenango Poppy**—A very handsome variety of Poppy, containing every conceivable color, from purest white and yellow to the deepest orange and scarlet. Pkt. 7c.

1373. **The Shirley**—All colors from pure white to rose pink, carmine and deepest crimson. If cut when the flowers are first open, they may be kept many days in bouquets. Pkt. 5c.

1374. **Golden Gate Poppy**—Recall to mind every color you have ever seen in Poppies; then imagine every conceivable combination of color, striped, blotched, edged and bordered of both single, semi-double and double flowers, and you will have a faint idea of the wondrously varied beauty of the New Golden Gate Poppy. Pkt. 5c.

1375. **Fairy Poppy**—Another new variety of the Poppy, which is distinct from all others. The flowers are very large and perfectly double. The petals are elegantly fringed; of pure white, glowing scarlet, light lilac, scarlet and white, etc., making one of the handsomest varieties of Poppy grown. Pkt. 5c.

1377. **Double White Fringed**—This new variety is one of the finest white flowers in cultivation. The blooms measure from three to four inches in diameter, perfectly double, and the petals are so cut and arranged as to make it appear like a ball of silk yarn. It is a most excellent and handsome variety. Pkt. 5c.

1378. **Opium Poppy**—Fine, very large, white single flowers. Pkt. 4c.

1379. **Carnation Double Mixed**—For richness and variety of color the flowers are unequaled. Pkt. 4c, 3 pkts. 10c.

1380. **Surprise Chenango Poppy**—This is a beautiful variety of Poppy which we have sold for the last few years, and has given the best of satisfaction. They are wonderful free bloomers and it would seem almost impossible that there could be so many combinations of colors. It will be difficult for you to find two blooms alike. Pkt. 8c, 2 pkts. 15c.

1381. **New Fayal Poppy**—We obtain the seed of this variety from California and, like the above variety, it blooms in every conceivable shade of red, pink, maroon, white, both double and single, large and small flowers. Pkt. 8c, 2 pkts. 15c.

1369. **Page's Grand Mixed**—We have placed together in mixture all of the separate colors which we list, together with many other choice varieties, which we do not list separately. For dazzling display, richness and variety of color, this combination cannot be surpassed. We strongly recommend our customers to buy liberally of this grand mixture, feeling sure that they will be repaid in the abundance of bloom from early summer until late in the fall, Pkt. over 1,000 seeds, 10c, 3 pkts. 25c.

Portulaca.

There is scarcely any flower in cultivation that makes such a dazzling display of colors as a bed of Portulacas. They are in bloom from about the first of July until killed by the frost in autumn. Tender annuals, six to eight inches high.

1382. **Finest Mixed**—Pkt. about 400 seeds, 4c.

1383. **Finest Single Mixed**—Pkt. about 300 seeds, 4c.

1384. **Finest Double Mixed**—Pkt. about 200 seeds, 5c.

Primula Obconica.

A very beautiful and, as near as possible, an ever-blooming plant. It has been known to flower over 12 months without a break. Flowers pure white, shading to lilac, and have the true Primrose fragrance.

1395. Pkt. about 40 seeds, 5c.

Primula Forbesi.

(Baby Primula.) This is a very handsome, new variety, which is easily grown from seed. It will bloom in about three months after sowing and continues in flower continuously from eight to ten months. Flowers are borne on

long stems, each plant throwing up from 20 to 50 flower stems.

1387. Pkt. 50 seeds, 12c.

Primula Sinensis.

(Chinese Primrose.)

They are, perhaps, the most desirable of all house-blooming plants. They are in almost constant bloom all winter, and, if the plants are transferred to the border, they will bloom nearly all summer. Though perennial, new plants flower more freely and seed should be sown every year.

Many people seem to think that Primulas are successfully grown only in the greenhouse, hence amateurs are often reluctant about attempting their culture, but they are as easily grown as any plant we know of. Seed should be sown in shallow boxes or pans of very fine dirt, composed of $\frac{1}{4}$ wood's dirt or good, fine dirt from the chip yard, $\frac{1}{4}$ sand and $\frac{1}{2}$ good garden dirt, all thoroughly mixed and sifted. Sow the seed on top of the soil, then press the dirt with the hand or small flat board and, if possible, scatter over the whole a little fine moss. Keep dirt and moss well wet until the seedlings are well started and, as soon as they can be handled, transplant into other boxes or small jars.

1390. **Single Fringed Mixed**—Choicest selection from fringed varieties. Pkt. 30 seeds, 10c.

1392. **Double Mixed**—Very choice. Pkt. about 15 seeds, 10c.

1393. **Fern-Leaved White**—A very choice and handsome variety. Pkt. 10c.

1394. **Single Bright Red**—Very handsome. Pkt. 10c.

1396. **Splendid Mixed**—Large flowering. A grand mixture containing all the single and double varieties. Pkt. about 75 seeds, 15c.

1397. **Good Mixed**—Pkt. 10c.

1398. **Extra Choice Mixed**—This is the finest mixture of the Primula to be obtained. We put this

up ourselves and it is composed of the following varieties: Double Crimson, Double White, Double Red, Single Blue, Single White, Single Bright Rose, Single Scarlet. It also contains seed of all the Fern-Leaved varieties. This mixture cannot help but please. Pkt. about 50 seeds, 25c, $\frac{1}{2}$ pkt. 15c.

Salpiglossis A very showy and beautiful border plant with richly colored, erect funnel-shaped flowers; blossoms from August to October.

1399. **Finest Mixed**—All colors. Pkt. 5c.

Salvia Flowering Sage—Very ornamental; flowers borne on long spikes. Blossoms from seed the first season.

1425. **Salvia Splendens**—One of the finest plants in cultivation; a bed of them surpasses the finest scarlet Geraniums in brilliancy and continuous bloom. Flower spikes have been measured 10 to 12 inches in length. A well developed plant will often produce 200 spikes. Pkt. 5c.

1426. **Salvia, Golden-Leaved**—This variety has rich, yellow leaves contrasting beautifully with the brilliant scarlet flowers. Pkt. 10c.

1427. **New Salvia Silver Spot**—A distinct novelty, the distinctive feature of which is its strikingly handsome, spotted foliage. The leaves are dark green with cream colored spots. The brilliant scarlet flowers are large and contrast very handsomely with the foliage. Pkt. 15c.

Sensitive Plant A Sensitive Plant is very chaste and elegant in foliage and affords much amusement by its sensitive character; even when slightly touched the leaves instantly close and droop.

1429. **Mimosa Pudica**—(Sensitive Plant.) Pkt. 5c.

Smilax So well known as to need no description. No twining plant in cultivation surpasses this for beauty of the foliage. The seeds are very slow to germinate, often requiring three months.

1400. Pkt. over 100 seeds, 7c.

Snaptadragon An old and well known border plant, with dark glossy leaves, large curiously shaped flowers, with finely marked throats. They have been much improved of late years by careful selection. They blossom the first season from seed sown in the spring. Tender perennials. One and one-half to two feet high.

1401. **Fine Mixed**—All the best colors. Pkt. 5c.

Stocks All the varieties are desirable as pot plants, as well as in the open ground. They are greatly prized as cut flowers, on account of their fragrance and diversity of color. To have a continuous succession of bloom, sow from the beginning of March to the end of May. Pkt. contains from 150 to 200 seeds.

1406. **Double German, Ten Weeks**—Very finest mixed. Pkt. 5c.

1407. **Double German, Ten Weeks**—Pure white; large. Pkt. 10c, 3 pkts. 25c.

1408. **Giant California Stock**—This is a splendid variety, growing very large, with immense spikes of double flowers, of great beauty and substance. Pure white. Pkt. 10c, 3 pkts. 25c.

1409. **Giant California Stock**—Same as preceding, but all colors mixed. Pkt. 7c.

1410. **White Perpetual**—(Princess Alice or Cut and Come Again.) Of fine growth and fine branching habits. Grows to a height of one and a half feet, and, if sown early, will produce uninterruptedly a great abundance of bloom from June until November. The individual flowers are uncommonly large, of a fine rosette-like shape and the purest possible white. The flowers appear on each little shoot and the oftener they are cut the better they seem to like it. Pkt. about 50 seeds, 7c.

Sunflower Of stately growth, much used as a background or as a screen to hide unsightly places. The dwarf varieties bloom very freely and are much used.

1412. **Large Russian**—Grows to six or eight feet high. Pkt. 3c, oz. 8c, lb. 25c.

1413. **Dwarf or Miniature Sunflower**—A handsome plant growing to a height of four to five feet and covered with hundreds of small sized, double, bright, orange-colored flowers. Pkt. 5c, oz. 20c.

1414. **New Sunflower Stella**—This beautiful new variety from Germany differs from the other varieties of sunflower by its larger single flowers of a circular form and purest golden yellow, each with a black disc. It is covered with finely formed flowers, which are about three or four inches across and are borne on long stems, which rise well above the foliage. Pkt. 5c.

Sweet William. For display in the garden, the Sweet William is unsurpassed. The seed can be planted very early in the spring in the open ground and will blossom the following summer, or it may be sown in August and will make fine blooming plants for spring. Hardy perennial, 1½ feet high.
1600. **Finest Mixed**—Pkt. about 100 seeds, 4c.

Verbena. Verbenas in quantity are more easily obtained from seed than from cuttings and the plants are more healthy and vigorous in growth, while they are, also, fragrant, particularly in the white and light colored varieties. Sown in the spring, they bloom quite early in the season, and each plant, in good rich soil, will cover a space three feet in diameter, producing, if the flowers are cut as soon as they begin to fade, a mass of blossoms, until they are killed by the frost. The seed germinate very unevenly, some of them not coming up from three to four weeks after the others. Our pkts. contain from 75 to 250 seeds each.
1610. **Pure White**—Very large, white flowers. Pkt. 7c.
1615. **Bright Scarlet**—Rich and handsome. Pkt. 7c.
1617. **Blue**—All shades of blue. Pkt. 7c.
1618. **Italian Striped**—Very showy, many colors. Pkt. 8c.
1619. **New Mammoth Verbena of California**—This is a new variety of immense size, which we received from California. The range of color is large, and, altogether, it is the finest Verbena grown. Pkt. about 75 seeds, 5c.
1620. **Finest Mixed**—All colors. Pkt. 5c.
1623. **Good Mixed**—Many colors. Pkt. 4c.

Violet. Well known, free flowering, hardy perennial, easily grown from seed; succeeds best in partially shaded, moist situations. Height about six inches.
1626. **Sweet-Scented**—Flowers blue. Fragrant. Pkt. 10c.

Wall Flower. Spikes of deliciously fragrant, double flowers, combining many shades of color, chocolate, orange and purple predominating.

1627. **Choice Single Mixed**—Pkt. 4c.

Zinnia. No flowers are more easily grown from seed sown in the open ground, and few bloom so continuously throughout the entire summer. Those acquainted only with the old-time Zinnias will be surprised at the perfection which the newer strains have attained as now grown. Pkts. contain from 50 to 150 seeds.

1631. **Double Lilliput**—Dwarf, compact bushes, bearing small, perfectly double flowers of the brightest colors. Bloom during the entire summer. Pkt. 5c.

1633. **Snowball**—Very handsome, dwarf plants; flowers large, double and purest snow white. Pkt. 6c.

1636. **Fireball**—The same as Snowball, except that the flowers are fiery scarlet. Pkt. 6c.

1638. **Choice Mixed**—All colors; very fine. Pkt. 4c.

1639. **Double Yellow**—Very handsome. Pkt. 5c.

1640. **Double Scarlet**—Very brilliant and showy. Pkt. 5c.

Wild Flower.

Garden Mixture.

Containing about 100 varieties of easy growing and pretty flowers, suitable for outdoor sowing, and will give a continuous display of bloom during the entire summer.

1700. Pkt. about 400 seeds, 5c, oz. 12c, ¼ lb. 40c, 1b. \$1.50.

SPECIAL BOOK OFFER.

We offer to our customers 10,000 copies of a most excellent book, entitled

"A COMPREHENSIVE GUIDE TO FLORICULTURE AND MONTHLY CALENDAR OF OPERATIONS."

This book is 7x10 inches, 58 pages, paper covers, and has always sold for 25 cents a copy. To any one sending us an order this season we will send this book by mail, prepaid, for the small price of

10 CENTS,

which does not pay for the cost of printing and postage. It is a most excellent guide for anyone growing or having any kind of house or outdoor plants, roses, vines, shrubbery or trees. It contains rules for sowing and caring for all kinds of seeds, potting and caring for plants, also directions for propagating, watering, syringing, training and stimulating plants. Several pages are devoted to the time required for the different varieties of seeds to germinate. Insects and remedies is also a valuable and interesting chapter.

The monthly guide, and just what to do each month in the year, is worth several times the cost of the book.

Sweet Peas.

The most popular tall growing flower in cultivation. It is wonderful to note the changes that have taken place within the last few years, both in regard to the flower itself and to its popularity. It is but a few years ago that there were but a few varieties, mostly small blossoms produced on short stems. Now the varieties are almost endless, ranging through all colors and shades. Plants strong and thrifty, producing large blossoms on long stiff stems. The demand has increased from a few hundred pounds to many hundred tons. There are now hundreds of acres devoted to growing Sweet Pea Seed. We do not endeavor to offer the entire list of varieties, but take the best only of the different colors. Othello is considered the best maroon-colored

Sweet Pea. What is the use of listing ten or fifteen varieties not so good? All at the uniform price of Pkt. 4c, oz. 8c, 1-4 lb. 20c, 1-2 lb. 30c, 1b. 50c.

WHITE.

1504. **Blanche Burpee**—Flowers pure white, three and four on a stem, of extra size and handsome shape.

1518. **Emily Henderson**—The most popular white Sweet Pea grown. Flowers pure white, borne in threes on long stems, in great profusion.

1505. **The Bride**—The flowers are practically the same as Blanche Burpee, but the stems are more tender and the flowers more gracefully poised.

1544. **Sadie Burpee**—A black seeded, white Sweet Pea has long been desired, on account of their greater hardiness and better germinating qualities. While this is a white Sweet Pea, yet sometimes there will be a faint pinkish tinge in the blossoms; a most excellent variety.

LIGHT SHADES OF PINK.

1530. **Katherine Tracy**—We consider this one of the handsomest pink Sweet Peas grown. The color is a soft but brilliant pink. The plants are strong and give a wonderful profusion of flowers, which continue until the end of the season.

1531. **Lady Beaconsfield**—A large, handsomely formed flower; the standard is bright but delicate salmon-pink, while the wings are primrose-yellow.

1547. **Romona**—White, striped with light pink; large, finely formed flowers.

1517. **Modesty**—A new variety, with large flowers borne on long stems. Color soft, bluish pink.

1528. **Hon. F. Bouverie**—Soft, pinkish salmon at base of standard, wings shading to a lighter salmon-buff at the edges. Good size, good form, three blooms on a stem.

1535. **Lovely**—A most beautiful shade of soft, shell pink, shading to faint rose at the outer edges. Grand flowers of large size; most aptly named.

1548. **Prima Donna**—A light but bright shade of bluish pink. Flowers are of large size, fine form and frequently come four on a stem.

DARKER SHADES OF PINK.

1500. **Apple Blossom**—Bright, rosy pink, blended with white.

1550. **Royal Rose**—Standards a deep rose shade with light pink centers. Blossoms extremely large and handsome.

1543. **Prince of Wales**—Large flowers of a deep rosy tint, frequently producing four on a stem. This is one of Eckford's finest introductions.

SHADES OF RED.

1508. **Brilliant**—This variety supplies the need for a brilliant scarlet Sweet Pea of the improved form. The flowers are large size, borne three on a stem and retain their brilliancy of color even during the hottest weather.

1524. **Salopian**—Pure cardinal, the best type of this shade. It is a shade deeper than Mars or Firefly; a very choice variety.

1525. **Mars**—Bright crimson-scarlet with extra large blossoms; a very handsome and brilliant variety.

CLARET AND MAROON.

1506. **Shazada**—Flowers of large size; rich dark maroon with a slight tint of purple in the center.

1521. **Captivation**—A distinct coloring in Sweet Peas; flowers large and a beautiful magenta or bright claret shade. Very handsome.

1542. **Othello**—The deep maroon flowers are of large size, of excellent form; very dark and rich.

1519. **Black Knight**—Extremely large size, very dark claret with brownish purple; the effect is very dark and rich in coloring, turning almost black when fully opened.

LAVENDER AND LIGHT BLUE.

1509. **Butterfly**—Standard a combination of shades of violet and lavender; wings white shaded and tinted with blue.

1511. **Coquette**—Standard a light violet shade of primrose with a primrose center. Choice and beautiful.

1534. **Lotty Eckford**—Large, silvery white flowers, shaded and tinged with lavender.

1512. **Admiration**—Flowers of large size, color a delicate shade of rosy lavender.

1537. **Maid of Honor**—The flowers are a beautiful shade of light blue with a white ground, and boldly edged with a narrow border of deep, rich violet. Very dainty and showy.

BLUE AND PURPLE.

1514. **Capt. of the Blues**—A most distinct, large flowering variety; flowers a bright purplish blue, wings a lighter shade.

1516. **Navy Blue**—A distinct novelty of recent introduction and claimed to be the only, really true blue Sweet Pea grown.

SWEET PEAS.—Continued.**PINK AND WHITE.**

1520. **Extra Early Blanche Ferry**—An extra early variety, which comes into full bloom fully two weeks before other varieties. Rosy-pink standards with white edges.

1503. **Blanche Ferry**—The same as the Extra Early Blanche Ferry, but later in blooming; it is also a taller growing variety.

1546. **Sensation**—Large flowers, borne three and four on a stem; white suffused with a faint blush pink.

YELLOW.

1536. **Mrs. Eckford**—Pale, primrose yellow.

STRIPED AND VARIEGATED.

1501. **America**—White, nearly covered with splashes and dots of exceedingly bright carmine.

1502. **Aurora**—Flowers very large, borne three or four on long stems; color white, flaked with orange salmon.

1526. **Gaiety**—Wings and standards beautifully marked with strips of bright crimson on white.

1527. **Gray Friar**—Entirely unlike any other Sweet Pea grown; delicate mauve, tinged with a darker shade.

1529. **Juanita**—(Pronounced Wah-nee-ta.) Also sometimes called Striped Celestial. Flowers pure white with stripes and dashes of pale lavender.

1522. **Gorgeous**—Flowers good size, color salmon-orange veined with a darker shade. The coloring is most glowing and effective.

Price except as noted for above varieties. Pkt. 4c, oz. 8c, 1-4 lb. 20c, 1-2 lb. 30c, 1b. 50c.

MIXED VARIETIES OF SWEET PEAS.

For those who do not have room or desire to grow the named varieties separately, we offer these various mixtures, feeling sure that no one can obtain a better variety from any other seedsman.

1570. **Celebrated Beauty Collection** This is a collection of the choicest varieties of Sweet Peas. It contains all of the standard and well known varieties, as well as all of the new varieties and novelties. This collection contains this year between 75 and 100 distinct varieties, in all colors and shades. Pkt. 5c, oz. 12c, $\frac{1}{4}$ lb. 35c, $\frac{1}{2}$ lb. 60c, 1b. \$1.00.

1571. **Extra Superfine 1903 Mixture**—This very fine mixture is exceeded only by the Celebrated Beauty Collection. This contains all of the best of the standard varieties, with a goodly number of the Eckford's and a few of the novelties. Pkt. 4c, oz. 10c, $\frac{1}{4}$ lb. 25c, 1b. 75c.

1572. **Eckford's Choice Mixed**—Contains a beautiful assortment of the famous Eckford's Sweet Peas; a very fine mixture and is sure to please. Pkt. 4c, oz. 8c, $\frac{1}{4}$ lb. 20c, 1b. 60c.

1575. **Choice Mixed**—A first-class, cheap assortment put up in the right proportions of the various colors to make a brilliant show. We consider it the best mixture on the market for anywhere near the price. Pkt. 4c, oz. 6c, $\frac{1}{4}$ lb. 15c, 1b. 50c.

1578. **Good Mixed**—We cannot recommend this cheap mixture, and yet we sell thousands of pkts. of it every year. Contains many varieties. Pkt. 3c, oz. 5c, $\frac{1}{4}$ lb. 12c, $\frac{1}{2}$ lb. 20c, 1b. 40c.

1579. **Cheap Mixed**—A mixture at a very low price and it oftentimes contains many of the standard varieties. It is put up for those desiring Sweet Peas at a low price. $\frac{1}{4}$ lb. 10c, $\frac{1}{2}$ lb. 15c, 1b. 30c.

Red, White and Blue Mixture—We have put up a special mixture for this season, which consists of red, white and blue varieties in mixture. It contains no other colors except these three. Oz. 10c, $\frac{1}{4}$ lb. 20c, $\frac{1}{2}$ lb. 30c, 1b. 50c.

White, Pink and Yellow Mixture—Another mixture put up of these three colors, which will produce a very handsome display. Oz. 10c, $\frac{1}{4}$ lb. 20c, $\frac{1}{2}$ lb. 30c, 1b. 50c.

BUSH SWEET PEAS.

Last season we offered, for the first, a new variety of Bush Sweet Peas. These are most excellent for growing in rows or hedges, where no support is used. This season we offer three of the most distinct and best varieties.

1552. **Gray Friar Bush**—Color of flowers a delicate mauve, tinged and marbled with a darker shade.

1553. **Monarch Bush**—Fine, large flowers, generally three in a cluster. Rich deep claret or nearly brown, with wings of a rich purple.

1554. **Senator Bush**—A choice variety, delicate lavender, nearly covered with stripes and dashes of purple mauve. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 30c, $\frac{1}{2}$ lb. 50c, 1b. 85c.

Cupid Sweet Peas—Dwarf growing, suitable for borders or for pot plants.

1562. **Finest Mixed**—All varieties. Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c, $\frac{1}{2}$ lb. 40c, 1b. 75c.

Double Sweet Peas—Not so pretty as the other varieties, yet used to some extent.

1580. **Double White.**

1581. **Double Boreatton.**

Pkt. 5c, oz. 10c, $\frac{1}{4}$ lb. 25c, $\frac{1}{2}$ lb. 40c.

1 oz. **Celebrated Beauty Collection.**

NINE CHOICE VARIETIES, ONLY 50 CENTS

Each Variety Put Up in a Separate Package

BE SURE AND INCLUDE THIS SPECIAL OFFER IN YOUR ORDER

PLANTS.

One not familiar with the business would hardly believe the immense business that is done in this department, namely, plants by mail. We send plants to every state in the Union, also over a large portion of Canada, and have sent orders to England. Sending plants 3,000 miles safely by mail would have been an impossibility a few years ago, but now, with fast express trains, excellent mail service, city and rural free deliveries, plants reach their destination without even being wilted. Our plants are packed in moss, wrapped in oiled paper, to retain moisture, and mailed in wax-lined boxes, except very small orders for plants, which are sometimes sent in a cardboard roll. We give copies of four letters only from many we have received.

The three Carnations you sent were received in very fine shape. I have never received plants packed better, very seldom as well.—Mrs. E. M. ALLEN, Otterdale, Va.

The Clematis came yesterday in fine shape.—Mrs. SPEARS, Tallula, Ill.

Plants sent gave entire satisfaction.—Mrs. BUCKNER, Maxwell, Tenn.

Plants received in excellent condition. Not even wilted. This seems almost remarkable considering the distance.—Mrs. JOHN BATES, Florist, L—, Calif.

Asparagus.

ASPARGUS SPRENGERI.

Asparagus Plumosus (Climbing Lace Fern).—A beautiful climbing plant with delicate, bright green foliage, gracefully arched and as finely woven as the finest silken meshes. It is an extremely easy plant to grow and will stand a large amount of neglect, but responds handsomely to good care and cultivation. If allowed to grow freely, and is not cut back, it will grow to a height of from 10 to 15 feet. For decoration the sprays are almost

indispensable, retaining their freshness for weeks after being cut. 15c each, 2 for 25c. Large sized plants 25c, 35c and 50c each, according to size, prepaid.

Asparagus Sprengeri.—A beautiful new variety of this graceful class of plants for house decoration. It is especially adapted for hanging baskets, where it makes a graceful, drooping plant, with branches 4 to 5 feet long. It is easily managed and will grow in almost any position. 10c each, 3 for 25c. Large size, 25c each.

Abutilons.

Souvenir de Bonn.—A very handsome variegated-leaved plant, quite distinct from every other variety of Abutilons. Foliage deep green, edged with pure white bands. Flowers bright orange, veined with crimson. 10c each, 3 for 25c.

Eclipse.—Of trailing habit; foliage beautifully marked with deep green and orange. Flowers bright yellow with crimson throats. 10c each.

Golden Fleece.—Flowers bright, golden yellow, a continuous bloomer. 10c each, 3 for 25c.

Splendens.—Plants of rather dwarf habits; flowers deep red. 10c each, 3 for 25c.

Enfanta Eulalie.—A most excellent variety for pot culture. Plants grow compact, forming a neat, bushy plant. Flowers are large and of a delicate satiny pink color; remarkably free bloomer, both summer and winter. 10c each, 3 for 25c.

Thompsonii Plena.—Double orange flowers; foliage variegated yellow and green. 10c each, 3 for 25c.

Savitzii.—A Japanese variety that is bound to become a popular decorating plant, as its perfectly variegated green and white foliage contrasts nicely with any other plants with which it may be placed. The growth is dwarf and very compact, making a fine pot plant for house culture. 15c, 2 for 25c.

Flowering Begonias.

Alba Picta.—Leaves a glossy green, spotted with silvery white; flowers white.

Argentea Guttata.—An extremely handsome variety with purplish bronze oblong leaves with silvery markings; white flowers.

Erfordia.—A continuous bloomer, compact form, shiny green foliage, with clusters of rosy, salmon flowers.

Otto Hacker.—A strong, vigorous grower with large green leaves 8 to 10 inches long; flowers bright coral red.

Purity.—The finest white Begonia grown; should be in every plant collection.

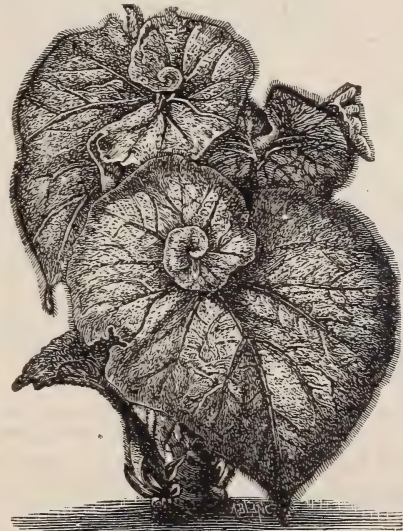

Rubra.—Flowers a rich coral red.

Vernon.—An excellent plant for bedding; nothing more showy for summer beds.

Vulcan.—Similar to the Vernon in every respect, except that the flowers are an intense scarlet.

Price 10c each, 3 for 25c, 7 for 50c. Our choice of varieties, 4 for 25c, postpaid.

Rex Begonias.—Remarkable for their rich and varied markings of the foliage. Well adapted for decorating purposes and will thrive in any window that does not receive the direct sunlight. We have 6 choice varieties as follows:

WONDERFUL OR CORK SCREW.

Bertha McGregor.—Silver outlined with bronze.

Louise Closson.—Very rich coloring.

Enfant de Nancy.—Distinct and handsome.

Mrs. Cleveland.—Large and rich.

Painted Lady.—Handsomely colored.

Wonderful or Cork Screw.—Shading very beautiful, pronounced whorl to top of leaf.

15c each, 2 for 25c, 4 for 50c.

Assorted Rex Begonias.

We send out a fine collection of 6 Rex Begonias, all different, not named, handsome varieties for the low price of 50c. Not less than full collection sold, and varieties must be left to us.

Cannas.

See Summer Flowering Bulbs.

Carnations.

The **Carnation** is one of the most popular flowers grown today and, next to the Rose, is most sought after. Carnations are easily grown in the house or out-of-doors. We offer a choice selection of the very best varieties.

Flora Hill—The best of all white Carnations.

Gold Nugget—A clear, deep yellow, slightly marked with red.

Jubilee—Color an intense scarlet; very large flowers on long, slender but stiff stems.

Triumph—A rich, purple pink, a little darker than Wm. Scott; flowers often measure $3\frac{1}{2}$ inches across.

THREE SPECIAL CARNATIONS 30c.

We offer below a collection of three of the very choicest Carnations grown. All new varieties.

Mrs. Lawson—This is the carnation that has caused such a sensation; \$30,000.00 was paid for this carnation by a party in Boston. Color pure rose pink, bloom large size on long stem.

Gen. Maceo—The richest dark colored carnation; color dark crimson maroon. Flowers good size, produced freely on long, stiff stems.

Prosperity—Distinct in color from any other variety, the ground color being pure white overlaid with pink mottles. Flowers of immense size, measuring 3 to 4 inches in diameter. 15c each, or all three varieties for 30c.

Chrysanthemums.

"The Queen of Autumn Flowers." Nothing compares with Chrysanthemums in gorgeous array of color or freedom of bloom. They may be planted any time from spring to July, and make fine sized flowering plants by fall. Give them plenty of room (two feet apart is none too much) and good rich soil; plenty of moisture and sunshine, and success is assured. As they flower only on terminal branches the tips of the young plants should be pinched out when 5 to 6 inches high, to make them branch freely. If desired for indoor blooming they should be lifted in September and potted. Give a thorough watering and set in a shady place for a few days, afterward expose them to the full light.

WHITE.

Timothy Eaton—Has created a greater sensation among florists than any introduction in years. Blooms large size, globular shape, pure white.

Ivory—Excellent for pot culture or cutting. Flowers of fine form and finish, pure white, long stems.

Snow Queen—One of the best white varieties. The flowers are snow white, large and full to the center. Deep green foliage.

PINK.

Superba—A most excellent bright flower. Flowers very double, with high rounded center.

Mrs. E. G. Hill—An early variety, pronounced by experts to be almost perfect in form, color and growth.

Maud Dean—Probably the most popular pink variety. An extra good grower, making long stout stems with beautiful foliage. Flowers extra large.

RED.

Geo. W. Childs—Rich velvety crimson, excellent for pot culture. The most popular red flowering variety.

Fisher's Torch—Bright fine red, the richest shade in Chrysanthemums, large, fine flowers.

YELLOW.

Golden Wedding—Considered by many the finest golden yellow variety grown. Color bright yellow, large globular flowers, vigorous grower.

J. A. Lager—Reflexed, of great depth. Petals long and twisted, open at the end, of beautiful pure yellow.

Price—Customers selection, 10c each, 3 for 25c, 7 for 50. Our selection, 4 for 25c, 9 for 50c.

Coleus.

There is nothing in the line of bedding plants that can take the place of Coleus. Used largely with Geraniums, also for planting in solid beds or clumps, or as edge to Canna beds, etc.

Beckwith's Gem. A beautiful fancy colored variety. The center of the leaf is dark velvety maroon, bordered with fiery red, edge green to creamy; yellow at point of leaf.

Fire King—Velvety crimson, shaded fiery red.

Golden Bedder—Clear yellow when well developed.

Verschafeltii—One of the best for bedding; rich velvety crimson foliage.

Climax—Red, chocolate and green, the colors overlapping each other.

10c each, 4 for 30c, 12 for 75c.

Mixed varieties, unnamed, choice collection; 4 for 25c, 9 for 50c, 20 for \$1.00; by express, \$4.00 per 100.

Callas.

Little Gem—Also called Tom Thumb. A miniature form of white Calla Lily, seldom growing over 10 to 12 inches high. Blooms continually when once established. Each 15c, 2 for 25c, 5 for 50c.

Spotted Calla—A very pretty variety, flowers pure white, shaded inside. The leaves are beautifully spotted, yellow and creamy white. Each 15c, 2 for 25c, 5 for 50c.

Ethiopica, or White Calla Lily—Always a favorite because of its easy culture, waxy white flowers, and healthy green foliage. Each 15c, 2 for 25c, 5 for 50c.

One each of the above three callas, 40c, 2 each 60c.

Cobea Scandens.

Cobea Scandens—A beautiful climber of rapid growth, large purple bell-shaped flowers; will grow 30 to 40 feet in a season. Strong plants 10c each, 3 for 25c.

Cyperus Alternifolius or Umbrella Plants—A very pretty, graceful, rapid growing plant. Each 15c, 2 for 25c.

DAHLIAS—See Summer Flowering Bulbs.

Ferns.

No window, garden or conservatory is complete without a collection of graceful Ferns. We offer a list of the most popular varieties and those most suitable for house culture.

Adiantum Cuneatum—The well-known and popular Maiden Hair Fern; especially adapted for jardinières where its graceful, lace-like foliage shows to its best advantage. 15c each, 2 for 25c.

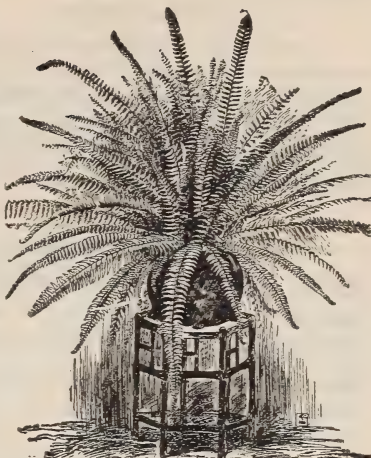

Pteris Tremula—A very rapid growing Fern, making handsome specimens in a very short time. 15c each, 2 for 25c.

Pteris Argyrea—A very strong growing Fern with variegated foliage. Fronds light green with a broad band of silver white down the center of each. 15c each, 2 for 25c.

Davillia Stricta—One of the finest Ferns in cultivation, doing well in almost any position. The Fronds are of a strong texture and a beautiful shade of green. 15c each, 2 for 25c.

Boston Fern—This Fern originated in the vicinity of Boston, hence its name. It is a great improvement over the common Sword Ferns, having longer fronds, often exceeding four feet in length. It is sometimes called the Fountain Fern. Strong plants 15c each, 2 for 25c.

New Sword Fern (Nephrolepis Cordata Compacta)—Considered by many the finest of all Sword Ferns. The fronds are of a dark green color and upright growth, with just sufficient arched stems to make them graceful. 15c each, 2 for 25c.

SWORD FERN.

Fuchsias.

Handsome free flowering plants, especially adapted for potted plants, also used largely for outdoor bedding. Our list has been carefully selected and contains the best of the newer and standard varieties.

Black Prince—A very choice variety, color a reddish rose carmine.

Elm City—Free flowering, double; rich crimson.

Phenomenal—Extra large, double; purple and crimson.

Rosain's Patrie—An early, free blooming, double white variety; tubes and sepals rosy carmine.

Madam Bruant—Dark heliotrope and rose.

Storm King—Extra large size; bluish white with crimson.

Trailing Queen—A handsome trailing or running variety; scarlet and violet.

Madam Carnot—Free flowering, large size; scarlet, red and white.

10c each, 3 for 25c, 7 for 50c.

GERANIUMS.

Geraniums.

So well known that they need no description. New varieties are produced from time to time, and from them we have selected the following list, as among the very best.

Madam Bruant—An extremely handsome variety; flowers large, of fine shape, center white veined with carmine lake; it is an excellent pot variety, being a constant bloomer. 15c each.

Madam Barney—An extremely handsome plant; color bright clear rose. 15c each.

Madam Laundry—A remarkable free blooming plant, being in bloom almost continuously; color rich salmon shaded with orange. 15c each.

Napoleon—One of the handsomest and largest flowering Geraniums grown. A continual bloomer; color orange scarlet, with rose colored lower petals. 15c each.

La France—Enormous trusses of extra large pure white flowers. A free grower and an excellent potted plant. 15c each.

One each of the above five varieties for 60c.

Mrs. E. G. Hill—Flowers large and perfect in form; bright salmon with light shading in the center.

Francis Perkins—A very popular variety, producing an abundance of handsome, bright pink flowers.

James Vick—A well-known and popular variety, with deep flesh colored blossoms.

La Favorite—Large pure snow white blossoms; remarkably free blooming.

Mary Hill—Richest and purest deep pink. Flowers are of extremely large size, flowering at all seasons in the greatest profusion.

S. A. Nutt—Richest dark crimson; flowers perfect shape, large size.

Marvel—One of the handsomest red varieties grown, flowers rich bright crimson.

Double White Swan—Considered to be the best large double white flowering variety.

Gen. Grant—An old favorite; still one of the best and most brilliant single scarlet varieties.

Price 10c each, 3 for 25c. Our selection, 7 for 50c, 15 for \$1.00.

GLOXINIAS—See under Summer Flowering Bulbs.—Page 39.

GLADIOLUS—See under Summer Flowering Bulbs.—Page 39.

Heliotrope.

Four choice handsome varieties.

Florence Nightingale—Bright lavender

Madam Bruant—Lilac with large white eyes.

Snow Wreath—Nearly pure white.

Albert Deleaux—Foliage bright golden yellow, slightly marked with green; flowers lavender.

10c each, or one each of the four varieties for 25c.

Hydrangeas.

Otaska Monstrosa—Immense trusses of flowers; dark rose color.

Otaska—Flowers large, bright pink.

Thomas Hogg—Flowers tinged with green, becoming pure white.

Ramis Pictis—Red foliage, with deep pink flowers.

Hortensia—Rose color.

10c each, 3 for 25c, 7 for 50c.

Hardy Pinks.

The old fashioned but well known hardy garden Pinks has no equal as a perfectly hardy plant for the garden or border. They have a delightful clove-like fragrance which adds much to their value for cut flowers. They will grow almost anywhere and increase in beauty each year. We offer three choice colors, White, Pink and Red; state the color you desire when ordering.

10c each, 3 for 25c, 7 for 50c.

Lemon Verbena.

Foliage very fragrant; a free growing plant, equally suitable for outdoor or pot culture. 10c each, 3 for 25c.

Primulas.

Primula Obconica—This is one of the most useful flowering plants. It is almost continuously in bloom, in fact, if allowed to do so, it will bloom itself to death. It is an excellent pot plant, also succeeds well in the open border during the summer months. The flowers are borne on stiff stems, well above the foliage; colors ranging through the rose and lilac shades. 15c each, 2 for 25c.

Baby Primula—A beautiful free flowering Primula, especially adapted for pot culture; the flowers are a charming rosy lilac with yellow eyes, and are freely produced on long slender stems, well above the foliage. A very desirable plant. 15c each, 2 for 25c.

Primula Sinensis—See description under Flower Seeds. Choice, well established plants; mixed colors only. Each 10c, 4 for 25c, 9 for 50c.

Petunias.

Favorite bedding plants, also largely used in window boxes, urns, etc., etc. We have made a careful selection, mostly double varieties, mixed colors only. Each 10c, 3 for 25c, 7 for 50c.

PANSY—See Bedding Plants.—Page 40.

PHLOX—See Bedding Plants.—Page 40.

VERBENAS—See Bedding Plants.—Page 40.

Swainsonia.

Nearly everyone is familiar with this well known and popular plant. It is almost a continuous bloomer; the flowers are produced in abundance in sprays of from 10 to 20 flowers each; color pure white. 10c each, 3 for 25c.

Smilax.

Everyone is familiar with this graceful climber, so it needs no special description from us. It is of very rapid growth, and should be found in every collection of plants. 10c each, 3 for 25c, 7 for 50c.

Violets.

One of the most delightfully perfumed plants ever grown. Grown in the house, at a moderately low temperature, they will bloom freely during the entire season.

Marie Louise—Large double flowers; purple with white center.

Swanley White—Flowers large; double, pure white.

California—An especially good variety. Flowers single, very fragrant; color a clear violet purple that does not fade. Flowers are very large, borne on stems 10 to 12 inches long.

The above 10c each, 3 for 25c, 7 for 50c.

Palms.

Well known decorative plants. An almost indispensable plant for decorating the house or conservatory.

Lantana Barbonica—Of very easy culture and rapid growth; large deeply divided fan-shaped leaves. Small plants 15c and 20c each, postpaid.

Phoenix Canariensis (The Canary Date Palm)

—No Palm has gained so steadily in the public favor in the past few years as this handsome Palm from the Canary Islands. Branches are long, gracefully arched and borne in great abundance. Price 15c and 25c each.

Washingtonia Filifera—This is one of the best window Palms, needing no petting to succeed. Stands dust, dry air and lack of sunshine and is very ornamental with its elegant fan-shaped leaves, of rich dark leathery green. Picturesquely fringed with long thread-like filaments along the segments of the leaves. The young plants do not show these, but, as soon as the plant is large enough to show the character of its leaves, these long filaments begin to show. Small sized plants only 15c and 20c each.

Areca Lutescens—One of the most valuable and beautiful of Palms. Its dark, glossy green leaves are gracefully curved on slender stems, and its entire foliage is gracefully disposed. 25c each.

Kentia Balmoreana—A very handsome variety; one of the most ornamental of Palms. 25c each.

Cocos Wedelliana—The most elegant and graceful of the smaller Palms. Its slender, erect stem is freely bunched with gracefully arched leaves of a rich green color. 30c each.

SPECIAL OFFER.

We offer the following special collection of plants, our selection of varieties:

- One Choice Rose
- One Smilax Plant
- One German Ivy
- One Geranium
- One Begonia.

5 CHOICE PLANTS ONLY 25c, POSTPAID.

Roses.

HARDY HYBRID PERPETUAL ROSES.

Roses of this class produce the largest and most beautiful flowers and are perfectly hardy. They should always be planted in the open ground.

- * **Alfred Colcomb**—Bright carmine crimson.
- * **Anne de Diesbach**—Brilliant shell pink.
- * **American Beauty**—Rich rosy crimson.
- * **Caprice**—Handsome striped variety.
- * **Coquette de Alps**—Pure white tinged with pink.
- * **Gen. Jacqueminot**—Crimson; the red favorite.
- * **John Harper**—Brilliant rose, very sweet.

Jules Margottin—Bright carmine; free flowering.

* **Mme. Plantier**—Pure white, large size.

* **Magna Charta**—Very double, rosy red.

* **M. P. Wilder**—Very large crimson.

Mrs. Cleveland—Large, waxy, flesh pink.

* **Mrs. John Laing**—Clear bright pink.

* **Paul Neyron**—Bright shining pink.

* **Ulrich Brunner**—Brilliant cherry red.

Each 10c, 3 for 25c, 6 for 45c. One each of the 15 varieties \$1.00 postpaid.

Large Two and Three-year-old plants.

The above varieties marked with a * we can furnish in large, strong, field-grown plants, if order is received by us not later than April 1; shipment is made about May 1. Sent by express only, at expense of purchaser. These large plants will bloom abundantly the first season.

Each 30c, 2 for 55c, 4 for \$1.00

Price 10c each, 3 for 25c, 6 for 45c, 12 for 80c.

TEA, EVERBLOOMING AND BEDDING ROSES.

Varieties marked * are hardy or nearly so.

1. * **Augustine Guinnoiseau**—(White La France). A remarkably free bloomer and a rose that no one should miss; color white with just a tinge of blue, clouding its petals.
 2. **Bride**—A most popular white Rose.
 3. **Catherine Mermet**—One of the best varieties grown. Color bright pink.
 4. * **Clothilde Soupert**—Pure white.
 5. * **Champion of the World**—Color deep pink.
 6. * **Duchess of Albany**—(Red La France)—A bright, handsome variety; similar to the La France Rose.
 7. * **Etoile de Lyon**—The handsomest and hardest of the yellow Tea Roses.
 8. * **Hermosa**—Pink; an almost continual bloomer.
 9. **Kaiserin Augusta Victoria**—Creamy white.
 10. * **La France**—Sweetest of all Roses.
 11. * **Mad. Angelique Veyssot**—(Striped La France) Satiny pink, striped with bright rose.
 12. **Marion Dingué**—Deep crimson, changing to carmine.
 13. * **Mrs. De Graw**—An ideal bedding Rose. The flowers are bright, rich pink, of good size and very fragrant.
 14. **Meteor**—Color rich, velvety crimson.
 15. **Madame Hoste**.
 16. * **Mosella (Yellow Soupert)**—Blossoms in clusters from three to five flowers.
 17. **Marie Guillot**—The queen of white roses.
 18. **Papa Gontier**—An excellent crimson variety.
 19. **Perle des Jardins**—Beautiful, clear yellow.
 20. * **Pink Soupert**—Color rich pink.
 21. * **Safrano**—Dark yellow, shading to orange.
 22. **Souv. de Pres. Carnot**—Dark rosy flesh.
 23. **Princess Bonnie**—Bright, rich crimson.
- Customers' selection of varieties.

Special Selection of Ever-Blooming and Bedding Roses.

Varieties described above. In ordering give simply the name of the collection wanted.

La France Collection of Four Roses—This collection contains four colors of the beautiful and fragrant La France Roses. One each of the following: 6, 11, 1, 10. The 4 Roses 30c.

The Soupert Collection—Three charming Soupert Roses, the finest for outdoor or indoor culture. One each, 4, 20, 16. The 3 Roses for 25c.

Everblooming Yellow Collection—Four of the choicest yellow Everblooming Roses. These varieties are hardy as far north as Philadelphia and, with as light covering of leaves or straw, will succeed in wintering even farther north. One each, 7, 15, 16, 21. The 4 Roses 30c.

Everblooming Red Collection—Three of the choicest, everblooming Red Roses. One each, 12, 14, 18, 23. The 4 Roses 30c.

The Everblooming Pink Collection—Three of the choicest everblooming Pink Roses, remarkable for their exceptional hardiness and free flowering qualities. One each, 5, 13, 8. The 3 roses for 25c.

Rambler Roses.

Although the various varieties of the Rambler Roses are of recent introduction, yet, to-day, they are one of the most popular varieties grown. The Crimson Rambler, with its companions of different colors, has no equal for climbing Roses. They are extremely vigorous, hardy, and rapid growers, furnishing an abundance of bloom. We offer the Rambler Roses in five different colors.

Crimson Rambler—Price 12c each, 3 for 30c.

Rambler Rose Helene—In many respects an improvement over the Crimson Rambler, of which it is a seedling. Foliage similar to the Crimson Rambler, but less subject to mildew and insect attacks. The flowers are borne in large clusters in great profusion. Color, soft violet rose, almost blush and base of petals almost white. Price 15c. each, 3 for 40c.

New Pink Rambler—Like the Crimson Rambler, except in the color of its bloom, which is a beautiful shade of pink. 12c. each, 3 for 40c.

SPECIAL—One of each of the above five Rambler Roses sent postpaid for only 50c.

LARGE SIZE ROSES—We can supply the above Rambler Roses in large two and three-year-old plants, field grown. To those wishing immediate effect and can afford to pay the difference in price, these are the ones to buy. Orders should reach us on or before April 1st. We usually ship about May 1st. Sent by express only, at expense of purchaser.

Each 50c, 2 for 75c. One each of the five varieties for \$1.75.

New White Rambler—This charming, new White Rambler is a wonder, fully equal to its companion the Crimson Rambler and like it, except that it produces immense clusters of white Roses. Price 12c. each, 3 for 30c.

New Yellow Rambler—Not as hardy as the other varieties of Ramblers, yet may be wintered through by laying down and covering with leaves and straw. It is as hardy as any yellow Rose. The flowers are borne in immense clusters the same as the Crimson Rambler, except yellow in color. Price 12c. each, 3 for 30c.

Moss Roses.

Moss Roses are as hardy as any Rose can be and an extra vigorous variety. While they bloom but once in the year, they are very desirable, as the flowers are large, beautiful and plentiful.

Blanche Moreau—Large, pure white.

Princess Adelaide—Double, fragrant, rosy pink.

Crimson Globe—Rich, deep crimson.

Price 15c each, 3 for 40c, 6 for 75c, 12 for \$1.00.

Hardy Climbing Roses.

***Baltimore Belle**—Clusters rose and white.

Empress of China—Blooms entire season,, red.

***Seven Sisters**—Clusters white to crimson.

Mary Washington—Double, pure white.

Each 10c, 3 for 25c. One each of the seven varieties for 50c postpaid.

Large Size Plants—The above varieties marked with a * we can furnish in large two and three-year-old, field-grown plants. Sent by express only at expense of purchaser. Each 30c, 4 for \$1.00.

***Queen of the Prairies**—Double pink and white.

***Tennessee Belle**—Vigorous grower, rosy pink.

Russell's Cottage—Double, dark velvety crimson.

Hardy Climbing Vines.

Clematis—There is no more ornamental class of plants than the Clematis and the rich show of bloom produced by the best varieties is far too magnificent to be fairly portrayed by mere words. We consider the two handsomest varieties are Purple and White. Send your orders early, not later than April 1.

Jackmanii—An old but very popular variety. The flowers are large, intense rich velvety purple.

Paniculata—An extremely valuable and handsome variety, of very rapid growth, soon reaching a height of 15 or 20 feet, and spreading out in every direction. The small, pure white flowers are borne in great masses of clusters, on long stems, so profuse as to fairly cover the plant with a sheet of fleecy white. The flowers have a delightful Magnolia-like fragrance. Very hardy.

Madame Veillard—Of recent introduction and similar to the popular Jackmanii, excepting in the color of its bloom, which is a lively, satiny, lavender pink.

Romona—The flowers are very large, often 9 inches across, a very handsome lavender blue.

Duchess of Edinburg—One of the best double whites, of vigorous habit and free flowering.

Henryi—Large, pure white flowers.

Madame Edouard Andre—Large blooms, produced in great abundance, bright carmine.

Each 15c, 2 for 25c, 3 for 35c. One each of the seven varieties 75c postpaid.

Ampelopsis Veitchii (Boston Ivy)—This beautiful climbing, hardy vine is much used in and around Boston, hence its common name Boston Ivy. It is a handsome vine for buildings, as it will soon cover the entire walls, clinging to the smoothest surface, and it is of such growth that it will not injure stone or brick buildings in the least. The color in summer is a rich, deep green, in autumn changing to the brightest shades of crimson and yellow. Price 12c each, 3 for 30c.

Honeysuckles—For a real, home vine, to be near you, climbing over your windows and doors, there is nothing prettier than the sweet-scented Honeysuckle. The foliage is pretty, neat and clean, the flowers are almost continuous and their fragrance delicious. We offer three of the choicest varieties.

Hall's Japan—A strong growing, almost evergreen sort, with pure white flowers, changing to yellow. Very fragrant and covered with flowers from July to November.

Monthly Fragrant—Red and yellow; very fragrant. Blooms all summer; leaves tinged with a reddish color.

Scarlet Trumpet—Bright red, trumpet-shaped flowers. Blooms very freely the entire season; vigorous and rapid growing.

Price of the above varieties 12c each, 3 for 25c, 12 for 85c, postpaid.

Wisteria—The Chinese or Purple Wisteria is particularly valuable for training over buildings, second floor verandas, or wherever a tall growing climber is wanted. It is a vigorous, rapid grower, and entirely hardy. The flowers are borne in clusters of rich violet purple; very sweet and exceedingly handsome. Price 12c each, 3 for 30c, postpaid.

Hardy Shrubs.

When large sizes are quoted they are to be sent by express at expense of purchaser, and orders must be received by April 1. Small plants not later than April 15th.

Hydrangea Paniculata Grandiflora—Each 10c, 3 for 25c. Large size 30c, 3 for 75c.

Deutzias—Crenata, flowers white tinged with rose. Gracilis, dwarf, flowers white. Pride of Rochester, double, fine white flowers. Each 12c, 3 for 30c. Large size 35c, 3 for \$1.00. Forsythia Fortuneii, the first to bloom in the Spring. Each 12c, 3 for 30c.

Spirea—Golden Leaved, golden foliage, white flowers. Rosea, long spikes, rose colored flowers. Revesii, beautiful single white flowers. Blue, a very handsome white variety. Each 12c, 3 for 30c. Large size 30c, 3 for 75c.

Weigelia—Candida, handsome snow-white flowers. Rosea, rose-colored flowers. Variegated Leaved, handsome variety. Each 12c, 3 for 30c. Large size 30c, 3 for 75c.

Japan Snowball—Each 12c, 3 for 30c. Large size, 50c each.

BISMARCK APPLE.

MAILING SIZE TREES, SENT POSTPAID.—This is perhaps the most wonderful new apple ever introduced. It originated in New Zealand and bears the second year after grafting. The fruit is remarkably large, very showy (bright yellow). It has already been tested in Europe, United States and Canada and wherever grown it has proved a most astonishing revelation of apples in high quality and especially in earliness of fruit. It is also claimed that it is the only apple that will do well in hot countries. On account of its beginning to bear while young and owing to its bearing when only a small tree, it is frequently grown in pots simply as an ornament. Each 20c.; 3 for 50c.

SUMMER FLOWERING BULBS.

Begonias, Tuberous Rooted.

Good size bulbs that will bloom this season in single flowering varieties. Separate colors or mixed. White, pink, scarlet, yellow; 10c each, 3 for 25c.

Cannas.

Cannas—Beautiful summer flowering bulbs, especially valuable for planting in beds and borders, or with other plants. The improvement made in Cannas during the last few years, in size of flowers and diversity of color, places it in advance of all other flowers for bedding purposes. We have grown a very nice stock of these bulbs and offer them at very reasonable prices.

Italia—Bright scarlet, with broad orange yellow border, forming a combination approached in beauty by no other Canna. It is a strong, rampant grower, with broad heavy foliage, about 5 feet high.

Austria—Color golden yellow, with faint scarlet markings; blooms very freely on straight, tall flower stalks. A very fast grower. A small plant set out in the spring will make a monster clump six feet high by midsummer.

Burbank—Giant Orchid like flower, the upper petals measuring fully seven inches across. Color rich canary yellow, with a few carmine spots. It is a vigorous growing plant, attaining a height of about 5 feet, with large shiny leaves.

Queen Charlotte—Bright orange scarlet, edged with yellow. The flowers are large, borne in immense heads, three and a half feet.

Chas. Henderson—Bright crimson, with pencilings of golden yellow. The standard of excellence of all crimson Cannas; about 4 feet.

Alsace—The nearest to a white Canna. Flowers on first opening are a light sulphur yellow, changing to creamy white. About 4½ feet.

Robusta—Very large; foliage dark maroon. Blossoms are small, and this variety is used for the beauty of its foliage only. Largely used for tropical effects; 6 to 7 feet.

Prices of any of above varieties, large roots, 15c. each, 2 for 25c, 5 for 50c, 12 for \$1.00; by express not prepaid, 25 for \$1.50, 50 for \$2.75, 100 for \$5.00. Smaller roots 10c. each, 3 for 25c.

MIXED CANNAS—We put up a choice mixture of the different varieties, and offer them at the following low prices: 4 for 25c, 9 for 50c; by express not prepaid, 25 for \$1.25, 50 for \$2.50; 100 for \$4.50.

Dahlias.

There is nothing that with the same amount of money invested, will give more show of flowers than Dahlias. We offer dry bulbs or tubers, but sometimes send started plants. We have just one hundred varieties, but on account of space cannot list each variety separately. Our customers may be sure of getting a good assortment.

Cactus Varieties—A very showy and effective class of Dahlias. Especially fine for cut flowers. Free blooming, long stems, handsomely formed flowers.

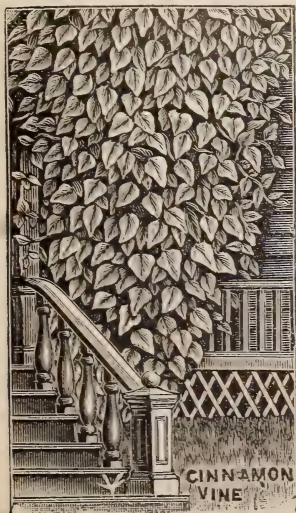

Pompon or Bouquet—Plants more dwarf in growth, flowers smaller size, but borne in great profusion. Fine for cut flowers.

Double or Show—Large free growing varieties, with large double blossoms. Fine rich coloring.

Decoration or Fancy—These differ from the Cactus variety, in having broader and heavier petals. Flowers produced in abundance, large size, perfectly formed, handsome colors.

Each 15c, 4 for 50c, 8 for \$1.00, prepaid. By express not prepaid, 12 for \$1.00, 25 for \$1.75, 50 for \$3.25, 100 for \$6.00.

Beautiful Cinnamon Vines.

(Dioscorea Batatas.)

The Cinnamon Vine from the Oriental land is one of the most beautiful of climbers; the most fragrant and the easiest to grow. No home is complete without it. They will surround your windows, porch and trellises, making them "perfect bowers of beauty." They will grow 30 feet in a single season. Nothing like them. Their abundant blossoms perfume the air for a long distance with the most delicious fragrance. No words can describe their exquisite perfume.

Strong roots each 10c, 5 for 25c, 12 for 50c, 30 for \$1.00.

Tuberose.

Well-known and beautiful summer flowering bulbs, producing spikes of double white flowers.

Double Pearl—Large-sized flowering bulbs. 5c. each, 3 for 10c, 10 for 25c, postpaid.

Gloxinias.

The handsomest summer blooming bulbs, of rich and varied colors, some of them beautifully speckled; flowers 3 inches long by 2 inches in diameter; colors crimson, violet, rose, scarlet, white, etc. We offer mixed colors only. Bulbs 15c. each, 2 for 25c, 5 for 50c. Small sized bulbs 10c. each.

Gladioli.

One of the most showy and easiest grown summer flowering bulbs for outdoor culture. Finest mixed, large sized bulbs, sure to bloom the first season. 4 for 10c, 12 for 25c, 50 for 75c, by mail postpaid. By express, not prepaid, \$1.00 per hundred.

Separate Special Colors—Extra large white and choice varieties of white and light shades, 3 for 10c, 12 for 35c, postpaid.

Yellow or Orange—2 for 10c, 12 for 50c, postpaid.

Striped and Variegated—Extra fine, very handsome 2 for 10c, 12 for 50c.

Pink—All the pink and rose shades. 3 for 10c, 12 for 25c.

Scarlet and Red—Very bright and showy. 3 for 10c, 12 for 25c.

Bedding Plants.

We offer a choice list of plants especially suitable for bedding, window boxes, urns, piazzas, etc., etc. We do not usually send out these plants until the weather is warm enough for planting out-of-doors. If wanted before, state time you wish them sent.

Pansy—Each season we send out thousands of these plants. We grow plants from selected seed of the large flowering varieties. Large variety of colors. Sent mixed only. 6 for 15c, 12 for 25c, 25 for 50c, 60 for \$1.00, postpaid.

Verbena—Choice assortment of colors, all of the large flowering types. All our plants are grown from cuttings, and we grow named varieties only.

Antonio—Deep blue.

Francis—Light pink.

Negro—Black.

Beauty of Oxford—Dark pink.

Iona—Pink and scarlet,

Pres. Harrison—Scarlet.

Fire Ball—Dazzling scarlet.

Mrs. McKinley—White.

Swanger's Beauty—Striped.

Customers selection, 5c each, 6 for 25c, 12 for 50c.

Our selection, assortment of colors, not labeled, 5 for 15c, 12 for 30c, 25 for 50c, 50 for 90c.

Asters—We grow a great many Asters in the following varieties. Description may be found under Asters in the Flower Seed Department:

White Branching.

New Japanese.

Victoria Mixed.

Pink Branching.

Queen of the Earliest.

Truffant's Perfection—Mixed.

Lavender Branching.

New Yellow.

Branching Mixed.

Crimson Branching.

Jewell or Ball.

Christmas Tree.

Customers selection, 5c. each, 6 for 25c, 12 for 50c.

Our selection, assortment of varieties, not labeled, 5 for 15c, 12 for 30c, 25 for 60c, postpaid.

CARNATIONS—Choice little plants grown from seed of the Marguerite varieties. Assorted colors only. Will bloom during the summer. 12 for 25c, 25 for 50c.

STOCK—Well established plants grown from seed, ready for planting out-of-doors. White only. 6 for 15c, 12 for 25c, 25 for 50c.

NASTURTIUMS—Both the climbing and dwarf varieties. Assorted colors only. 3 for 10c, 10 for 25c.

PHLOX DRUMMONDII—Choice plants from seed. Will flower first season. Mixed colors. 3 for 10c, 10 for 25c.

PETUNIAS—Single and double. Assorted colors only 10c each, 3 for 25c, 7 for 50c.

CASTOR BEANS—Zanzibariensis variety only. The largest variety grown. See description under Castor Beans. Flower seed development. Pot grown plants. 10c. each, 3 for 25c, 7 for 50c.

JAPAN HOP—The most rapid growing vine. See description under Humulus Japonicus. 3 for 15c, 6 for 25c.

SPECIAL OFFER.

1 Little Gem Calla, 1 Spotted Calla, 1 Japan Iris.
3 Choice Varieties only 25c.

Four Best Large Flowering Clematis.

Madam Veillard.

Jackmanni.

Henryi.

Mad. E. Andre.

Madam Veillard. Of recent introduction and quite like its parent, the popular Jackmanni in habit and make-up, except that its flowers are a lively, satiny lavender pink; entirely distinct from any other variety and charming in effect.

Jackmanni. The flowers are large, intense rich velvety violet-purple and are produced in such masses as to form a cloud of bloom. Well known and very popular.

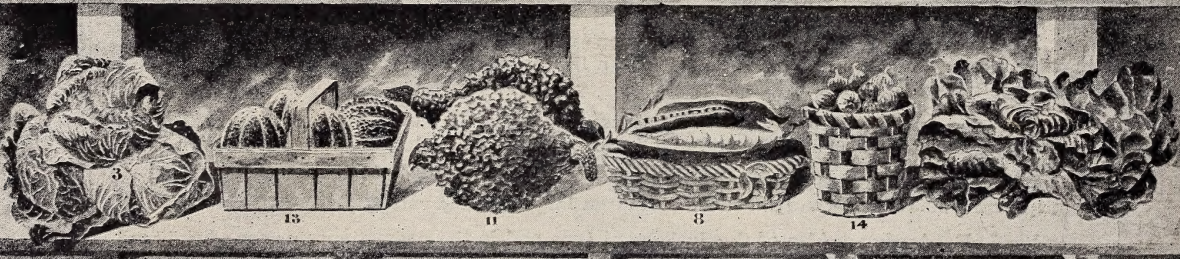

Henryi. A vigorous grower and a free bloomer, producing its large pure white flowers constantly during summer and early autumn. The best large flowered variety producing white flowers.

Mad. E. Andre. Also of the Jackmanni type and is the nearest approach to a bright red that has yet appeared. The flowers are very large, usually six petaled, of a distinct pleasing shade of carmine, and are produced in bewildering profusion.

Special Offer. One each of the above four choice Clematis for only 40c., post paid.
Order before April 1st.
